Franklin's Autobiography has received widespread praise, both for its historical value as a record of an important early American and for its literary style. This work has become one of the most famous and influential examples of an autobiography ever written. This title is based on the *Harvard Classics* edition.

Stephen Pople, one of today's most respected science authors, has created a totally new physics book to prepare students for examinations. Complete Physics covers all syllabuses due to a unique combination of Core Pages and Further Topics. Each chapter contains core material valid for all syllabuses. Further Topics at the end can be selected to provide the right mix of pages for the syllabus you are teaching.
Key Points:
· Totally new book constructed from an analysis of all GCSE Physics syllabuses including IGCSE, CXC, and O'Level
· Sets the traditional principles of physics in a modern and global perspective and uses illustrations with a worldwide context
· Extra topics to give a truly rounded curriculum
· Double-page spread format
· Ideal for those students intending to take physics to a more advanced level

The Big Conservation Lie 'is a wake up call focused on a field that has been 'front and centre' of many people's hearts and minds in recent years; The conservation of Africa's wildlife. It is a pursuit whose power to inspire is only rivalled by it's ability to blind it's audience to reality. This book takes the reader through Kenya's conservation 'industry' and the players therein with all their prejudices, weaknesses and commitment to causes, many of which are indistinguishable from their personalities. It is a call to indigenous Africans to claim their place at the table where the management of their natural resources is being discussed and invites well-meaning donors to look beyond the romantic images and detect the possible role of their money in the disenfranchisement of a people.

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover.
From New York Times bestselling author Diane Chamberlain comes a novel of chilling intrigue, a decades-old disappearance, and one woman's quest to find the truth... "A novel about arts and secrets...grippingly told...pulls readers toward a shocking conclusion."—*People* magazine, **Best New Books North Carolina, 2018**: Morgan Christopher's life has been derailed. Taking the fall for a crime she did not commit, her dream of a career in art is put on hold—until a mysterious visitor makes her an offer that will get her released from prison immediately. Her assignment: restore an old post office mural in a sleepy southern town. Morgan knows nothing about art restoration, but desperate to be free, she accepts. What she finds under the layers of grime is a painting that tells the story of madness, violence, and a conspiracy of small town secrets.
North Carolina, 1940: Anna Dale, an artist from New Jersey, wins a national contest to paint a mural for the post office in Edenton, North Carolina. Alone in the world and in great need of work, she accepts. But what she doesn't expect is to find herself immersed in a town where prejudices run deep, where people are hiding secrets behind closed doors, and where the price of being different might just end in murder. What happened to Anna Dale? Are the clues hidden in the decrepit mural? Can Morgan overcome her own demons to discover what exists beneath the layers of lies?
"Chamberlain, a master storyteller, keeps readers hooked, with a story line that leavens history and social commentary with romance and mystery."—*Lexington Dispatch*

THE SECRET OF WAL-MART'S SUCCESS-AND YOURS
No matter what industry you work in, Wal-Mart influences the way you do business. In providing a new level of convenience, low price, and efficiency, Wal-Mart has substantially changed the rules of the global economy, the customer expectations for every business-and the ways your organization must deliver to keep up. Is it even possible to thrive in a world ruled by this, and other, industry giants? Yes, it is possible—if you're "Wal-Smart," says Bill Marquard. The architect of Wal-Mart's first-ever strategic planning process, Marquard takes you on a rare tour of what's really driving Wal-Mart's success, from its powerful process disciplines to its hidden management "DNA" to its simple, but elegant, productivity loop. Wal-Smart then answers our most gut-wrenching question as business leaders in any industry: Now that we're immersed in the Wal-Mart world, what are we going to do about it? Marquard prescribes the smart choices you need to make in every aspect of your business: as competitors, suppliers, employers, and community members. Throughout are stories of triumph-and of defeat-that distill the critical strategic choices you must make to win in the shadow of any giant of industry. . . . or to become the giant ourselves. Wal-Smart is not just a book about Wal-Mart. It is a book about the principles of leadership in a Wal-Mart economy. It equips leaders, managers, and anyone in the business community with the essential strategies that really work to survive and thrive in this brave, new Wal-Mart world.

Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

Dive into the compelling mystical world of the Healer series by New York Times bestselling author Maria V. Snyder. Laying hands upon the injured and dying, Avry of Kazan absorbs their wounds and diseases into herself. But rather than being honored for her skills, she is hunted. Healers like Avry are accused of spreading the plague that has decimated the Fifteen Realms, leaving the survivors in a state of chaos. Stressed and tired from hiding, Avry is abducted by a band of rogues who, shockingly, value her gift above the golden bounty offered for her capture. Their leader, an enigmatic captor-protector with powers of his own, is unequivocal in his demands: Avry must heal a plague-stricken prince—leader of a campaign against her people. As they traverse the daunting Nine Mountains, beset by mercenaries and magical dangers, Avry must decide who is worth healing and what is worth dying for. Because the price of peace may well be her life... Originally published in 2010

Neil deGrasse Tyson's #1 New York Times best-selling guide to the cosmos, adapted for young readers. From the basics of physics to big questions about the nature of space and time, celebrated astrophysicist and science communicator Neil deGrasse Tyson breaks down the mysteries of the cosmos into bite-sized pieces. Astrophysics for Young People in a Hurry describes the fundamental rules and unknowns of our universe clearly—and with Tyson's characteristic wit, there's a lot of fun thrown in, too. This adaptation by Gregory Mone includes full-color photos, infographics, and extra explanations to make even the trickiest concepts accessible. Building on the wonder inspired by outer space, Astrophysics for Young People in a Hurry introduces an exciting field and the principles of scientific inquiry to young readers.

"These notes are about the process of design: the process of inventing things which display new physical order, organization, form, in response to function." This book, opening with these words, presents an entirely new theory of the process of design. In the first part of the book, Christopher Alexander discusses the process by which a form is adapted to the context of human needs and demands that has called it into being. He shows that such an adaptive process will be successful only if it proceeds piecemeal instead of all at once. It is for this reason that forms from traditional un-self-conscious cultures, molded not by designers but by the slow pattern of changes within tradition, are so beautifully organized and adapted. When the designer, in our own self-conscious culture, is called on to create a form that is adapted to its context he is unsuccessful, because the preconceived categories out of which he builds his picture of the problem do not correspond to the inherent components of the problem, and therefore lead only to the arbitrariness, willfulness, and lack of understanding which plague the design of modern buildings and modern cities. In the second part, Mr. Alexander presents a method by which the designer may bring his full creative imagination into play, and yet avoid the traps of irrelevant preconception. He shows that, whenever a problem is stated, it is possible to ignore existing concepts and to create new concepts, out of the structure of the problem itself, which do correspond correctly to what he calls the subsystems of the adaptive process. By treating each of these subsystems as a separate subproblem, the designer can translate the new concepts into form. The form, because of the process, will be well-adapted to its context, non-arbitrary, and correct. The mathematics underlying this method, based mainly on set theory, is fully developed in a long appendix. Another appendix demonstrates the application of the method to the design of an Indian village.

A Memoir of a Childhood

In a book that is both groundbreaking and accessible, Daniel C. Dennett, whom Chet Raymo of The Boston Globe calls "one of the most provocative thinkers on the planet," focuses his unerringly logical mind on the theory of natural selection, showing how Darwin's great idea transforms and illuminates our traditional view of humanity's place in the universe. Dennett vividly describes the theory itself and then extends Darwin's vision with impeccable arguments to their often surprising conclusions, challenging the views of some of the most famous scientists of our day.

We can't choose what we inherit. But can we choose who we become? In present-day California, Eleanor Bennett's death leaves behind a puzzling inheritance for her two children, Byron and Benny: a black cake, made from a family recipe with a long history, and a voice recording. In her message, Eleanor shares a tumultuous story about a headstrong young swimmer who escapes her island home under suspicion of murder. The heartbreaking tale Eleanor unfolds, the secrets she still holds back, and the mystery of a long-lost child challenge everything the siblings thought they knew about their lineage and themselves. Can Byron and Benny reclaim their once-close relationship, piece together Eleanor's true history, and fulfill her final request to "share the black cake when the time is right"? Will their mother's revelations bring them back together or leave them feeling more lost than ever? Charmaine Wilkinson's debut novel is a story of how the inheritance of betrayals, secrets, memories, and even names can shape relationships and history. Deeply evocative and beautifully written, Black Cake is an extraordinary journey through the life of a family changed forever by the choices of its matriarch.

The Autobiography of Benjamin Franklin

The ebook version does not contain CD.

The late 1690 and early 70s may be remembered as the years of the great bank and other armed robberies in Kenya. This is the true story of one of the participants in some of those robberies, John Kiriamiti. In raw and candid language, Kiriamiti tells the story of how he dropped out of secondary school when he was only fifteen years old, and for a time became a novice pickpocket, before graduating into crimes like car-breaking and ultimately into violent robbery. This spell-binding story takes the reader into the underworld of crime, and it depicts graphically the criminal's struggle for survival against the forces of law. John Kiriamiti was imprisoned on 6 January 1971, after being convicted on a charge of committing robbery at Nairobi on 4 November 1970. Kiriamiti left Nairobi's Maximum Security Prison in August 1984, just five months after the publication of this novel and those following which were a sensation with Kenyan youth in the late 1980s and '90s.

From Onjali Q. Rauf, the award-winning and best-selling author of The Boy at the Back of the Class, comes an incredible story about missing histories and the concept of a universal family, told with humour and heart. Leo and his best friend Sangeeta are the odd ones out in their school. But as Leo's dad is always telling him, it's because they're special. Only thing is, if they're so special, how come they never see anyone who looks like them in their school history books? Then, on a class trip to a nearby cathedral, Leo's attention is drawn to a large marble slab high above the doors of the hall. Right there, bang in the middle of a list of war heroes, Leo finds himself staring at something incredible: his own name. Desperate to know who this other Leo was, the two friends embark on a search. And together, they begin to uncover missing stories from the past, ones which they are determined to put back into their rightful place in the pages of history. Touching on themes of historical racism, The Lion Above the Door shines a light on the stories our history books have yet to contain and the power of friendships that can last through generations. The first edition of this book also contains a special collection of historical photos and stories of real life forgotten heroes from World War Two.
