Kosovo Investment and Business Guide - Strategic and Practical Information

Entertainment-education methods have been used for centuries to impart knowledge, and moral guidance. Today, researchers are discovering the power of entertainment-education strategies to affect the outcomes of socio-political and economic development programs including health and education. Entertainment-education for Health Behaviour Change: and Perspectives in Africa is a collection of essays from some of the leading scholars in entertainment-education, including writers from South Africa, Nigeria, and the United States. Chapters cover a wide range of application and strategies for entertainment-education from mass media campaigns to participatory communication for behaviour change in health interventions including polio eradication and HIV/AIDS. Through reviews of past programs and discussions of areas of potential research, these scholars highlight an emerging approach that is set to change health education and behaviour change strategies around the world. Reviewers Professor Lucia Dura of the University of Texas at El Paso, USA; John Riber of Media Development International, Tanzania; Dr. Akashorun Lekkan, Lagos State University, Ojo, Nigeria; Dr. Julita C. Maradzika, Health Promotion specialist, University of Zimbabwe; Dr. Chinyere Okam, Theatre for Development specialist; and Dr. Okidu Onjefu, Development Communication specialist, Caleb University, Lagos, Nigeria.

A fundamental, reader-friendly guide to evidence-based practice (EBP) for BSN, MSN, and DNP nursing students, *Evidence-Based Practice in Nursing* explains the conceptual underpinnings of EBP and demonstrates how nurses can put EBP concepts into practice. Replete with critical knowledge, skills, tools, and scholarly development to enable nurses to fully and confidently deliver the highest-quality EBP care, this book eschews a one-size-fits-all approach unique systematic guidelines for understanding and applying EBP. Building blocks of information grow progressively more complex to apply to any point along nursing's academic trajectory. Thoughtfully organized to fit a variety of EBP-related course objectives, *Evidence Based Practice in Nursing* easily adapts for standalone EBP courses at any level as well as advanced practice specialty courses that integrate EBP content. This book addresses the needs of all nursing instructors, including those who teach at multiple levels simultaneously. Key content discusses requisite conceptual knowledge of EBP for building clinical decision-making skills; conceptualizing, implementing, and evaluating EBP projects; conducting translational research and quality improvement for implementation and evaluation of EBP; developing leadership and structural empowerment strategies; and analyzing how students at each degree/level work with EBP independently, inter-professionally, and intraprofessionally. Chapters align with AACN essentials. Key Features: Follows a methodical systematic

Entertainment-education for Health Behaviour Change

The dynamism of the Republic of Korea's export-led economy and the recent exceptional growth of the Korean electronics industry are renowned worldwide. The communications revolution is even more remarkable: in the 1980s, Korea's basic telecommunications infrastructure grew faster than that of any other country in the world. The Korean people and industry have embraced the information age with extraordinary speed and adaptability. In this first, comprehensive study, James F. Larson analyses the economic, technological, political, and socio-cultural dimensions of the Korean

communications phenomenon. He examines the reforms which have fostered greater network access and efficiency, and the role of education in the promotion of new technologies. The author discusses the 1988 Olympic Games in Seoul as a catalyst to progress, and the role of new technologies in Korean reunification. James F. Larson offers original documentary data to the case of Korea, and supports his analysis with interviews with Korean leaders from government, industry, research institutes, and academia.

"This synthesis will be of interest to state DOT bridge maintenance and construction engineers; regulators, consultants, and contractors involved with the removal of lead paint from bridges and structures; and structural coatings specialists, chemists, and researchers. This synthesis describes the current state of the practice for the removal of lead-based paint from existing highway steel bridges."--Avant-propos.

This synthesis will be of interest to state department of transportation (DOT) bridge maintenance engineers, coating specialists, chemists, and researchers. Manufacturers and suppliers of corrosion protection products and systems for exposed structural steel on existing bridges will also find it of interest. This synthesis describes current practice regarding maintenance and protection strategies for exposed structural steel on existing bridges. NCHRP Synthesis 251, Lead-Based Paint Removal for Steel Highway Bridges (1997), provides a complementary and more in-depth treatment of maintenance issues involving lead-based paint removal. This report of the Transportation Research Board defines the maintenance

management systems and decision making criteria used by transportation agencies for maintaining exposed bridge steel. Material selection criteria, surface preparation and application practices, quality control and quality assurance programs, and funding mechanisms are discussed in detail. The impact of recent and proposed environmental and worker protection regulations on current practice is reported. Information for the synthesis was collected by surveying state transportation agencies and by conducting a literature search. Responses to the survey, Appendix C to this document, are published on the Internet as NCHRP Web Document 11.

Federally Coordinated Program of Research and Development in Highway Transportation Reflecting current practice with a renewed focus on function-based assessments and evidence-based interventions, Cognitive and Perceptual Rehabilitation: Optimizing Function includes all of the tools you need to make a positive impact on your patients' lives. This clinical resource summarizes, highlights, and constructively critiques the state of cognitive and perceptual rehabilitation. This text helps you enhance your patients' quality of life by promoting improved performance of necessary and meaningful activities, and decreasing participation restrictions.

Evidence-based intervention tables focus on improving daily function through proven methods. Summary tables highlight each assessment's clinical utility and psychometric properties to provide you with the tools you need to choose the best assessment for each patient. An entire chapter on Application of Concepts features five case studies, each discussing background data and medical record review, evaluation findings, assessments, long-term goals, short-term goals, and interventions/functional activities to help you apply the theories and principles from the book to real-world situations. Handy learning aids including Key Terms, Learning Objectives, and Review Questions help you remember important information.
