In recent years the emphasis has shifted away from a focus on pedagogy (the how of teaching) and towards curriculum (the what of teaching). Ofsted's revised inspection framework reflects this shift, and their plans to -deep dive- into subject areas - meaning that teachers and department heads now need a much greater understanding of curricular structures - leave many educators having to think about their subject in new ways. Luckily for geography teachers, however, bestselling author Mark Enser provides plenty of insightful, subject-specific guidance in this all-encompassing book. Mark explores both the purpose of the geography curriculum and its various applications in practice. He details how teachers can take their students' learning beyond the acquisition of knowledge to transform how they see the world. He also tackles the changing nature of school geography, shares a variety of case studies, and offers his take on how best to facilitate geographical enquiry and fieldwork. The first part of the book considers the issue of purpose by looking at the role of the school in society and then shows the place that geography occupies within it. It also considers the history of the subject so as to help geography teachers better understand where they stand today, and concludes by discussing how the concepts of powerful knowledge and GeoCapabilities can help them find their way again. The second part is a practical guide which illustrates how to put this theory of curriculum purpose into practice. It explores the steps which must be taken to create a powerful geography curriculum by deciding on content and places to be studied, putting the components into a sequence and then using all this to do geography. It will also discuss the extent to which teachers need to consider the future and respond to the concerns of the wider world when planning the curriculum. Suitable for department heads and classroom teachers of geography in secondary schools and subject leads in primary schools. Powerful Geography was Highly Commended in the Geographical Association Awards 2022.

Pupil Book Study is a window into the 'lived experience' of pupils, as opposed to just the observed experience. It is also a mirror in which to reflect professional practice and identify what helps learning, and what hinders it by outlining clear and coherent structures in which to talk with pupils and look at their books.

Pupil Book Study gives headteachers, senior and middle leaders a systematic toolkit to evaluate the impact of the curriculum through studying teaching and learning. Infused with cognitive science research and evidence-informed practice, it offers schools the architecture for excellence; helping remove the risk of making assumptions.

Pupil Book Study is a guide for schools that offers 7 specific and fully exemplified areas to focus quality assurance systems. The keystone between teaching, learning and the curriculum, Pupil Book Study offers schools the tools to explain why things are as they are and presents solutions to the areas that limit or hinder progress.

Schools report that Pupil Book Study has been some of the most powerful and impactful work they have ever undertaken, resulting in positive change. In November 2020, Pupil Book Study was shared with the Deputy Director, Senior HMI and Policy makers at Ofsted.

This workbook supports the new Key Stage 3 Programme of Study for Science, providing focused skills practice for all the topics relevant to students in Year 8. It will test understanding of scientific knowledge and the principles of working scientifically, build scientific vocabulary, and develop relevant comprehension and mathematical skills.
