“ A foundational text for anyone hoping to understand transgender politics and culture in the U.S. today. ” —NPR
Named as one of 100 Best Non-Fiction Books of All Time by Ms. Magazine
Julia Serano shares her experiences and insights—both pre- and post-transition—to reveal the ways in which fear, suspicion, and dismissiveness toward femininity shape our societal attitudes toward trans women, as well as gender and sexuality as a whole. Serano's well-honed

Read Online Julius A Vida Androgens And Anabolic Agents

arguments and pioneering advocacy stem from her ability to bridge the gap between the often-disparate biological and social perspectives on gender. In this provocative manifesto, she exposes how deep-rooted the cultural belief is that femininity is frivolous, weak, and passive. In addition to debunking popular misconceptions about being transgender, Serano makes the case that today's feminists and transgender activists must work to embrace and empower femininity—in all of its wondrous forms.

Books and Pamphlets, Including Serials and Contributions to Periodicals

This book provides an overview of the underlying sex-based and hormone-based differences in immunity, wound healing and pharmacokinetics, while also exploring how pregnancy affects immunity. The second part of the book shows, for the first time in a single volume, the growing number of infectious diseases for which sex and gender differences are noted, identifies common as well as distinct mechanisms mediating these differences and

illustrates how responses to treatments might differ between the sexes. The awareness that males and females differ in their response to specific pathogens as well as to treatments for infectious diseases may yield sex-specific personalized treatments. This book will be of interest to basic scientists and clinicians in the fields of microbiology, immunology and pharmacology. Individuals working in academia, government and industry will also benefit from the information presented.
