Today, one of the most valuable assets of companies is their workforce. Primarily, the importance of information is increased and the

human factor that absorbs and uses it by creating value has become much more essential. One of the most critical steps that managers need to take to be successful is to enhance human power in the most efficient way possible. Companies that want to be long-lasting need to make HR the

main item on their agenda. Human resource practices are critical for companies to survive. In addition to firms in general, family firms are also a special and the most common type of business in the economy. Hence, family firm HR practices are also an important part of this

book. Among the most famous features of a family firm, complex HR management practices are on top of it all. Owners and family members are all aware that non-family employees are needed, and non-family managers are required for the success and

sustainability of the family firm. Hence, family firms cannot have biased, bifurcated, or different HR practices towards non-family employees. Readers will find this book comprehensive and inclusive of new issues of HR management literature. The book is

comprised of chapters, each describing current and important practices and problems of HR management. Along with the family firm-specific problems like nonfamily managers, women entrepreneurship, and nepotism, chapters cover the state-of-the-art topics and findings
