Exercise twice each day for 45 minutes - it doesn't matter what the exercise is but one of these sessions must to be outdoors. Drink 4 litres of water per day. Pick a diet or eating plan and stick to that plan. You don't necessarily have to count calories but be intelligent - no chocolates, no cake, no soft drinks, and NO ALCOHOL (this is the one I'll struggle with the most). Read a minimum of 10 pages every day of growth mindset material or self-help book. No fifty shades of grey content! stick to real life material to work on your mindset. Take one progress photo each day - even though this is more of a mental challenge, the byproduct will be a physical change at the end of the 75 days.

Finally, the solution to the #1 reason we don't exercise: time. Everyone has one minute. A decade ago, Martin Gibala was a young researcher in the field of exercise physiology—with little time to exercise. That critical point in his career launched a passion for high-intensity interval training (HIIT), allowing him to stay in shape with just a few minutes of hard effort. It also prompted Gibala to conduct experiments that helped launch the exploding science of ultralow-volume exercise. Now that he's the worldwide guru of the science of time-efficient workouts, Gibala's first book answers the ultimate question: How low can you go? Gibala's fascinating quest for the answer makes exercise experts of us all. His work demonstrates that very short, intense bursts of exercise may be the most potent form of workout available. Gibala busts myths ("it's only for really fit people"), explains astonishing science ("intensity trumps duration"), lays out time-saving life hacks ("exercise snacking"), and describes the fascinating health-promoting value of HIIT (for preventing and reversing disease). Gibala's latest study found that sedentary people derived the fitness benefits of 150 minutes of traditional endurance training with an interval protocol that involved 80 percent less time and just three minutes of hard exercise per week. Including the eight best basic interval workouts as well as four microworkouts customized for individual needs and preferences (you may not quite want to go all out every time), The One-Minute Workout solves the number-one reason we don't exercise: lack of time. Because everyone has one minute.

Do you lack confidence, grit, endurance, fortitude, self-esteem and all the other things that don't just make someone great, but successful in everything they do? What if you could completely transform yourself into someone who could do anything? I'm not talking about the change that happens for a week or a month or a year...but for your whole life? What would that legitimately and realistically be worth to you? Everybody tries to tell themselves that they are "special" or "great"...but it's just talk. It's not reality. This book tells you how to do that. It doesn't cost anything to execute this program...but it ain't free. I guarantee if you do exactly as I tell you to do it with no compromises and zero substitutions...you and your life will never be the same. -Andy Frisella

A revolutionary guide to acknowledging fear and developing the tools we need to build a healthy relationship with this confusing emotion—and use it as a positive force in our lives. We all feel fear. Yet we are often taught to ignore it, overcome it, push past it. But to what benefit? This is the essential question that guides Kristen Ulmer's remarkable exploration of our most misunderstood emotion in *The Art of Fear*. Once recognized as the best extreme skier in the world (an honor she held for twelve years), Ulmer knows fear well. In this conversation-changing book, she argues that fear is not here to cause us problems—and that in fact, the only true issue we face with fear is our misguided reaction to it (not the fear itself). Rebuilding our experience with fear from the ground up, Ulmer starts by exploring why we've come to view it as a negative. From here, she unpacks fear and shows it to be just one of 10,000 voices that make up our reality, here to help us come alive alongside joy, love, and gratitude. Introducing a mindfulness tool called "Shift," Ulmer teaches readers how to experience fear in a simpler, more authentic way, transforming our relationship with this emotion from that of a draining battle into one that's in line with our true nature. Influenced by Ulmer's own complicated relationship with fear and her over 15 years as a mindset facilitator, *The Art of Fear* will reconstruct the way we react to and experience fear—empowering us to easily and permanently address the underlying cause of our fear-based problems, and setting us on course to live a happier, more expansive future.

*This book examines the phenomenon of 'digital guru media' (DGM), the self-styled online influencers, life coaches, experts and entrepreneurs who post on the themes of wellness, health and fitness. It opens up new perspectives on digital leisure and internet celebrity culture, and asks important questions about the social, cultural and psychological implications of our contemporary relationship with digital media. Drawing on cutting-edge social theory, the book explores a wide range of contexts in which DGM intersects with digital leisure, from the health-related learning of young people to the 'clean eating' movement, to the online lives of fitness professionals. It asks if digital and social media are problematic per se and explores the problems a turn to the Internet could be revealing about the lack of real-world or analogue support, as well as potential solutions, for our wellness, health and fitness needs and wants. Bringing together innovative, multi-disciplinary perspectives, this book is fascinating reading for anybody with an interest in leisure studies, media studies, cultural studies, sociology, or health and society.*

Research shows that building muscle helps the body burn more calories 24/7 and that resistance training is the most effective way to torch body fat. Yet that message is still lost on many women who fear that weight lifting will make them bulky, turn their skin green, and give them Incredible Hulk muscles like their boyfriends'. Women have more options than step aerobics or running on a treadmill to shed pounds: They can weight-train in a very specific manner designed to make the most of a woman's unique physiology. Lift to Get Lean is the first beginner's guide to strength training from Women's Health that is written specifically for women by a woman. Holly Perkins is a certified strength and conditioning specialist (CSCS) who has been teaching the fat-burning secrets of weight training exclusively to women for more than 20 years. Perkins doesn't follow men's rules when it comes to building muscle. Lift to Get Lean delivers a three-step system: Technique, Movement Speed, and the Last 2 Reps Rule, which make all the difference in developing the kind of strong, lean, and sexy body women want. Perkins offers four different 90-day training programs that efficiently build functional strength along with leaner legs, stronger arms, and a sexier butt.
