India har lenge blitt omtalt som verdens mest folkerike demokrati, men landet utvikler seg nå i en stadig mer autoritær retning. Siden 2014 har det høyrenasjonalistiske partiet BJP og statsminister Narendra Modi sittet ved makten. Med omfattende kunnskap om indisk historie, samfunnsliv og politikk skriver Elisabeth Eide og Terje Skaufjord om bakgrunnen for konfliktene og konsekvensene for folk og land. Den nasjonalistiske hindutva-ideologien, som kombinerer autoritær patriotisme med hard økonomisk liberalisering, vil ha avgjørende betydning for den sekulære statens skjebne. Med utgangspunkt i egne reiser, møter med et mangfold av mennesker og grundig research, fordyper forfatterne seg i det komplekse India, der mangfoldet er truet av hindutva-aktivister med støtte helt opp til regjeringensnivå. Landet har enorme sosiale forskjeller og hatet mot muslimer og kristne øker. Her er militante ku-aktivister og kamp mot såkalt love-jihad, og lavkaster og urfolk som kjemper for anerkjennelse. India – på vei mot hindunasjonalisme skildrer den dramatiske utviklingen i et av verdens viktigste land Elisabeth Eide er forfatter, journalist og professor emerita ved OsloMet. Hun har skrevet flere romaner og en rekke fagbøker, spesielt om internasjonale spørsmål. Terje Skaufjord er pensjonert lektor med historie som hovedfag. Han har siden 1970-tallet skrevet om internasjonale temaer i aviser og tidsskrifter, og hatt et særlig engasjement for afrikanske og asiatiske land. Eide og Skaufjord har bodd, arbeidet og reist mye i India, men også i Afghanistan og Pakistan. Sammen har de skrevet *Pakistan – midt i verden* (2010) og *Afghanistan – ingen fred å få* (2014).

In time for the twentieth anniversary of 9/11, master storyteller Alan Gratz (Refugee) delivers a pulse-pounding and unforgettable take on history and hope, revenge and fear -- and the stunning links between the past and present. September 11, 2001, New York City: Brandon is visiting his dad at work, on the 107th floor of the World Trade Center. Out of nowhere, an airplane slams into the tower, creating a fiery nightmare of terror and confusion. And Brandon is in the middle of it all. Can he survive -- and escape? September 11, 2020, Afghanistan: Reshmina has grown up in the shadow of war, but she dreams of peace and progress. When a battle erupts in her village, Reshmina stumbles upon a wounded American soldier named Taz. Should she help Taz -- and put herself and her family in mortal danger? Two kids. One devastating day. Nothing will ever be the same.

This book considers how a combination of place-based writing and location responsive technologies produce new kinds of literary experiences. Building on the work done in the Ambient Literature Project (2016–2018), this book argues that these encounters constitute new literary forms, in which the authored text lies at the heart of an embodied and mediated experience. The visual, sonic, social and historic resources of place become the elements of a live and emergent *mise-en-scène*. Specific techniques of narration, including hallucination, memory, history, place based writing, and drama, as well as reworking of traditional storytelling forms combine with the work of app and user experience design, interaction, software authoring, and GIS (geographical information systems) to produce ambient experiences where the user reads a textual and sonic literary space. These experiences are temporary,

ambiguous, and unpredictable in their meaning but unlike the theatre, the gallery, or the cinema they take place in the everyday shared world. The book explores the potentiality of a new literary form produced by the exchange between location-aware cultural objects, writers and readers. This book, and the work it explores, lays the ground for a new poetics of situated writing and reading practices.

This book focuses on the geometry creation techniques for use in finite element analysis. Examples are provided as a sequence of fin designs with progressively increasing complexity. A fin was selected as it is a feature widely employed for thermal management. As the content progresses, the reader learns to create or import a geometry into a FEM tool using COMSOL Multiphysics®. The fundamentals may also be applied to other commercial packages such as ANSYS® or Abaqus™. The content can be utilized in a variety of engineering disciplines including mechanical, aerospace, biomedical, chemical, civil, and electrical. The book provides an overview of the tools available to create and interact with the geometry. It also takes a broader look on the world of geometry, showing how geometry is a fundamental part of nature and how it is interconnected with the world around us. Features: Includes example models that enable the reader to implement conceptual material in practical scenarios with broad industrial applications Provides geometry modeling examples created with built in features of COMSOL Multiphysics® v. 5.4 or imported from other dedicated CAD tools Presents meshing examples and provides practical advice on mesh generation Includes companion files with models and custom applications created with COMSOL Multiphysics® Application Builder.

This study gives highly detailed data on the eBook purchasing and use habits of a sample of 70 public libraries. The survey helps its readers to answer questions such as: how much are public libraries spending on eBooks? How much do they spend on specific vendors and publishers such as OverDrive, Baker & Taylor, EBSCO, Recorded Books, Gale and Harper Collins, Penguin/Random House and many others. The study also gives detailed data on the extent that various eBook use and purchasing models account for library eBook spending, providing data on ownership models, pay per view models, subscription models and others. The study also provides data on the growth rate of each type of model. The report also looks at how libraries use public domain eBooks. The study also provides detailed data on the use of eAudiobooks, relating expenditures, growth rates, and the number of titles held. In addition the report looks at the extent to which public libraries are able to make available eBooks for best sellers, and their overall strategy for reconciling their print and eBook collections. The study also looks at the growing use of tablet computers in public libraries, at the uses and abuses of eBook use statistics, use of electronic directories, the direction of eBook prices, and many other issues in public library eBook selection and management.

The electronic Bible is here to stay??packaged in software on personal computers, available as apps on tablets and cell phones.

Increasingly, students look at glowing screens to consult the Bible in class, and congregants do the same in Bible study and worship.

Jeffrey S. Siker asks, what difference does it make to our experience of Scripture if we no longer hold a book in our hands, if we again “scroll” through Scripture? How does the “flow” of electronic Scripture change our perception of the Bible’s authority and significance? Siker discusses the difference made when early Christians adopted the codex rather than the scroll and Gutenberg began the mass production of printed Bibles. He also reviews the latest research on how the reading brain processes digital texts and how churches use digital Bibles, including American Bible Society research and his own surveys of church leaders. Siker asks, does the proliferation of electronic translations reduce the perceived seriousness of Scripture? Does it promote an individualistic response to the Bible? How does the change from a physical Bible affect liturgical practice? His synthesis of the advantages and risks of the digitized Bible merit serious reflection in classrooms and churches alike.
