A comprehensive introduction to ethical decision making with practical guidance regarding professional misconduct.

Crafting the Movement presents an explanation of why the Swedish working class so unanimously adopted reformism during the interwar period. Jenny Jansson discusses the precarious time for the labor movement after the Russian Revolution in 1917 that sparked a trend towards radicalization among labor organizations and communist organizations throughout Europe and caused an identity crisis in class organizations. She reveals that the leadership of the Trade Union Confederation (LO) was well aware of the identity problems that the left-wing factions had created for the reformist unions. Crafting the Movement explains how this led labor movement leaders towards a re-formulation of the notion of the worker by constructing an organizational identity that downplayed class struggle and embraced discipline, peaceful solutions to labor market problems, and cooperation with the employers. As Jansson shows, study activities arranged by the Workers' Educational Association became the main tool of the Trade Union Confederation's identity policy in the 1920s and 1930s and its successful outcome paved the way for the well-known "Swedish Model." This lively, comprehensive introduction to human behavior in the social environment offers a multidimensional approach to the topic, with discussion of integrative practice, theory, treatment, and services as well as matters pertaining to diversity addressed throughout the text. The text provides solid coverage of foundation knowledge, integrates the biopsychosocial dimensions for assessing social functioning, and offers case studies to illuminate the applied aspects of the content. Furthermore, as part of the Brooks/Cole Empowerment Series, the fifth edition thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2008 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping students connect foundation knowledge with specific practice concerns. Study tables and concept maps (for each discussion of behavior in the development chapters) clarify major phases of biopsychosocial development across the life span. This framework gives students a concrete tool for assessing human behavior from a perspective that reflects the values and knowledge base of the social work profession. This text bridges the gap by offering learning activities that can be worked in both settings. The book is divided into four main parts that accounts for the major areas of social work practice. Part I covers the foundations of practice, including self awareness and knowing and learning about the community within one will practice. The second part deals with direct practice and covers individual assessment and group work. The third part focuses on agency practice and finally the last part covers special issues for consideration, including multicultural practice, law-informed practice, ethics, specialist and comparative practice.

This important text provides a comprehensive survey of homelessness in America: its scope and causes, its diverse populations, and the array of responses at the individual, community, and systems levels. Expert contributors explore the links between trauma and homelessness, the cycle of homelessness and health/mental health problems, and barriers preventing people from accessing services. Case studies of effective programs and practices focus on science-based interventions, broad understanding of client needs, and close coordination between systems and agencies. Finally, specialized chapters discuss issues and experiences common to homeless youth and young adults, including housing instability on college campuses and empowerment-based strategies for engaging youth voice in programming . Included in the coverage: Homelessness and health disparities: a health equity lens Affordable housing and housing policy responses to homelessness Street talk: homeless discourses and the politics of service provision Multisectoral collaborations to address homelessness Trauma-informed care in homelessness service settings: challenges and opportunities Incorporating youth voice into services for young people experiencing homelessness Homelessness Prevention and Intervention in Social Work fills a critical gap in the social work curriculum as a main or a supplementary text. It also makes an accessible resource for clinicians and community practitioners seeking current knowledge on the topic, practical approaches to working with clients experiencing homelessness, and useful information for effective program and policy design.

Providing the breadth of a standard text and the depth of a contributed volume, Social Policy and Social Justice: Meeting the Challenges of a Diverse Society is built on a clear, conceptual social justice framework and provides up-to-date analyses of contemporary social policy issues, written by experts in their particular areas of research and practice. The book uses case studies and rigorous analysis to explore the relationship of social policy to economic, social, and culture transformation and the ongoing conflict between universal and population-specific conceptions of social welfare. The third edition addresses recent dramatic changes in social policy. It includes an assessment of policies adopted by the Obama administration, policy changes proposed and implemented by the Trump administration and Congress related to the country's social welfare system, and the effects of the Trump administration's immigration and criminal justice policies on communities of color. Additionally, the text considers the future of Social Security and Medicare, employment policies, health and mental health policies, and more. Throughout, the text explores the impact of economic and social changes on conceptions of need and helping, the role of social policies and social services in promoting or preventing social and political change, and the ways in which cultural, racial, ethnic, gender, and religious identity affect the development and implementation of social policies. This critical and empirically based volume examines the multiple existing Nordic models, providing analytically innovative attention to the multitude of circulating ideas, images and experiences referred to as "Nordic". It addresses related paradoxes as well as patterns of circulation, claims about the exceptionality of Nordic models, and the diffusion and impact of Nordic experiences and ideas. Providing original case studies, the book further examines how the Nordic models have been constructed, transformed and circulated in time and in space. It investigates the actors and channels that have been involved in circulating models: journalists and media, bureaucrats and policy-makers, international organizations, national politicians and institutions, scholars, public diplomats and analysts where and why models have travelled. Finally, the book shows that Nordic models, perspectives, or ideas do not always originate in the Nordic region, nor do they always develop as deliberate efforts to promote Nordic interests. This book will be of key interest to Nordic and Scandinavian studies, European studies, and more broadly to history, sociology, political science, marketing, social policy, organizational theory and public management. *Globalization has become a seemingly unstoppable force over recent decades and, in its wake, global notions of social justice have developed in response to its negative aspects. Neo-liberal economic policies have been a key element in the wider process of globalization, and these policies have had a profound impact on welfare provision and the shape of social work practice. Arising dissatisfaction among users of welfare and social work services is fuelling the search for a new, more radical social work that is firmly rooted in principles of social justice. Globalisation, Global Justice and Social Work explores the global effects of neo-liberal policies on welfare services in different countries, with contributions from social work academics, practitioners and welfare activists around the world. The first section of the book presents case studies of impact of neo-liberalism on welfare systems, social service provision and the practice of social work. In the second section the chapters explore the relationship between social work practice and the struggle for social justice. Authors discuss the personal and political dilemmas they have had to address in seeking to link a personal commitment to social justice with their daily practice as workers and educators in social work. The final section assesses the prospects for social work practice based on notions of social justice, by looking at what can be learned from the experience of previous radical movements as well as from emergent global and local movements.*

*What is poverty? Who is at risk? What myths about poverty are pervasive in the United States? This textbook, the first of its kind, explores the contemporary realities and perceptions of poverty. It captures the historical realities since Colonial times as well as addresses the contemporary realities, focusing on current trends in the United States, including the Great Recession, which began in 2007, leaving many middle-class families in poverty or vulnerable to harsh economic conditions and a sluggish recovery. The book presents readers with balanced coverage regarding the multidimensional issues related to poverty and social inequity, while exploring issues related to social injustice. The authors bring together theoretical, empirical, and clinical knowledge using reader friendly and jargon free language to discuss public and private approaches to reducing poverty and examine how public opinion drives policies. Professors Giffords and Garber challenge the stereotypes and misconceptions surrounding poverty, focusing attention on at-risk populations. These include people who are homeless, persons with disabilities, immigrants and refugees, individuals with co-occurring disorders, and veterans and military families. The format of the book provides case studies which cover micro, macro and mezzo practice. This lively, comprehensive introduction to human behavior in the social environment offers an integrative approach to biopsychosocial case formulations of current and developmental human behavior concerns. The sixth edition builds on previous integrative assessments by adopting a specific method for completing case formulations that students apply to case studies in the book's developmental chapters. This innovation provides students with a bridge to the core competencies and practice behaviors outlined in the 2015 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping them connect foundation knowledge with practice concerns. Guidelines for practice and assessment tools are identified for specific life tasks and for each phase of biopsychosocial development. This edition also offers concrete methods for the translation of developmental research to assessment practices. Animal welfare is attracting increasing interest worldwide, but particularly from those in developed countries, who now have the knowledge and resources to be able to offer the best management systems for their farm animals, as well as plentiful resources for companion, zoo and laboratory animals. The increased attention given to farm animal welfare in the West derives largely from the fact that the relentless pursuit of financial reward and efficiency has led to the development of production systems, that challenge the conscience of many consumers in those countries. In developing countries human survival is still a daily uncertainty, so that provision for animal welfare has to be balanced against human welfare. Welfare is only if it supports the output of the animal, be it food, work, clothing, sport or companionship. In reality, there are resources for all if they are properly husbanded in both developing and developed countries. The inequitable division of the world's physical and psychological poverty for humans and animals alike in all sectors of the world. Livestock are the world's biggest land user (FAO, 2002) and the population is increasing rapidly to meet the need of an expanding human population. Companion animals managed by humans are therefore increasing worldwide, and there is the tendency to allocate fewer resources to each animal. Increased attention to welfare issues is just as evident for companion, laboratory, wild and zoo animals.
