A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants

In what ways are language, cognition and perception interrelated? Do they influence each other? These findings form the basis of a new, speaker-focused usage-based model of linguistic relativity, which defines language-perception/cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities.

Beginning in Vancouver with James Starks first delivery van in 1907, motorized transport exploded in the province, soon traversing every dirt track, hauling logs on temporary plank roads and leading to a frenzy of experimentation and innovation from the failed Renard Road Train and early battery-operated vehicles to some truly impressive purpose-built trucks, many of them manufactured in BC. Long-time Pontiac expert and magazine writer Rocky Rotella guides the reader through the entire rebuild
