True love never dies. It is redefined every time you feel it. When Nish falls in love, little does he know the impact it is going to have on his life. Hailing from conservative backgrounds, love is nothing less than war with the world for the lover and his beloved. Albeit limited communication, they still dare to dream of a life together. But with the pressure of attaining stability in life, he finds it impossible to chase his dreams endlessly. An unassuming man from a modest background, he fights helplessness and challenges thrown at him by life, only to learn precious life lessons. His faith in God gives him the strength to move on and find his calling in writing and poetry. When Love Happens... is a tale of shattered dreams and redemption, of fear and fortitude, and above all, of the indomitable human will.

Implant dentistry is now an integral part of everyday dental practice; however, most dentists receive their education in implant dentistry after graduation, with little emphasis on the identification of the complexity and risks of treatment. Since 2003 the International Team for Implantology (ITI) has recommended the SAC Classification to categorize implant treatment procedures into three levels of difficulty—straightforward, advanced, and complex. In 2007 the ITI organized a conference to standardize the application of the SAC classification, the conclusions of which are presented in this volume. This invaluable resource will help clinicians identify treatment complexity and risk before treating a patient, thereby improving the predictability and success of their outcomes.
