This book explores the interpretation of grammar and turn-taking in Japanese talk-in-interaction from the perspective of conversation analysis. It pays special attention to the projectability patterns of turns in Japanese in comparison to English. Through qualitative and quantitative methods, it is shown that the postpositional grammatical structure and the predicate-final orientation in Japanese regularly result in a relatively delayed projectability of the possible point at which a current turn may become recognisably complete in comparison to English. Prior to such points, projectability is often limited to the progressive anticipation of small increments of talk. However, participants are able to achieve smooth speaker transitions with minimal gap or overlap through the use of specific grammatical and prosodic devices for marking possible points at which a transition may become relevant.

The Japanese history textbook is one that keeps making the news, particularly with reference to claims that Japan has never 'apologized properly' for its actions between 1931 and 1945, and that it is one of the few liberal, democratic countries in which textbooks are controlled and authorized by the central government. There are frequent protests, both from within Japan and from overseas, that a biased, nationalistic history is taught in Japanese schools. This is the first time that all the authorized textbooks currently in use have been analyzed using a critical discourse that is anchored firmly in the theory of 'language within society', elucidating the meanings and associated ideologies created by the language of textbooks. Barnard examines the meaning-making potential of language, questions why certain choices are made, and links these choices to the ideological construction of meaning within Japanese history textbooks. Perhaps controversially, this ideological contruction is then linked to debates within Japanese society regarding war responsibilites and the textbook authorization system. Among the historical incidents dealt with in the book are: the Manchurian Incident, the Rape of Nanking and the Japanese attack on Pearl Harbor. This book will appeal to anyone interested in hte ideological construction of language as well as proving essential to specialists in Japanese Studies, sociology, social and cultural history.
