Learn modern jazz guitar and theory with virtuoso Jens Larsen (Music Sales America). Learn some of the most frequently used progressions in folk, blues, pop, and jazz.

Johnny Rector has been recognized for years as one of America's top jazz guitar writers. Here, for the first time, he presents an analysis of modern chord progressions, extensions, alternations, substitutions and a hands-on series of exercises designed to utilize and apply these important concepts to the guitar fingerboard. This book was written as a self-study guide to the intermediate, advanced and professional guitarist who has not had the opportunity to study material of this kind with a first-class competent teacher-artist, although such a teacher can be of great assistance in learning to apply

player. Chord voicings with the third or seventh of the chord as the bottom note are the basis for section two. This voicing is useful when a bass player is present to provide the root movement. The same progressions appear in both sections. The study of this material will help prepare the player for fake book reading and comping with a group.

Volume 9 of Arpeggios! covers arpeggio inversions and superimposition for the jazz chord progression found in tunes like "There Will Never Be Another You." The arpeggio exercises follow the progression through different inversions played over three adjacent strings in four positions of the neck. This approach allows the

reader to become familiar with shapes found inside the common one and two octave patterns that originate from the root, which is the focus of most arpeggio studies. Being able to visualize the patterns this way is beneficial to recognizing common tone and voice leading opportunities when soloing and comping. All examples are presented with separate notation and tablature pages. The latter part of the book takes the shapes learned in Section One and superimposes them over the chord progression in ways that extend the harmony to create more interesting and modern sounds.
