Fundamentals of Criminology: New Dimensions delivers a comprehensive and comprehensible introduction to the discipline of criminology. As the title implies, it covers the fundamentals of criminology, including the major theories of crime causation, classic and current empirical tests of those theories, the strengths and weaknesses and the policy implications of each. It also describes the types of crime and provides current rates, trends over time and theoretical explanations for each, as well as a discussion of characteristics of offenders and victims. What sets this book apart from the many other fine criminology textbooks out there is its inclusion of some new dimensions of criminology. The new dimensions in this book include but are not limited to research designs in criminology, new theories of crime causation, crime in different contexts, connections between criminology and criminal justice policy and a number of lingering issues for both disciplines. In combination with the fundamentals, these new dimensions are designed to provide readers with the richest, most complete understanding of what crime is, how much of it there is, what causes it and what do to about it, as well as the ability and desire to pose important questions for the future of both criminology and criminal justice. "The authors have produced a comprehensive, readable, and thoroughly interesting text covering the topic of sociological criminology. Yes, there are a plethora of texts in this area, but Harper and Frailing's addition to the field has a

number of features moving it ahead of the competition. There is in-depth coverage of emerging areas in crime, including cybercrime and human trafficking, as well as an excellent section on how disasters augment the opportunities for crime by hindering capable guardianship. The authors' arguments for evidence-based crime prevention strategies and public policies are compelling. *Fundamentals of Criminology* is worthy of the closest consideration by instructors teaching undergraduate criminology courses." – Jay Corzine, professor of sociology, University of Central Florida

The new edition of this text draws on the most current cases and literature in explicating the juvenile justice system. To date, approaches to understanding serial murder have focused on individual cases rather than the social context in which they occurred. Written by leading criminologists and world experts on serial murder, this book marks a departure by situating nineteenth century serial killer Mary Ann Cotton within the broader social structure. Using archival records of her court appearances, local histories and newspaper articles, it uniquely explores how institutions such as the family, economy and religion shaped the environment she inhabited and her social integration through the roles of wife, mother, worker and criminal. Acknowledging that it takes a particular type of individual to commit serial murder, the book shows that it also takes a particular type of society to enable that murderer to go unseen. As the first work to analyse serial murder through the theoretical framework of institutional criminology and institutional anomie theory, it will equip criminologists with a methodological toolkit for performing institutional analysis.

Complexity theory--which examines the dynamic interactions of parts in a system--has increasingly been used to study human organizations. This is the first book to explore its application to professions in criminal justice and social work. It brings together experts in this emerging theoretical field from a range of different perspectives, providing detailed but accessible discussions of the key issues at hand, including the nature of complex adaptive systems, their application to service delivery, and the efficacy and ethics of criminal justice and social work interventions. Together the contributors demonstrate the usefulness of complexity theory in addressing some of our most significant and intractable social problems.

Hundreds of thousands of the inmates who populate the nation's jails and prison systems today are identified as mentally ill. Many experts point to the deinstitutionalization of mental hospitals in the 1960s, which led to more patients living on their own, as the reason for this high rate of incarceration. But this explanation does not justify why our society has chosen to treat these people with punitive measures. In *Crime, Punishment, and Mental Illness*, Patricia E. Erickson and Steven K. Erickson explore how societal beliefs about free will and moral responsibility have shaped current policies and they identify the differences among the goals, ethos, and actions of the legal and health care systems. Drawing on high-profile cases, the authors provide a critical analysis of topics, including legal standards for competency, insanity versus mental illness, sex offenders, psychologically disturbed juveniles, the injury and death rates of mentally ill prisoners due to the inappropriate use of force, the high level of suicide, and the release of mentally ill individuals from jails and prisons who have received little or no treatment.
