**This book discusses the increasing use of contract labour in India that has accompanied attempts to liberalise the economy. After briefly examining Indian labour laws and public policy, it juxtaposes the country's labour market practices with international labour standards. The questions that are raised are then explored through a series of empirical studies investigating the use of contract labour in a variety of**

**in terms of labour market deregulation. In this context, a set of crucial questions arise – can enforcing ‘labour market flexibility’ in itself provide the required impetus for a nation’s industrial growth? Is the Chinese success in becoming the major destination for foreign direct investments (FDIs) a consequence of a flexible labour regime or is there some other concealed strength to be found in Chinese labour market institutions? In particular it needs to be noted that after double-digit growth for more**

**than 25 consecutive years, China has recognised some of the fallacy of its development path and in 2008 adopted fairly stringent labour laws, which now regulate its labour market. This Chinese trajectory perhaps has lessons for India and other countries that are still struggling on the liberal path. In particular, the Chinese example helps put the Indian field studies in perspective and provides insights into India-specific policy recommendations that could also be useful for the developing world. The book**

the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to

sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. astrology in the modern west. Locating modern astrology historically and sociologically in its religious, New Age and millenarian contexts, Nicholas Campion considers astrology's relation to modernity and draws on extensive fieldwork and interviews with leading modern astrologers to present an invaluable contribution to our understanding of the origins and nature of New Age ideology. This book challenges the

notion that astrology is either 'marginal' or a feature of postmodernism.

Concluding that astrology is more popular than the usual figures suggest, Champion argues that modern astrology is largely shaped by New Age thought, influenced by the European Millenarian tradition, that it can be seen as an heir to classical Gnosticism and is part of the vernacular religion of the modern west.

This new Pillar volume offers exceptional commentary on Mark that clearly shows the second Gospel though it was a product of the earliest Christian community to be both relevant and sorely needed in today's church. Mark according to its theological intentions and purposes, especially as they relate to the life and ministry of Jesus and the call to faith and discipleship. Unique features of James Edwards's approach include clear descriptions of key terms used by Mark and revealing discussion of the Gospel's literary features, including Mark's use of the "sandwich" technique and of imagistic motifs and irony. Edwards also

proposes a new paradigm for interpreting the difficult "Little Apocalypse" of chapter 13, and he argues for a new understanding of Mark's controversial ending.

This unique contribution to Markan studies reads Mark's story of Jesus from a postcolonial perspective. It proposes that Mark need not necessarily be treated in an oversimplified polarity as an anti- or pro-colonial discourse. Instead it may be

treated as a postcolonial discourse, i.e. as a hybrid discourse that accommodates and disrupts both the native Jewish and the Roman colonial discourses of power. It shows that Mark accommodates itself into a strategic third space in between the variegated native Jewish and the Roman colonial discourses in order to enunciate its own voice. As an ambivalent and hybrid discourse it mimics and mocks,

accommodates and disrupts both the Jewish as well as the Roman colonial voices. The portrait of Jesus in Mark, which Samuel shows to be encoding also the portrait of a community, exhibits a colonial/postcolonial conundrum which can neither be damned as pro- nor be praised as anti-colonial in nature. Instead the portrait of Jesus in Mark may be appreciated as a strategic essentialist and transcultural hybrid, in

which the claims of difference and the desire for transculturality are both contradictorily present and visible. In showing such a portrait and invoking a complex discursive strategy Mark as the discourse of a subject community is not alone or unique in the Graeco-Roman world. A number of discourses-historical, creative novelistic and apocalyptic-of the subject Greek and Jewish communities in the
