NCTM's Focus books are designed to show teachers and other educators how to organise mathematics instruction around the Focal Points in the Council's influential Curriculum Focal Points for Prekindergarten through Grade 8 Mathematics. Each book fleshes out the Focal Points with practical strategies and samples of student work. Mathematics instruction based on the Focal Points brings coherence to the curriculum and focusing on fewer topics deepens understanding. This book shows teachers and others how to organise instruction in grade 4 around the three Focal Points that Curriculum Focal Points identifies for this grade level. Practical suggestions support focusing on developing quick recall of multiplication and division facts and fluency in whole-number multiplication, understanding decimals and their connection with fractions and working with area and the areas of two-dimensional shapes.

**We were one family among the many thousands. Mama and Daddy leaving home, coming to the city, with their hopes and their courage, their dreams and their children, to make a better life. When Eloise Greenfield was four months old, her family moved from their home in Parmele, North Carolina, to Washington, D.C. Before Jan Spivey Gilchrist was born, her mother moved from Arkansas and her father moved from Mississippi. Both settled in Chicago, Illinois. Though none of them knew it at the time, they had all become part of the Great Migration. The Earth Dragon Awakes

Not mighty in size, but mighty in resourcefulness and industry, the ant has crawled the earth since prehistoric times. It has dwelt in rainforest tree trunks and acorns of oak trees sidewalks. It has protected forests by capturing insects, cleared weeds away from acacia trees, and by growing gardens has released important nutrients into the soil. Seed lifters, ants have the most advanced brain of all insects! So watch where you step, especially on a warm day: a small but mighty ant may be underfoot.

José was a boy with a song in his heart and a dance in his step. Born in Mexico in 1908, he came into the world kicking like a steer, and grew up to love to draw, play the piano, and took him to faraway places. He dreamed of bullfighters and the sounds of the cancan dancers that he saw with his father. Dance lit a fire in José's soul. With his heart to guide him, he went to New York to dance. He learned to flow and float and fly through space with steps like a Mexican breeze. When José danced, his spirit soared. From New York to lands afar, he is known as the man who gave the world his own kind of dance. ¡OLÉ! ¡OLÉ! ¡OLÉ! Susanna Reich's lyrical text and Raúl Colón's shimmering artwork tell the story of a boy who was determined to make a difference in the world, and did. José! Born to Dance will inspire picture book readers to follow their hearts and live their dreams.
