KS2 Maths The Important Bits is an excellent quick revision summary of the key topics children need to understand for their Maths SATs. Ideal for final preparation ahead of the exams, this colourful, entertaining book covers the core content of the course in a clear, easy to follow pages that give the key points and nothing more. It is perfect for helping children boost their SATS score right up to the very last minute before the tests.

EUREKA! Challenging Maths and Numerical Reasoning Exam Questions for 11+ Preparation Modern-style, long, multi-step questions Full-length answers with full methods Infoboxes with Tips, Tricks and Traps! Cover the breadth of the KS2 syllabus at the depth expected for 11+ Focus your training time on the harder material Space to show your detailed working Part of an extensive multi-book series Preparing for the 11+ Pupils approaching the 11+ Examination face many challenges, including lack of time, uncertainty over what is required, and an ever-changing and secretive testing environment. Plain "mathematics" questions are progressively being replaced with more demanding "numerical reasoning" questions. Selective schools are increasingly interested in not only rote recall of methods but also the ability to understand questions expressed in prose and skillfully apply (sometimes several) mathematical principles to arrive at an answer. The Eureka! 11+ Challenging Maths and Numerical Reasoning series of books to provide focused preparation for pupils and their busy parents. Questions are expressed in words, with the pupils learning the habit of extracting the relevant numbers and key facts. Most questions are multi-part, reflecting the trend in examinations to challenge pupils skills at progressively higher levels as the question unfolds. These questions are the upper echelon of what is tested at 11+. Although they need only Key Stage 2 concepts, they are challenging because they require good command of multiple skills simultaneously. Pupils, and perhaps even parents, will find very few of these questions to be very easy. Thankfully, the real exam will contain many easier questions, but preparation time is best spent on those which present greater challenges and therefore more learning opportunities. When answering the questions Set yourself a target, e.g. "3 questions in half an hour" Write down clearly your steps of working in full to make checking easier Go through the answers soon after doing the questions Do not be sad if you have made mistakes: learn from them Many questions cover areas where even strong pupils are prone to errors Watch out for the Traps described Incorporate the Tips into your methods in future See if the Method suggested is quicker or less open to error than yours For any examination, diligent practice, carefully analysing errors, mulling over methods, and developing and testing your own preferred approaches pay enormous dividends.

Teaching for Mastery

A brand new version of the best-selling enquiry desk reference text, Know it All, Find it Fast, specifically designed for those working with children and young people in schools, public libraries and at home. Including an invaluable overview of the education system and the school curriculum as well as a comprehensive listing of useful resources by topic, this A-Z covers school subjects from science and maths to reading and literacy, and more general themes such as children's health, wellbeing and hobbies. Each topic is broken down into useful sections that will help to guide your response; Typical questions outline common queries such as 'Have you got any information about volcanoes?' Considerations provides useful hints and tips i.e. 'Geography now encompasses not only physical and human geography but also environmental geography, social geography, geology and geopolitics.' Where to look lists relevant printed, digital and online resources with useful annotations explaining their scope and strengths Readership: This is the must-have quick reference tool arming librarians and teachers with the knowledge to deal with any queries thrown at them from children and young people as well as their parents and caregivers. It will also be a handy reference for parents and anyone working with children and young people in other organizations such as homework clubs and youth workers.

When it comes to getting the best results, practice really does make perfect! Matched to the requirements of the National Curriculum, this KS2 Maths Practice Workbook contains practice questions for every topic. Based on new research that proves repeated practice is more effective than repeated study, this book is guaranteed to help improve performance in tests and assessments. - Questions for every topic organized into three levels of increasing difficulty - Progress tests throughout the book for ongoing assessment - Children can record their results and track their own progress - Pull-out answer section included

Prepare with confidence for the end of year SATs tests with Scholastic National Curriculum Tests. Scholastic's practice tests are fully in line with the Year 2 and Year 6 SATs Tests Each book contains two complete practice tests and a guidance and mark scheme. These practice tests have a similar look to the real test, to help familiarise children with both the content and format of these tests. The guidance and mark scheme provides advice for parents and carers on how to use the tests and how to support children in preparing for them. A hilarious reeducation in mathematics-full of joy, jokes, and stick figures-that sheds light on the countless practical and wonderful ways that math structures and shapes our world. In Math With Bad Drawings, Ben Orlin reveals to us what math actually is; its myriad uses, its strange symbols, and the wild leaps of logic and faith that define the usually impenetrable work of the mathematician. Truth and knowledge come in multiple forms: colorful drawings, encouraging jokes, and the stories and insights of an empathetic teacher who believes that math should belong to everyone. Orlin shows us how to think like a mathematician by teaching us a brand-new game of tic-tac-toe, how to understand an economic crises by rolling a pair of dice, and the mathematical headache that ensues when attempting to build a spherical Death Star. Every discussion in the book is illustrated with Orlin's trademark "bad drawings," which convey his message and insights with perfect pitch and clarity. With 24 chapters covering topics from the electoral college to human genetics to the reasons not to trust statistics, Math with Bad Drawings is a life-changing book for the math-estranged and math-enamored alike.

Four Maths test papers in the style and format of the GL Assessment 11 Plus tests used by selective state schools in England. These papers are intended to provide familiarisation and realistic practice ahead of the tests to build confidence and ensure success.

Stimulating Story Writing! Inspiring Children aged 7-11 offers innovative and exciting ways to inspire children to want to create stories and develop their story writing skills. This practical guide offers comprehensive and informed support for professionals to effectively engage 'child authors' in stimulating story writing activity. Packed full of story ideas, resource suggestions and practical activities, the book explores various ways professionals can help children to develop the six key elements of story, these being character, setting, plot, conflict, resolution and ending. All of the ideas in the book are designed to complement and enrich existing writing provision in classrooms with strategies such as role play, the use of different technologies, and using simple open ended resources as story stimuli.

Separated into two sections and with reference to the Key Stage 2 curricula, this timely new text provides professionals with tried and tested strategies and ideas that can be used with immediate effect. Chapters include: • Creating Characters • The Plot Thickens • Inspired Ideas • Resourcing the Story Stimulation This timely new text is the perfect guide for inspiring children aged 7-11 in the classroom and will be an essential resource for teachers and students on teacher training courses.

Revise Ten-Minute Tests are the smart choice for those revising for the Year 6 National Tests.
