Provides a country-by-country look at antisemitism, from its pagan beginnings to its recent reemergence in Europe

The Longest Hatred

Spanning nearly three decades, Hidden Heroes gives an insider's view of the modern-day exodus of Soviet Jews from the Soviet Union, a period of Jewish history that has rarely been told and is in danger of being forgotten. This deeply personal narrative explores the grassroots Soviet Jewish emigration movement through the eyes of one of its indefatigable leaders, focusing on the actions of heroic refuseniks in the Soviet Union as well as courageous individuals in the West - described by Natan Sharansky as the "army of students and housewives" who waged the battle to free Soviet Jews. From Russia, Ukraine, and Lithuania to the distant republics of Central Asia, refuseniks come to life, discovering their identity, protesting on the streets, defending themselves in courtrooms, defying jailers in their prison cells, and struggling to survive in Siberian labor camps. This engrossing memoir tells the story of the resistance and moral courage of men and women inside the Soviet Union and of those in the West who relentlessly crusaded on their behalf. A very important memoir.... Pamela portrays many Jewish leaders...from different communities all over the United States, as well as Jewish refuseniks from different places all over the Soviet Union. It is this personal, intimate connection between these two groups that gave inspiration, encouragement, and strength to the people on both sides of the Iron Curtain and made our struggle...so powerful
