Life histories are a form of
contemporary social history and convey
important messages about identity,

cosmology, social behaviour and one's place in the world. This first-person oral history documents a period of profound social change through the lens of Sti'tum'atul'wut--also known as Mrs. Ruby Peter--a Cowichan elder who made it her life's work to share and safeguard the ancient language of her people: Hul'q'umi'num'. Over seven decades, Sti'tum'atul'wut helped thousands of people to develop a basic knowledge of the Hul'q'umi'num' language. She contributed to dictionaries and grammars, and helped assemble a valuable corpus of stories, sound and video files--with more than 10,000 pages of texts--that has been described as "a treasure of linguistic and cultural knowledge." Without her passion, commitment and expertise, this rich legacy would not exist for future generations. In 1997 Vancouver

Island University anthropologist Helene Demers recorded Sti'tum'atul'wut's life stories. The result is rich with family and cultural history--a compelling narrative of resistance and resilience that promises to help shape progressive social policy for generations to follow. Here is the Holy Grail of success philosophy: Napoleon Hill's complete and original formula to achievement presented in fifteen remarkable principles--now newly designed in a handsome single-volume edition. This is the master volume of the extraordinary work that began the career of Napoleon Hill. Originally produced by Hill in 1928 as an eight-book series, *The Law of Success* is now available to contemporary readers in a single edition, redesigned and reset for ease of reading. *The Law of Success* is the golden key to Hill's

thought--his complete and unabridged mind-power method for achieving your goals. After interviewing dozens of industrialists, diplomats, thought leaders, and successful people from all walks of life, the young Hill distilled what he learned into these fifteen core lessons, organized with an introductory chapter, 'The Master Mind,' that serves as a primer to Hill's overall philosophy. As Hill saw it, these lessons work as a "mind stimulant" that "will cause the student to organize and direct to a DEFINITE end the forces of his or her mind, thus harnessing the stupendous power which most people waste." While future classics of Napoleon Hill would inspire millions of readers, there is no substitute for The Law of Success for everyone who wants to grasp the full range of Hill's ideas and tap their transformative power.

Mega Memory [sound recording].

The New York Times bestselling authors of Switch and Made to Stick explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four

Online Library Kevin Trudeaus Mega Memory

elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why “we feel most comfortable when things are certain, but we feel most alive when they’re not.” And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can

change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world's youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? The Power of Moments shows us how to be the author of richer experiences. Introducing the first book in a powerful new series, The Tarcher Master Mind Editions: Essential Books of Inspiration, Instruction, and Motivation. What mind can conceive, man can achieve. Our decisions impact every area of our lives.

Making better decisions means living a better life. But how can we develop the habit of making great decisions? Every noteworthy achievement the world has ever seen was born with a single thought; and every great man who ever lived has been a man of decision.

Raymond Charles Barker's The Power of Decision reveals this principle of success and illustrates the process of choice that all of us must take-and that all of us are capable, this very second, of taking-to change our lives and make our dreams come true. Indecisive people are failure prone, and Dr. Barker examines this basic truth while exploring the decision-making process in the individual, and the role of the subconscious mind in either abetting or thwarting each of our conscious decisions. He provides specific steps to shift the balance of decision-making

your body as you work on learning German. And much, much more ... These techniques have been used by real language learners, most of whom previously considered themselves owners of a "bad memory" to make real strides in acquiring German. Don't worry! None of these techniques are rocket science. Frankly, if you can memorize a short email address or the name of a movie, then you can use this system to memorize a language as rich and diverse as German. Plus, everything you'll learn in this book applies to every other language that shares the same

In a few decades, that America will be gone forever. In its place will arise a country unrecognizable to our parents. This is the thrust of Pat Buchanan's *Suicide of a Superpower*, his most controversial and thought-provoking book to date. Buchanan traces the disintegration to three historic changes: America's loss of her cradle faith, Christianity; the moral, social, and cultural collapse that have followed from that loss; and the slow death of the people who created and

Military Intelligence. This is the story of the defeat of Soviet Russia's forces by a guerrilla force known as the Mujahideen, heavily backed by Pakistan and the USA. The Mujahideen paved the way for the Taliban regime, to exist having all but defeated the Russian Army in the late 80's. The author, Brigadier Mohammad Yousaf, was head of the Afghan Bureau of Pakistan's Inter-Service Intelligence and as such was effectively the Mujahideens commander-in-chief. He controlled the flow of thousands of tons of arms across Pakistan and into its occupied neighbour, arms that were bought with CIA and Saudi Arabian funds from the USA. Do you think you have a "bad memory"? Impossible, says Kevin Trudeau, the world's foremost authority on memory improvement training. There are no bad memories, only untrained memories. In order to release our natural memory, Trudeau says, we just need to learn to retrieve what we already know. As founder of the American Memory Institute, Kevin Trudeau has already helped more than one million people do just that. Each Mega Memory lesson in this book takes no more than thirty minutes per day and uses pictures, rather than the laborious word-association techniques of other memory systems, to activate our inborn memory. With this easy-to-follow system, you'll be able to instantly remember names, phone numbers, addresses, financial data, speeches, and
