"All men are born free and equal." Everybody knows about the Founding Fathers and the Declaration of Independence in 1776. But the founders weren't the only ones who believed that everyone had a right to freedom. Mumbet, a Massachusetts slave, believed it too. She longed to be free, but how? Would anyone help her in her fight for freedom? Could she win against her owner, the richest man in town? Mumbet was determined to try. Mumbet's Declaration of Independence tells her story for the first time in a picture book biography, and her brave actions set a milestone on the road toward ending slavery in the United States.

Modern Consumer Law is a lively, concise, problem-focused text on contemporary consumer law. It is the only text on the market conceptualized after Dodd-Frank and its creation of the Consumer Financial Protection Bureau. The book takes a functional approach to consumer law, looking at types of transactions such as mortgages as well as kinds of laws such as disclosure rules. It examines core theoretical questions in an accessible way, revealing consumer law as a series of statutes built on the common law foundations of contract and tort. Organized into 28 class-sized assignments, the book is easy to adapt to a teacher's preferences in terms of focus and class credits. The problems provide students with the opportunity to apply statutes to realistic situations and ask them to consider the perspectives of consumers, businesses, and lawmakers. Katherine Porter is a national expert in consumer law and a co-author of Wolter Kluwer's The Law of Debtors and Creditors.

Aircraft Communications Addressing and Reporting System (ACARS) is a digital datalink system for transmission of short, and relatively simple messages between aircraft and ground stations using the airband VHF radio link. The message protocol was designed by Aeronautical Radio Incorporated (ARINC) to replace their VHF voice service and deployed in 1978 using telex type format. SITA, a multinational information technology company, later augmented their worldwide data network by adding ground radio stations to provide ACARS service.

Learn the psychological constrictions of attention, perception, memory, disposition, motivation, and social influence that determine whether customers will be receptive to your digital innovations. Bottlenecks: Aligning UX Design with User Psychology fills a need for

entrepreneurs, designers, and marketing professionals in the application of foundational psychology to user-experience design. The first generation of books on the topic focused on web pages and cognitive psychology. This book covers apps, social media, in-car

infotainment, and multiplayer video games, and it explores the crucial roles played by behaviorism, development, personality, and social psychology. Author David Evans is an experimental psychology Ph.D. and senior manager of consumer research at Microsoft who recounts

high-stakes case studies in which behavioral theory aligned digital designs with the bottlenecks in human nature to the benefit of users and businesses alike. Innovators in design and students of psychology will learn the psychological processes determining users'

perception of, engagement with, and recommendation of digital innovations. Examples of interfaces before and after simple psychological alignments that vastly enhanced their effectiveness. Strategies for marketing and product development in an age of social media and

behavioral targeting. Hypotheses for research that both academics and enterprises can perform to better meet users' needs. Who This Book Is For. Designers and entrepreneurs will use this book to give their innovations an edge on what are increasingly competitive platforms

such as apps, bots, in-car apps, augmented reality content. Usability researchers and market researchers will leverage it to enhance their consulting and reporting. Students and lecturers in psychology departments will want it to help land employment in the private sector.

Praise: "Bottlenecks" is a tight and eminently actionable read for business leaders in startups and enterprises alike. Evans gives us a rich sense of key psychological processes and even richer examples of them in action." - Nir Eyal, Author of Hooked: How to Build Habit-

Forming Products "Clients frequently ask our UX researchers and designers for deeper truths about why certain designs work and others fail. Bottlenecks offers practical explanations and evidence based on the idea that human cognition did not begin with the digital age." -

John Dirks, UX Director and Partner, Blink UX "Bottlenecks brings together two very important aspects of user experience design: understanding users and translating this into business impact. A must-read for anyone who wants to learn both." - Josh Lamar, Sr. UX Lead,
