Two Hundred Years of Accounting Research

This book is about the design and working of management accounting and control systems from an organizational sociology perspective. It does not deal with the application of quantitative techniques; instead the focus is on the organizational and people side of accounting and control systems--how they are used to influence, motivate and control what people do in organizations. The author's highly successful first book on this topic, The Social Software of Accounting and Information Systems (Wiley, 1985) was much acclaimed for its lucid style and careful analysis of the application of theory in practice. This new book offers that same clarity and accessibility in a study which focuses on new developments in organizational sociology at the macro level. The book outlines nearly twenty frameworks for investigating and understanding management accounting and control systems. These frameworks illustrate five distinctive paradigms of organizations and the social world. Case studies are used to bring these frameworks to life and to show how they can be used to analyze, diagnose and resolve real world management accounting and control systems problems and issues. Norman B. Macintosh is a professor at Queen's University, Canada where he teaches in accounting and control. "If you want to know what has been happening at the frontiers of management control research then you could not do better than starting with this book. The exposition is not only of value to scholars on upper level courses grappling with current theory and research but also to the thinking creative executive involved in control system design in today's changing and turbulent business environment. The book is an essential addition to the bookshelf of any management control specialist seeking intellectual stimulation through ideas coupled to practical implementation." Professor Trevor Hopper University of Manchester, UK "This book is required reading for any practitioner or student who desires a sophisticated and intellectually challenging understanding of management accounting." Richard J Boland, Jr Case Western Reserve University, USA "In these days of globalisation and intensified interaction between management

cultures the interest in the behavioural and social side of management accounting and control is growing. This is a timely and exciting addition to that literature. The book is recommended as required reading in advanced courses and for professional management accounting programs. A fine volume." Sten Jonsson University of Gothenburg, Sweden

The Dictionary of Auditing is a one-stop resource for key auditing terminology, concepts, and processes essential to auditors and of increasing interest to those that work with them. Covers key regulatory developments such as Sarbanes Oxley and provides links for further reading.

This book is a study of earnings management, aimed at scholars and professionals in accounting, finance, economics, and law. The authors address research questions including: Why are earnings so important that firms feel compelled to manipulate them? What set of circumstances will induce earnings management? How will the interaction among management, boards of directors, investors, employees, suppliers, customers and regulators affect earnings management? How to design empirical research addressing earnings management? What are the limitations and strengths of current empirical models?

"Bob Chapman, CEO of the \$1.7 billion manufacturing company Barry-Wehmiller, is on a mission to change the way businesses treat their employees." - Inc. Magazine Starting in 1997, Bob Chapman and Barry-Wehmiller have pioneered a dramatically different approach to leadership that creates off-the-charts morale, loyalty, creativity, and business performance. The company utterly rejects the idea that employees are simply functions, to be moved around, "managed" with carrots and sticks, or discarded at will. Instead, Barry-Wehmiller manifests the reality that every single person matters, just like in a family. That's not a cliché on a mission statement; it's the bedrock of the company's success. During tough times a family pulls together, makes sacrifices together, and endures short-term pain together. If a parent loses his or her job, a family doesn't lay off one of the kids. That's the approach Barry-Wehmiller took when the Great Recession caused revenue to plunge for more than a year. Instead of mass layoffs, they found creative and caring ways to cut costs, such as asking team members to take a month of unpaid leave. As a result, Barry-Wehmiller emerged from the downturn with higher employee morale than ever before. It's natural to be skeptical when you first hear about this approach. Every time Barry-Wehmiller acquires a company that relied on traditional management practices, the new team members are skeptical too. But they soon learn what it's like to work at an exceptional workplace where the goal is for everyone to feel trusted and cared for—and where it's expected that they will justify that trust by caring for each other and putting the common good first. Chapman and coauthor Raj Sisodia show how any organization can reject the traumatic consequences of rolling layoffs, dehumanizing rules, and hypercompetitive cultures. Once you stop treating people like functions or costs, disengaged workers begin to share their gifts and talents toward a shared future. Uninspired workers stop feeling that their jobs have no meaning. Frustrated workers stop taking their bad days out on their spouses and kids. And everyone stops counting the minutes until it's time to go home. This book chronicles Chapman's journey to find his true calling, going behind the scenes as his team tackles real-world challenges with caring, empathy, and inspiration. It also provides clear steps to transform your own workplace, whether you lead two people or two hundred thousand. While the Barry-Wehmiller way isn't easy, it is simple. As the authors put it: "Everyone wants to do better. Trust them. Leaders are everywhere. Find them. People achieve good things, big and small, every day. Celebrate them. Some people wish things were different. Listen to them. Everybody matters. Show them."
