In 1915, The Birth of a Nation cast a spell across America, swelling the Klan's ranks and drinking deep from the darkest thoughts of white folk. All across the nation they ride, spreading fear and violence among the vulnerable. They plan to bring Hell to Earth. But even Ku Kluxes can die. Standing in their way is Maryse Boudreaux and her fellow resistance fighters, a foul-mouthed sharpshooter and a Harlem Hellfighter. Armed with blade, bullet, and bomb, they hunt their hunters and send the Klan's demons straight to Hell. But something awful's brewing in Macon, and the war on Hell is about to heat up. Can Maryse stop the Klan before it ends the world? At the Publisher's request, this title is being sold without

Jim Clark was a genuine sporting hero. He won 25 of his 72 Grands Prix and in the sixties was the yardstick by which every other driver on the starting grid was judged, and by which they judged themselves. Quite simply, Clark was peerless. Stubborn and notoriously indecisive outside the car, he would nervously chew his fingernails, but he was a genius when he got behind the wheel. To many he remains the greatest racing driver of all time, not just because of his fearsome strike rate and the magnitude and manner of his achievements, but also because he remained humble and unspoiled throughout. Published on the 50th anniversary of Clark's death, this book, 20 years in the making, is a deeply detailed look at a complex and compelling character.

Out of print for twenty years, a new edition of Jim Clark 'Tribute to a Champion' by Eric Dymock will be published in the spring. Lightly edited and completely redesigned in colour throughout, this eagerly sought classic of motor racing celebrates the life and achievements of Jim Clark (1936-1968), World Champion 1963 and 1965. In the new book, Eric Dymock details his place in motor racing history and total command of Formula 1, portraying him as an individual, nail-biting and insecure, yet the greatest driver in any sort of motor sport. From a Scottish farming family Clark rewrote the annals of American racing at Indianapolis, coming second at his first attempt in 1963, winning in 1965. He seemed a match for any odds during eight dangerous years at the top of motor racing, yet died in an unlikely accident at a minor event at Hockenheim on April 7th 1968. Genius at the wheel was not enough. Rivals' subsequent safety campaigns saved countless lives on and off the track. Eric Dymock observed Clark from before he ever sat in a racing car, covering his professional career as member of The Motor magazine staff from 1962, and then as specialist motor racing correspondent from 1966. This book has photographs of Jim Clark's birthplace, home, memorabilia and archive material from the Jim Clark Room at Duns. The measured analysis throws light on the tense mood of Formula 1 in the hazardous 1960s when Clark narrowly missed four consecutive world titles. Misfortune in the closing laps of the final race of the season twice denied him a unique quartet. Some of his other records remain secure however. Clark's eight "grand slams" (pole position, leading every lap, fastest lap and winning a Grand Prix - his closest rivals Alberto Ascari and Michael Schumacher managed only five) is unlikely to be matched. The new edition will go on sale in the spring at regular bookshop prices for a new generation of Formula 1 fans, as the 50th anniversary of Clark's accident approaches.

A Collection of Special Moments of Friendship from the Andy Griffith Show

Organized chronologically, the book has chapters devoted to each of the show's eight seasons, along with production milestones and character biographies, as well as occasional lists, recipes, and snippets of dialogue. Originally published to celebrate the 40th anniversary of The Andy Griffith Show, this book features nearly 300 beautifully reproduced photographs in both color and black and white, the majority of which have never before been published. Mayberry Memories is the ultimate keepsake memento for fans who have enjoyed everything Mayberry for four decades.

Mary Higgins Clark, the Queen of Suspense, crafts a terrifying story of murder and obsession with "a slambang finish" (Los Angeles Times Book Review). When Laurie Kenyon, a twenty-one-year-old student, is accused of murdering her English professor, she has no memory of the crime. Her fingerprints, however, are everywhere. When she asks her sister, attorney Sarah, to mount her defense, Sarah in turn brings in psychiatrist Justin Donnelly. Kidnapped at the age of four and victimized for two years, Laurie has developed astounding coping skills. Only when the unbearable memories of those lost years are released can the truth of the crime come out-and only then can the final sadistic plan of her abductor, whose obsession is stronger than ever, be revealed.

Aunt Bee and her friends have stirred up a cookbook that brings home all the flavor of "The Andy Griffith Show's" Mayberry. You'll enjoy most of the 300 mouth-watering recipes (but not all!ncluded is the recipe for Kerosene Cucumbers) for the foods served by Aunt Bee and others in Mayberry. From good old-fashioned, down-home cooking to some of Mayberry's more unusual meals, you'll discover favorite Mayberry-style dishes for all occasions?inspired by Aunt Bee's unsurpassed talents in the kitchen and her special love for her family and friends. Aunt Bee's Mayberry Cookbook is also chock-full of wonderful, rare photographs from "The Andy Griffith Show" and offers entertaining glimpses into "the friendly town." Many of the recipes are favorites from members of the show's cast and crew.

Successful Habits of Visionary Companies

The state of Connecticut boasts an extensive and active community of life and drum groups. This musical tradition has its origins in the small military bands maintained by standing armies in Britain and Europe in the seventeenth and eighteenth centuries—the drum was especially important as it helped officers train soldiers how to march, and was also used to communicate with troops across battlefields. Today fifers and drummers gather at conventions called "musters," which may include a parade and concerts featuring the various participating corps. According to the Guinness Book of World Records, the largest muster ever was held in Deep River, Connecticut, in 1976. Musician and historian James Clark is the first to detail the colorful history of this unique music. This engaging book leads the reader through the history of the individual instruments and tells the story of this classic folk tradition through anecdotes, biographies, photographs, and musical examples.

The 1970s was a great decade for British racing drivers, but it was also the era in which the nation lost a generation of brilliant young drivers – Roger Williamson, Tony Brise and Tom Pryce – in tragic accidents. All had the potential to be World Champions. With access to their families, friends and race colleagues, David Tremayne tells their full stories in this superb book, now available in paperback. It makes for poignant but uplifting reading.

Few spectator sports generate such excitement as Formula 1. The name refers to the most advanced and competitive of the FIA's racing formulae. It's a raw combination of speed, skill, and that certain hint of daring. Journey back in time to the glory years of the 1960s. Marvel at the vintage cars, big-name champions and heart-stopping victories. All the big names are here: Jim Clark, Jacky Ickx, Jack Brabham—just to name a few. With Schlegelmilch's compelling photographs, this exceptional volume takes fans so close they can almost smell the burning rubber and hear the engines roar! Rainer W. Schlegelmilch has been a motor sports photographer since 1962. His expert lens has covered all the great names in racing. His unique style captures the drama of this action-charged sport.

The Carnegie Endowment for International Peace, the leading management school of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years. Better than Wall Street was the source of their success? Not surprising. The list of the companies that made the leap to greatness includes the likes of General Electric, Intel, 3M, and Caterpillar, to name a few. But what about the companies that failed to make the leap from good to great? What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

New York Times Bestseller. "A superb book. . . . [Lewis] makes Silicon Valley as thrilling and intelligible as he made Wall Street in his best-selling Liar's Poker."—Time In the weird glow of the dying millennium, Michael Lewis set out on a safari through Silicon Valley to find the world's most important technology entrepreneur. He found this in Jim Clark, a man whose achievements

include the founding of three separate billion-dollar companies. Lewis also found much more, and the result—the best-selling book The New New Thing—is an ingeniously conceived history of the Internet revolution.

Jim Clark was arguably the best driver the world has seen and certainly one of the most versatile. He died when he was just 33 but by then the Scottish farmer's lad had surpassed the Grand Prix victory total of the legendary Juan Manuel Fangio. Even Fangio himself said he was the best ever driver. Clark started 73 races and won 25. He was World Champion in 1963 and 1965 and set Ford on its path to fame by pushing the Cosworth DFV engine to victory on its first F1 outing. He was also the first non-American to win Indianapolis 500.No one understands Jim Clark better than Eric Dymock, fellow Scot, long-time reporter on the racing scene at its highest level. Dymock has brought his definitive biography up to date by including in it what some contemporary heroes have to say about the man, and many previously unpublished photographs. , Stunning production - virtual collector's edition, Endorsements from Dan Gurney and David Coulthard., Contains 50 new and unpublished photos.

Winning the Indianapolis 500, the greatest spectacle in motorsport, has been a quest for Australians and New Zealanders since the first race in 1911. Seventeen have tried and two have succeeded: Scott Dixon in 2008 and Will Power in 2018. Rupert Jeffkins, Australia's original speed king, entered the first Indy 500 and on his second attempt in 1912 came within five kilometres of victory. He and Italian Ralph De Palma created legend when they pushed their car to the finish line after it blew up while leading. Speed Kings tells Jeffkins' full story for the first time. The lure of the Brickyard, paved with 3.2 million bricks, has drawn champions from both sides of the Tasman. Sir Jack Brabham, his son Geoffrey and grandson Matthew have each tried to win. So have the 'big three' of New Zealand motor racing: Bruce McLaren, Denny Hulme and Chris Amon. Now Scott McLaughlin looks set to become the next driver from down under to chase American motor racing's greatest prize. Indy doesn't offer up victory lightly. Blinding speed - nudging 380 km/h and averaging 280 km/h over 500 miles - makes the Brickyard one of the most precarious racetracks in the world.

Forty-two drivers have died attempting the 500. Speed Kings tells the story of the Australian and New Zealand drivers, team owners, engineers, even commentators who've made the Brickyard their quest.

This is the story of a Grand Prix formula that no British constructor wanted but which became one that they would almost totally dominate. It has remained largely overlooked due to the perception that the cars were underpowered and hence unspectacular. Such a perception ignores the significant technical developments that took place that are now taken for granted, such as monocoque chassis construction. It saw the career of Stirling Moss come to a premature end, but in his absence the rise to prominence of a new breed of British drivers in Jim Clark, Graham Hill and John Surtees. Over 200 photos and contemporary technical material outline the engineering achievements as well as the exploits of the constructors. With a foreword by Raymond Baxter.

Jim Clark shares his experiences as a highly successful film editor at a time when films were a true collaboration of talented individuals.The legendary "Doctor" Clark was the man who could make sick films healthy again. The role of editor in the collective, collaborative process that is the making of any film is massively important but not one that is generally recognized outside the small pond that is the filmmaking community. In this wonderfully engaging memoir, this point becomes steadily obvious, but it is made with subtlety, discretion, and modesty. The book is a must read for anyone who works in the industry, and for anyone who is interested in the art form of cinema, and how much and how many film directors are indebted to you."

F1 Mavericks is the story of the grandest, most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro. The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of a new era of racing. Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda, James Hunt, Bruce McLaren, Jody Scheckter. We'll see and meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rochti, Gordon Murray, and many others. We'll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebar turbochargers, and the Brabham 'fan' suction car. F1 Mavericks is an international story, and includes loads of information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (McLaren, Ligier, Renault), Germany (Porsche, BMW) and the United States (Ferrari, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1 racing—it's all here in F1 Mavericks.

The Legend of the First Super Speedway

Drawing upon a six-year research project at the Stanford University Graduate School of Business, James C. Collins and Jerry I. Porras took eighteen truly exceptional and long-lasting companies and studied each in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from the comparison companies and what were the common practices these enduringly great companies followed throughout their history?" Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the 21st century and beyond.

Since 1950, fifteen Australians and nine New Zealanders have raced in world championship Formula One, the pinnacle of motor racing. Three - Jack Brabham, Denny Hulme and Alan Jones - have won the world title. Two have died in the attempt without ever facing the world championship starters' lights. So few drivers make it to Formula One. Ever fewer succeed in the fastest and most challenging four-wheeled sport of all. Now John Smailes, author of the bestselling Climbing the Mountain, Race Across the World, Mount Panorama and Speed Kings, gives us the definitive story of our involvement with Formula One, from the pioneer days in the aftermath of World War II, to the championship glory of Brabham, Hulme and Jones, the grit and determination of Mark Webber, and Australia's current Formula One star, the irrepressible Daniel Ricciardo, all the way to potential champions of the future like Oscar Piastri. With over 150 stunning photographs, and interviews with drivers past and present, as well as the engineers, managers and team owners behind the scenes, this is the must-have book for every Australian and New Zealand fan of Formula One.

Funny, fierce, and gritty, Bleeding Blue recounts every struggle and success of Wendel Clark's rough-and-tumble journey to becoming one of hockey's greatest heroes. As a young boy growing up in Kelvington, Saskatchewan, Wendel Clark never dreamed of an NHL career. The pro league just seemed too far away from the young man's small-town life in the Prairies. But Wendel had a talent for hockey that was surpassed only by his love for the sport, and it wasn't long before he embarked on a path that would take him away from his hometown to a new life. Wendel honed his talents in cities across western Canada and earned a reputation as a force to be reckoned with on the ice. Drafted by the Toronto Maple Leafs first overall in the 1985 NHL Entry Draft, Wendel burst onto the pro scene and immediately made an impact, all the while staying true to his roots. As he physical from the players around him, Wendel steadily matured into a respected leader. He soon assumed the mantle as the Leafs captain, and his willingness to lay it all on the line transformed him into a player who could inspire courage in his teammates and fear in his opponents in equal measure. The future seemed limitless for the young star. But just as Wendel's talents were set to peak, everything unraveled. Years of no-holds-barred, physical play were taking their toll, and soon his greatest competitor wasn't anyone on the ice, but his own body. Every movement brought agony, every shift was a challenge, and every game meant the decision to keep fighting. But as Wendel's body broke down, his resolve only grew. Determined to succeed no matter what the cost, Wendel set out on a course that would allow him to keep doing what he loved and that would turn him into one of the most beloved hockey players of all time. Emotional and uplifting, Bleeding Blue is the story of a man who refused to say no, who wore his heart on his sleeve, and who would do anything to keep going, even when everything told him to quit.

This book is the first practical, hands-on guide that shows how leaders can build psychological safety in their organizations, creating an environment where employees feel included, fully engaged, and encouraged to contribute their best efforts and ideas. Perhaps the leader's most challenging task is to increase intellectual friction while decreasing social friction. When this doesn't happen and it becomes emotionally expensive to say what you truly think and feel, that lack of psychological safety triggers the self-censoring instinct, shuts down learning, and blocks collaboration and creativity. Timothy R. Clark, a former CEO, Oxford-trained social scientist, and organizational consultant, provides a research-based framework to help leaders transform their organizations into sanctuaries of inclusion and incubators of innovation. When leaders cultivate psychological safety, teams and organizations progress through four successive stages. First, people feel included and accepted; then they feel safe to learn, contribute, and finally, challenge the status quo. Clark draws deeply on psychology, philosophy, social science, literature, and his own experiences to show how leaders can, and must, set the tone and model the ideal behaviors—as he says, “you either show the way or get in the way.” This thoughtful and pragmatic guide demonstrates that if you banish fear, install true performance-based accountability, and create a nurturing environment that allows people to be vulnerable as they learn and grow, they will perform beyond your expectations.

In the midst of one of the greatest status revolutions in the history of the world, the Internet has become a weapon in the hands of revolutionaries. Old priesthoods are crumbling. In the new order, the amateur is king: fourteen-year-olds manipulate the stock market and nineteen-year-olds take down the music industry.
