Revision Revisited LINDA ALLAL* & LUCILE CHANQUOY** *University of Geneva, Switzerland. **UniversityofNantes, France Revision is a fundamental component of the writing process. So fundamental that for some specialists writing is largely a matter of revising, or as Murray (1978) stated, "Writing is rewriting..." (p. 85). Experience with writing does not, however, automatically translate into increased skill in revision. Learning to revise is a lengthy, complex endeavor. Beginning writers do little revision spontaneously and even experienced writers encounter difficulties in attempting to improve the quality of their texts (Fitzgerald, 1987). Although revision has been extensively dealt with in the writing and learning-to write literature, this book proposes to "revisit" theory and research in this area through a series of new contributions. The introduction begins with an overview of what revision encompasses. It then examines two parallel interrogations that under lie the chapters assembled here, namely: (1) What are the implications of research on cognitive processes for instruction in revision? (2) What are the questions raised by instructional research for the investigation of cognitive processes of revision? A final section presents the chapters of this book.

The book includes 35 articles outlining key information that normally could take years for new college students to learn. 30 exercises on topics such as Time Management and Money Management that can be done individually, in small groups in class, or as homework assignments, journal writing prompts, 9 Case Studies, 8 Self Assessments, and assorted FAQs with answers . . . a great tool for generating discussion about how to avoid the obstacles to success many new students encounter, as well as how to establish a foundation for academic success early on in college—Publisher description.

For security reasons, using parallel writing tasks within or across different test administrations is common practice in large-scale language testing. Lack of task comparability would result in unjustified variance in test performance and consequently jeopardize test validity and fairness. Thus, it is crucial for test developers to gather empirical evidence from different aspects to substantiate the fairness argument that scores are consistent and score-based decisions are impartial across parallel tasks. Despite many studies hitherto on writing task comparability, those addressing picture-prompt writing tasks in an integrated manner have remained quite unexplored. Therefore, this book investigates the comparability of five writing tasks with picture prompts randomly assigned across testing occasions in an in-house English proficiency test (EPT) of a comprehensive university from three perspectives—the scores, the texts, and the raters and test takers. Results show that task difficulty is not comparable either in terms of some lexical, syntactic and content features elicited or as judged by raters and test takers, which could be related with topic familiarity and conceptual clarity of the picture prompt. Yet, overall task comparability is achieved in not only final scores but also score distribution and classification accuracy. The findings support the fairness argument for EPT writing and provide theoretical, practical and methodological implications.

The newest addition to the Master Student program provides a collection of contemporary readings for self-reflection and critical thinking. Structured in a way that exposes students to a variety of reading and writing styles, the Master Student Reader excerpts work from a variety of sources including student writing, textbooks, magazines, newspapers, web sites, essays, and speeches. An emphasis on journal writing provides students with a means to self assess, while additional writing requirements—such as persuasive essays, fact or opinion papers, and research papers—help students take a more traditional approach to developing critical-thinking skills. Power Process articles motivate and encourage students to take charge of their college experience. Reflection Questions stimulate in-class discussion and can be used as writing prompts. Writing Assignments get students thinking about audience, purpose, and length of an essay, and help them analyze the information they have learned. Journal Entries (Discovery and Intention Statements) allow students to reflect specifically on their personal feelings, identify new information that they have discovered in the articles, and think about how to apply these ideas in other courses and in life. Mastering Vocabulary prompts students to identify and define new vocabulary words. Additional Activities include exercises for working with classmates, alternative projects and out-of-the-box activities for students to explore their campus.

Janeé Burrows' bestselling *Imaginative Writing: The Elements of Craft* explores the craft of creative writing in four genres: Fiction, Poetry, Drama, and Creative Nonfiction. A trade author as well as a professor of creative writing, Burrows brings her years of teaching and writing to this book. "Try-This" exercises appear throughout each chapter. Provocative and fun, these exercises help writers develop the specific writing skills discussed within the text. "Working toward a draft" exercises encourage writers to develop their ideas into complete drafts. In response to reviewer requests, the preface "Invitation to the Writer" has been expanded into a full chapter. This new chapter introduces writers to important skills such as reading like a writer, journaling, and participating in the writer's workshop. This book offers lots of ideas and encouragement at a great price!

Creating a Survival Toolkit for Students

ABSTRACT: This qualitative research study documents the observed and reported experiences of fourth grade math students and their teacher when math journals are implemented in their curriculum to increase student understanding and motivation to write in math class. In this study, the teacher explored the process of designing journal prompts, establishing a routine, and fostering motivation within the students to adapt to this new classroom routine. The author designed the study so that the students saw a purpose for each prompt, engaged the students in writing and sharing, and provided opportunities for students to work collaboratively using their journal entries. In order to maintain complete journal writing, a connection to content being taught with journal prompts, and assistance when students needed prompting for their entries. The teacher engaged in dialogue with the students through the journals as well as feedback during group observations. The author discovered many of these implementations to be successful for the students in the classroom. Since journaling is a new learning strategy for many of the students, the author explored the impact of journaling on students' learning and writing skills. The author discovered that journaling had a positive impact on students' learning and writing skills. Design assessments that measure and target student learning in both face-to-face and distance learning environments Assessments are the essential link between teaching and learning, yet the assessments used in face-to-face classrooms are not always practical or impactful in remote learning environments. Now that teachers are teaching from a distance, how will you assess what your students have learned? Tapping the expertise of teachers who are successfully engaged in distance learning, The Assessment Playbook for Distance and Blended Learning answers that question. Rich with a wide range of examples, strategies, and assessments that can be leveraged with rigor and fidelity regardless of learning environment, this practical playbook empowers teachers with the decision-making tools needed to gauge the impact of instructional strategies in today's rapidly evolving educational landscape. It features • Assessment cookies," or insights that endure in any distance or hybrid learning environment and can be used to inform assessment decisions, including the understanding that "everything is searchable." • A robust "playlist" of distance learning assessment tools—including universal response, teach-back opportunities, composing, taking action, self-assessment, and peer assessment—that teachers can mix and deploy to match every learning intention. • Information on how to evaluate the impact of your teaching on student learning—and how assessment can guide your teaching moves • Characteristics of formal tools of evaluation, such as tests, longer essays, and performance tasks that teachers can use in distance learning environments to document learning for reporting purposes. Designed properly, assessments implemented through the lens of distance and hybrid learning can yield significant impact for student achievement, both in the pandemic teaching of today, and in the educational contexts of the future.

Write Outside is a handbook for college-level English composition courses. In addition to providing explanations and examples of effective writing strategies, the text includes outdoor activities and writing prompts that bridge and reinforce those key concepts. As one of the best ways to clear our minds and think deeply about our own ideas, being outdoors is intrinsically linked to the basic principles of effective writing. Being outdoors is not only about "unplugging" or taking a break from technology, but also offers students innumerable opportunities to experience a tangible, natural world. The psychological and physiological benefits of sunshine and fresh air cannot be underestimated. Additionally, structured or group-based outdoor activities give students shared, meaningful experiences on which to base their writing. Structured outdoor activities can help students who otherwise do not have an opportunity develop an appreciation for the natural world. The greatest gift simply being outdoors offers is the gift of quiet moments for unbroken thought. What is writing if not the culmination of hours of unbroken thought? In addition to an introduction that defines and offers explanations of paragraphs and essays, the book's contents are divided into three sections based on three core concepts of English composition: Modes of Communication Rhetorical Appeals The Writing Process Each section has been further divided into chapters that can be completed in any order, or the chapters can be used as supplemental readings, assignments, or bridging exercises in coordination with other texts. Key words and phrases that may be unfamiliar to students have been indexed. The outdoor activities suggested in each chapter are based on the idea that active learning practices are an inclusive pedagogy. These practices help students engage with one another, reduce their fears of writing, and increase successful completion of composition courses. The activities are appropriate for most geographical locations at any time of year, and for those working alone or with others. The activities give students opportunities to draw upon their creativity, practice both divergent and critical thinking skills, and collaborate. The activities might culminate in discussions, finished art projects, musical compositions, notes for use in written drafts, group projects, or multimedia presentations. The writing prompts are also broad and can be adapted by faculty in a variety of ways, including assignment length, scope or word count, level of formality, research requirements, and formatting or citation style. The instructions for each writing prompt also leave room for student creativity and individuality. Each chapter's instructions follow the steps in the writing process, which are briefly explained within the instructions and explained in greater detail in the third section of the book. Drafts that stem from the writing prompts might emerge as prewriting exercises, journal entries, graded written assignments, research documents, outlines, speeches, group presentations, blog posts, online discussions, or submissions to publishers. To put it succinctly, the outdoor activities and guided writing prompts are meant to be - all while giving them permission to simply spend time outdoors.
