This is an explicit and detailed guide, an intelligent "how-to" book for professionals. It lays the groundwork and creates context by exploring essential concepts, defines terms that may be new or unfamiliar, and then moves forward with practical software techniques. All the while it is building on the existing knowledge and experience of its professional design audience. Taking Your Talent to the Web is based on the Populi Curriculum in Web Communications Design, developed by Jeffrey Zeldman in cooperation with Populi, Inc., (www.populi.com) and the Pratt Institute. The book's purpose is to guide traditional art directors and print designers as they

was not simply to summarize currently available CT imaging techniques but also to provide clinical perspectives, advances in hybrid technologies, new applications other than medicine and an outlook on future developments. Major experts in this growing field contributed to this book, which is geared to radiologists, orthopedic surgeons, engineers, and clinical and basic researchers. We believe that CT scanning is an effective and essential tools in treatment planning, basic understanding of physiology, and and tackling the ever-increasing challenge of diagnosis in our society.

This riveting and uplifting memoir by Vanessa O ' Brien, record-breaking American-British explorer, takes you on an unexpected journey to the top of the world ' s highest mountains. Long before she became the first American woman to summit K2 and the first British woman to return from its summit alive, Vanessa O ' Brien was a feisty suburban Detroit teenager forced to reinvent her world in the wake of a devastating loss that destroyed her family. Making her own way in the world, Vanessa strove to reach her lofty ambitions. Soon, armed with an MBA and a wry sense of

humor, she climbed the corporate ladder to great success, but after the 2009 economic meltdown, her career went into a tailspin. She searched for a new purpose and settled on an unlikely goal: climbing Mount Everest. When her first attempt ended in disaster, she trudged home, humbled but wiser. Two years later, she made it to the top of the world. And then she kept going. Grounded by a cadre of wise-cracking friends and an inimitable British spouse, Vanessa held her own in the intensely competitive world of mountaineering, summiting the highest peak on every continent,

and skiing the last degree to the North and South Poles. She set new speed records for the Seven Summits, receiving a Guinness World Record and the Explorers Grand Slam, and finally made peace with her traumatic past. During her attempt on K2, she very nearly gave up. But on the “savage mountain,” which kills one out of every four climbers who summit, Vanessa evolved from an adventurer out to challenge herself to an explorer with a high-altitude perspective on a changing world—and a new call to share her knowledge and passion across the globe. Told with heart and

Following a deadly car crash, small-town lawyer Lance Cooper risked everything to battle one of the most powerful auto corporations in the world to get justice for a young woman. A fast-paced, journalistic account of tragedy turned to triumph, despair to hope, Cobalt Cover-Up is an inspirational, thoroughly compelling, and victorious read. In the midst of his own family struggles, small-town Georgia lawyer Lance Cooper agreed to defend Ken and Beth Melton and investigate the deadly accident that killed their daughter Brooke after she inexplicably lost control of her Chevy Cobalt. But what started as a heartbreaking yet all too common lawsuit quickly escalated into a David vs. Goliath case when

Cooper discovered shocking evidence that General Motors concealed an ignition switch defect for nearly a decade--resulting in 124 deaths, including Brooke's, and risking the lives of millions more. Despite GM's settlement offers and attempts to bury evidence, Cooper refused to back down and worked tirelessly to expose the truth. Locked in a tenacious legal fight, Cooper and the Meltons faced incredible odds--Ken and Beth losing jobs and suffering the difficulty of grieving a beloved daughter during a court battle, Cooper risking his reputation and private practice against the overwhelming opposition from GM's team of lawyers, and both parties facing massive financial strain. Yet, in the relentless pursuit for justice and to protect future innocent lives, this small-town lawyer and a working-class American

Would life be better without alcohol? It's the nagging question more and more of us are finding harder to ignore, whether we have a "problem" with alcohol or not. After all, we yoga. We green juice. We meditate. We self-care. And yet, come the end of a long work day, the start of a weekend, an awkward social situation, we drink. One glass of wine turns into two turns into a bottle. In the face of how we care for ourselves otherwise, it's hard to avoid how alcohol really makes us feel... terrible. How different would our lives be if we stopped drinking on autopilot? If we stopped drinking altogether? Really different, it turns out. Really better. Frank, funny, and always judgment free, *Sober Curious* is a bold guide to

Drawing on research, expert interviews, and personal narrative, *Sober Curious* is a radical take down of the myths that keep so many of us drinking. Inspiring, timely, and blame free, *Sober Curious* is both conversation starter and handbook—essential reading that empowers readers to transform their relationship with alcohol, so we can lead our most fulfilling lives.

In *Plant Metabolism: Methods and Protocols*, expert researchers in the field present the latest methods on quantitative analysis of plant metabolism. Sleep-wake disorders frequently give rise to severe ailments and varied distresses in a great number of people in the world, disturbing their physical and mental

activities and their social function. Sleep-wake disorders are now classified into a great number of categories according to their clinical features and etiological factors. Patients with sleep-wake disorders are taken care of not only by specialists for such disorders but also by general physicians and specialists of different physical and mental disorders. In the recent years, the nature of sleep and sleep-wake disorders have been intensively studied by investigators belonging to different fields of science including medicine, biology, and psychology in many countries. It is very important for the progress of research that investigators work in

In chassis development, the three aspects of safety, vehicle dynamics and ride comfort are at the top of the list of challenges to be faced. Addressing this triad of challenges becomes even more complex when the chassis is required to interact with assistance systems and other systems for fully automated driving. What is more, new demands are created by the introduction of modern electric and electronic

Web technologies are increasingly relevant to scientists working with data, for both accessing data and creating rich dynamic and interactive displays. The XML and JSON data formats are widely used in Web services, regular Web pages and JavaScript code, and visualization formats such as SVG and KML for Google Earth and Google Maps. In addition, scientists use HTTP and other network protocols to scrape data from Web pages, access REST and SOAP Web Services, and interact with NoSQL databases and text search applications. This book provides a practical hands-on introduction to

these technologies, including high-level functions the authors have developed for data scientists. It describes strategies and approaches for extracting data from HTML, XML, and JSON formats and how to programmatically access data from the Web. Along with these general skills, the authors illustrate several applications that are relevant to data scientists, such as reading and writing spreadsheet documents both locally and via Google Docs, creating interactive and dynamic visualizations, displaying spatial-temporal displays with Google Earth, and generating code from descriptions of data structures to

read and write data. These topics demonstrate the rich possibilities and opportunities to do new things with these modern technologies. The book contains many examples and case-studies that readers can use directly and adapt to their own work. The authors have focused on the integration of these technologies with the R statistical computing environment. However, the ideas and skills presented here are more general, and statisticians who use other computing environments will also find them relevant to their work. Deborah Nolan is Professor of Statistics at University of California, Berkeley. Duncan Temple Lang is

Associate Professor of Statistics at University of California, Davis and has been a member of both the S and R development teams.

This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and
