Upon her arrival in Tirana, Albania, in April 1994, the author found a city unlike any other she had experienced. Rotting trash was piled in the center of the streets, animals shared the rutted roads with cars, and housing, when it could be found, was crowded and crumbling. But she found a people full of optimism, particularly the women. Despite the subservient role forced by tradition on nearly all Albanian women, they have

increasingly become the foundation upon which the country exists. Not only are they responsible for caring for extended households, these women are now also becoming vital parts of the country's economy. Most importantly, however, they maintain a faith in Albania that belies the country's turbulent past and widely predicted future. Through interviews with over 200 Albanian women, this work is an insightful, often poignant, look at a country that remains a mystery to most in the West.

Civil law and common law systems are held to enforce promises differently: civil law, in principle, will enforce any promise, while common law will enforce only those with 'consideration'. In that respect, modern civil law supposedly differs from the Roman law from which it descended, where a promise was enforced depending on the type of contract the parties had made. This 2001 volume is concerned with the extent to which these characterizations are true, and how these and other differences affect the

enforceability of promises. Beginning with a concise history of these distinctions, the volume then considers how twelve European legal systems would deal with fifteen concrete situations. Finally, a comparative section considers why legal systems enforce certain promises and not others, and what promises should be enforced. This is the second completed project of The Common Core of European Private Law launched at the University of Trento.

insight to the motives and factors behind conversion. Drawing on his personal fascinating story as a prosecutor, a defendant, and an observer of the legal process, Paul Butler offers a sharp and engaging critique of our criminal justice system. He argues against discriminatory drug laws and excessive police power and shows how our policy of mass incarceration erodes communities and perpetuates crime. Controversially, he supports jury nullification—or voting “not guilty” out of principle—as a way for everyday people to take a stand against unfair laws, and he joins with the “Stop Snitching” movement, arguing that the

reliance on informants leads to shoddy police work and distrust within communities. Butler offers instead a “hip hop theory of justice,” parsing the messages about crime and punishment found in urban music and culture. Butler’s argument is powerful, edgy, and incisive. The doctrines that collectively comprise the law of contract ostensibly regulate much of the daily lives of citizens, form part of the compulsory diet fed to aspiring lawyers and the concept of a contract is utilized in moral and philosophy. These essays seek to explore the boundaries of contract law, and do so in diverse ways. They explore the issues of general theory,

Low molar mass organic materials and polymers exhibit a range of physical properties that are dependent on their ability to undergo self organisation. The degree and extent of the molecular organisation depends on a complex interplay of inter and intra molecular interactions. Topics include: organic crystals, liquid crystals, plastic crystals, polymer morphology, polymer crystallization, amorphous glassy materials, polymer surfaces, polymer phase separation and structure, and a brief introduction to organisation in naturally occurring materials. This textbook is primarily aimed at polymer and material scientists but would also be of interest to chemists and physicists studying the properties of organic materials. It provides complimentary material for a range of courses in materials science, molecular chemistry and chemical physics.

This study on the potential of law to ensure the social responsibility of a company is an innovative and important study. It is a topical contribution to the sociology of market economies in transition. It is a unique effort to provide detailed practical guidance for the design of the company law in developing economies in general and the new Europe in particular. Christian Joerges, European University Institute Florence, Italy This book provides comprehensive analysis of the recent enlargement of the EU, shedding light on the rationale behind the EU's decisions to enlarge, examining the side effects

these choices have on a range of EU policies and particularly on the effect of the Acquis on candidate countries. Emphasis is placed on the area of company law, which occupies a central part in a country's economic planning and therefore its commercial law. Past enlargements are thoroughly explained and the potential impact of the new political landscape in Europe in the wake of the popular rejection of the European Constitutional Treaty on future enlargements is evaluated. A comparative methodology for commercial law drafting in transition and developing economies is

put forward and the book concludes with a complete draft of a model company law for transition (and developing) economies. The aim is to provide a template for discussion. This book will be of great interest to those interested in considering the influence that the prospect of EU membership has on transition countries in general, the emphasis being on laws vital to emerging market economies, particularly commercial and company law.

From an award-winning civil rights lawyer, a profound challenge to our society's normalization of the caging of human beings, and the role of the legal profession in

perpetuating it Alec Karakatsanis is interested in what we choose to punish. For example, it is a crime in most of America for poor people to wager in the streets over dice; dice-wagerers can be seized, searched, have their assets forfeited, and be locked in cages. It's perfectly fine, by contrast, for people to wager over international currencies, mortgages, or the global supply of wheat; wheat-wagerers become names on the wings of hospitals and museums. He is also troubled by how the legal system works when it is trying to punish people. The bail system, for example, is meant to ensure that people return for court dates. But it has morphed into a way to lock up poor people who have

Download File PDF Kontrata Per Shitblerje

not been convicted of anything. He's so concerned about this that he has personally sued court systems across the country, resulting in literally tens of thousands of people being released from jail when their money bail was found to be unconstitutional. Karakatsanis doesn't think people who have gone to law school, passed the bar, and sworn to uphold the Constitution should be complicit in the mass caging of human beings—an everyday brutality inflicted disproportionately on the bodies and minds of poor people and people of color and for which the legal system has never offered sufficient justification. Usual Cruelty is a profoundly radical reconsideration of the American

Few figures have dominated a nation's destiny as much as Marshal Tito of former Yugoslavia. For nearly thirty years he held together mutually hostile religious groups in a deeply divided country, but his death in 1980 rekindled centuries-old hatreds and by 1992 Yugoslavia ceased to exist. In this revealing biography, Richard West questions the full impact of Tito's reign of power and his implicit responsibility for the ensuing violent, bloody war in Bosnia. 'Excellent ... Through real-life single and multiple case studies, *Learning to Lead Together* addresses how principals and their staffs struggle with the challenge of shared leadership, how they encourage teacher growth and development, and how shared leadership can lead to higher levels of student learning. The cases show how shared leadership, a powerful adaptive change, is socially constructed across contexts and evolves as teachers and principals learn how to work together. The book also illustrates how principal preparation and professional development programs that utilize problem-based learning and provide

This work is an analysis of one of the greatest (and largely forgotten) early Muslim theologians, Abu Mansur Muhammad ibn Muhammad ibn Mahmud al-Hanafi al-Mutakallim al-Maturidi al-Samarqandi (d. 333/944). It establishes evidence of al-Maturidi's profound influence upon Islamic theology during his time and discusses his method, theory of knowledge and theological ideas concerning the world, and the relation of God to man.

Human Rights and Capitalism brings together two important facets of the globalization debate and examines the complex relationship between human rights, property rights and capitalist economies. Human rights issues have become increasingly important in this debate and their place as harbingers of justice or as an instrument of oppression is fiercely contended. Both sides of this issue are considered in the contributions to this book and the complex relationships between human rights, human dignity and capitalist economies are the themes running throughout the work. Appearing at a time when these issues are a subject of extreme controversy, this book

Seasoned trends forecaster and consultant Annie Auerbach takes a fresh look at women's professional lives today by rethinking the 9 to 5 in this "no-nonsense guide to thinking and behaving more flexibly in order to have a happier, better, less frenetic life" (Marie Claire) now widely available for American readers and updated with an author note addressing work in the post-Covid age. The recent coronavirus outbreak has proven what Annie

Auerbach has long championed: working 9-5 in an office doesn't work for most us. It's time to change the rules. We can be efficient and productive when we're allowed the freedom of flexibility—to meet deadlines working during the hours and in the places we choose. But before the coronavirus pandemic, only 47 percent of American workers had access to flexible working options. Annie Auerbach advises major corporations, including Nike, Google, Unilever, and Pepsico. She understands work culture and the needs of employees. The world is changing for working women, but until the recent pandemic,

companies turned a blind eye. Now, it's time to make this change routine. Auerbach reiterates the importance of leaving the office cubicle behind and explores the realities many women experience working from home and the changes to their daily lives, including the trickle-down effects, from emotional labor to balancing childcare and education with work, to even biohacking the female body's unique rhythms. What happens when women embrace the concept of flex? We become more creative, more strategic with our time and energy, and more engaged with our personal lives. As

Download File PDF Kontrata Per Shitblerje

Auerbach makes clear, we reject our toxic culture of presenteeism, time-pressure, and ultimately burnout. It helps us escape the army of octopus lady jugglers, crazed with the exhaustion of "having it all." It allows us to live longer lives more sustainably. It gives us self-worth.

but also with the spirit of the times. The 1960s were good years for singing in praise of equality. The spirit of the present times would probably be better reflected by melodies in admiration of the Federal Reserve System. And yet the technical literature on the evaluation and measurement of economic inequality has grown remarkably over the last three decades. Even as actual economic policies (especially in North America and Europe) have tended to move towards focusing on virtues other than the avoidance of economic inequality, the professional literature on assessing and gauging

economic inequality has taken quite a jump forward. A great many different problems have been addressed and effectively sorted out, and new problems continue to be posed and analyzed. The Contents: A Review Jacques Silber has done a great service to the subject by producing this collection of admirably helpful and illuminating papers on different aspects of the measurement of income inequality. The reach of this collection is quite remarkable. Along with a thorough overview from the editor himself, the major areas in this complex field have been carefully examined and accessibly discussed.

"[This book provides a] history of special prosecutors in American politics. For more than a century, special prosecutors have struck fear into the hearts of presidents, who have the power to fire them at any time. How could this

be, [the author] asks? And how could the nation entrust such a high responsibility to such subordinate officials? [The author] demonstrates that special prosecutors can do much to protect the rule of law under the right circumstances. Many have been thwarted by the formidable challenges of investigating a sitting president and his close associates; a few have abused the powers entrusted to them. But at their best, special prosecutors function as catalysts of democracy, channeling an unfocused popular will to safeguard the rule of law. By raising the visibility of high-level misconduct, they enable the American people to hold the president accountable. Yet, if a president thinks he can fire a special prosecutor without incurring serious political damage, he has the power to do so. Ultimately, [the author] concludes, only

the American people can decide whether the President is above the law."--

For Islamic rulings to fulfill their original purposes of justice, freedom, rights, common good, and tolerance in today's context, Auda presents maqasid as the heart and the very philosophy of Islamic law. He also introduces a novel method for analysis and critique, one that utilizes relevant features from systems theory, such as, wholeness, multidimensionality, openness, and especially,
