This book contains the refereed proceedings of the 17th International Conference on Agile Software Development, XP 2016, held in Edinburgh, UK, in May 2016. While agile development has already become mainstream in industry, this field is still constantly evolving and continues to spur an enormous interest both in industry and academia. To this end, the XP conference attracts a large number of software practitioners and researchers, providing a rare opportunity for interaction between the two communities. The 14 full papers accepted for XP 2016 were selected from 42 submissions. Additionally, 11 experience reports (from 25 submissions) 5 empirical studies (out of 12 submitted) and 5 doctoral papers (from 6 papers submitted) were selected, and in each case the authors were shepherded by an experienced researcher. Generally, all of the submitted papers went through a rigorous peer-review process.

IT services are prevalent throughout virtually all businesses. Most enterprises and many government functions are totally dependent upon reliable and responsive IT services to underpin vital business, community and social functions. IT services have become mainstream and managing them to deliver value it the core message of ITIL V3, and the emphasis in ITIL V3 on service catalogue management is a direct result of the growing requirement for business and IT to work together sharing data, information and knowledge about demand for services, service capabilities and patterns of business activity. The Service Catalogue Management process is now a very important management field complete with its own terminology and vital concepts. This study guide outlines the concepts and principles underlying the service catalogue; discusses a project plan approach and reporting considerations; describes the value of a sound business case and the key relationships and touch points in the service catalogue management process.
