This volume explores the various strategies, mechanisms and processes that influence rule of law dynamics across borders and the national/international divide, illuminating the diverse paths of

influence. It shows to what extent, and how, rule of law dynamics have changed in recent years, especially at the transnational and international levels of government. To explore these interactive dynamics, the volume adopts an interdisciplinary

approach, bringing together the normative perspective of law with the analytical perspective of social sciences. The volume contributes to several fields, including studies of rule of law, law and development, and good governance;

democratization; globalization studies; neo-institutionalism and judicial studies; international law, transnational governance and the emerging literature on judicial reforms in authoritarian regimes; and comparative law (Islamic,

Strengthening the rule of law has become a key factor for the transition to democracy and the protection of human rights. Though its significance has materialized in international

state-specific studies explores the legal situation of judiciaries in twenty states from North America, over Western, Central and South-Eastern Europe to post-Soviet states and engages in a comparative legal analysis.

judicial independence requires continuous efforts, not only in countries in transition but also in established democracies which are confronted with ever new challenges.
