**Airpower remains the cornerstone of NATO's military advantage, so maintaining the ability to win air superiority over peer opponents in a conflict is key to long-term deterrence stability in both Europe and the Pacific. This Whitehall Paper examines the various modernisation and future capability development efforts being undertaken within NATO, and analyses the major threat systems and overall modernisation trends of the West's main peer competitors - Russia and China. These memoirs of the great fellwalker Alfred Wainwright, author of the Pictorial Guides to the Lakeland Fells and many other volumes of walking guides and sketchbooks, are full of his thoughts on life and on his experiences on the fells.

Wainwright writes about his boyhood in Blackburn, his work and interests as a young man, and the visit to the Lake District at the age of 23 which kindled in him a lasting passion for the fells. He reveals how he set about researching and compiling the Pictorial Guides, the labour of love which occupied so many years of his life. For walkers and other lovers of the Lakeland fells, this is a great read.

theory of attacking. Methods of attack, selection of a target, timing, contriving a double attack - these are techniques which require a lot of trial and error to master. "Kato's attack and Kill" offers an invaluable shortcut. The author, Kato Honinbo, is known and feared as one of the most aggressive attacking players in modern go and in this book he presents a thorough and practical analysis of all the elements essential for a successful attack. There are a numerous examples from actual play, a problem section, and a selection of Kato's own games which feature attacking and killing large groups. Reading this book will transform your game.

It emphasizes the significance of the spatial changes in soil patterns, the environmental influence on soils, and their temporal changes, but focuses attention on the systematic examination of soil properties and their reciprocal effects. It covers such important topics as the mineral composition of different soils, their organic matter, structure and porosity, chemical make-up and mechanical properties.*

This collection, which won the 2015 Costa Poetry Award, is an exhibition of the Dundee-born poet's stunningly accomplished adoption of the sonnet's ancient structure. This collection from Don Paterson, his first since the Forward Prize-winning *Rain* in 2009, is a series of forty luminous sonnets. Some take a traditional form, while others experiment with the reader's conception of the sonnet, but they all share the lyrical intelligence and musical gift that has made Paterson one of our most celebrated poets.

Addressed to friends and enemies, the living and the dead, children, musicians, poets, and dogs, these poems are as ambitious in their scope and tonal range as in the breadth of their concerns. Here, voices call home from the blackout and the airlock, the storm cave and the sance, the coal shed, the war, the highway, the forest, and the sea. These are voices frustrated by distance and darkness, which ring with the "sound that fades up from the hiss, / like a glass some random downdraught had set ringing, / now full of its only note, its lonely call." In 40 Sonnets, Paterson returns to some of his central themes—contradiction, strangeness, tension and transformation, the dream world, and the divided self—in some of the most powerful and formally assured poems of his career.

Building on their breakthrough bestsellers *Lean Software Development* and *Implementing Lean Software Development*, Mary and Tom Poppendieck's latest book shows software leaders and team members exactly how to drive high-value change throughout a software organization—and make it stick. They go beyond generic implementation guidelines, demonstrating exactly how to make lean work in real projects, environments, and companies. The Poppendiecks organize this book around the crucial concept of frames, the unspoken mental constructs that shape our perspectives and control our behavior in ways we rarely notice. For software leaders and team members, some frames lead to long-term failure, while others offer a strong foundation for
