An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). For many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scholar, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved math outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids).

draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of science.

teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

With this guide you will gain a better understanding of the ignition components and how the ignition system operates and learn how to quickly determine if your problem is electrical or mechanical. CDI Electronics has been the leader in outboard marine ignition technology since 1982. This technical manual is a step by step guide to your outboard ignition for the following manufacturers: General Troubleshooting Information Chrysler/Force Johnson/Evinrude Mercury Tohatsu/Nissan Yamaha Plus DVA and Resistance Charts Provides a manual for the proper care of outboard motors under thirty horsepower made by Chrysler, Kiekhaefer Mercury, and Outboard Marine Corporation This how-to book caters for both the person who buys an old motor to restore and use, and the one who restores for the satisfaction of seeing a vintage piece of machinery in its original condition.
