Why do so many people volunteer to help others in need in society today? What makes people give up the convenience of driving their car to benefit a better environment? And why are citizens, in general, quite prepared to pay taxes to ensure adequate health care, and support for the elderly and unemployed? These are examples of a more fundamental question addressed in this book: why do people cooperate for the welfare of their community, state, or organization?

Cooperation in Modern Society is a unique collection of contributions from internationally reputed scholars across the social sciences.

'This book is a must for anyone involved in organizational coaching' Adrian Moorhouse, Managing Director, Lane4 & Olympic Gold Medallist Coaching the Team at Work, 4e is the result of research over 20 years with practising team coaches and with major corporations around the world. It recognises that in a complex and constantly evolving business and social environment, teams can only keep up if they adapt frequently. But to adapt, they must have clarity about their internal and external systems and how these contribute to or undermine performance. There are multiple aspects of team function that underpins performance - and each influences and is influenced by the others. This revised edition explores the six most

significant aspects: * Purpose and motivation * Systems and processes relating to external stakeholders * Relationships, especially within the team * Systems and processes relating to internal functions (such as quality and decision-making) * Learning (how the team adapts to keep up with the pace of change) * Leadership (how the functions of leadership are exercised within the team) When these aspects are aligned, a team can perform at its best; but when any one or more of the aspects is malfunctioning, the result is underperformance. This book helps team coaches develop their skills to support teams in understanding these complex dynamics and, as a result, in developing more effective ways of working together. Examines how a growing number of corporate boards of

Usaha Mikro, Kecil, dan Menengah (UMKM) merupakan salah satu roda penggerak perekonomian terbesar saat ini di Indonesia. Hal itu terbukti dari kontribusi sektor UMKM yang menyumbang 61,07% dari jumlah Produksi Domestik Bruto Indonesia pada tahun 2018 (Kementerian Koperasi dan UKM, 2020). Oleh karena itu, sudah menjadi hal yang wajar jika saat ini fokus pemerintah adalah mendorong pertumbuhan UMKM mengingat betapa besarnya potensi yang dihasilkan dari sektor ini. Saat ini masih sedikit pelaku UMKM yang telah terdaftar sebagai Wajib Pajak (WP) jika dibandingkan dengan jumlah

unit UMKM yang ada di Indonesia. Selain fokus terhadap aspek perpajakan, kondisi ini tentu membuat pemerintah harus mendampingi UMKM agar mampu bertransformasi menjadi lebih maju agar mampu "naik kelas" dan meningkatkan perekonomian Indonesia. PP 23/2018 merupakan salah satu wujud perhatian pemerintah untuk mendukung perkembangan sektor UMKM. Peraturan tersebut menetapkan perubahan tarif final dari 1% menjadi 0,5%. Selain itu, PP 23/2018 juga menetapkan jangka waktu untuk dapat memanfaatkan tarif final ini. Setelah jangka waktu berakhir, WP harus menggunakan tarif umum. Penggunaan tarif umum secara tidak langsung mengharuskan WP Orang Pribadi untuk belajar membuat pencatatan atau pembukuan, karena pengenaan pajak

penghasilan akan berasal dari laba. Namun, kenyataannya pembukuan masih menjadi salah satu kendala yang dialami oleh para pelaku UMKM khususnya WP Orang Pribadi. Dalam buku ini akan dibahas bagaimana mekanisme pengenaan pajak dengan PP 23/2018 terhadap WP Orang Pribadi, pendapat WP Orang Pribadi mengenai penerapan PP 23/2018, apakah dengan adanya PP 23/2018 membuat WP Orang Pribadi berminat untuk melakukan pembukuan serta apa upaya yang dilakukan oleh WP Orang Pribadi dan pemerintah sendiri untuk memanfaatkan jangka waktu yang diberikan agar WP mempelajari pembukuan. Buku ini dapat memberikan gambaran mengenai keadaan yang sebenarnya dihadapi oleh pelaku UMKM terkait dengan kegiatan

Managers working in today's organizations often focus more on results than on the people who achieve those results. But regularly evaluating the performance of your employees is critical to improving the efficiency and output of your organization. Performance reviews have changed significantly in the past few years. Companies today are looking for the key characteristics, known as competencies, that help the most successful people in their field to be so successful. Managers and employees need to focus on those competencies, especially during performance review discussions.

Competency-Based Performance Reviews offers you a new and more effective way to handle performance reviews and to coach your employees to emphasize the knowledge, skills, and abilities that they have and the organization needs. Most sophisticated U.S. and international employers are using competency-based systems to select, interview, and evaluate the performance of employees. Fortune 500 corporations such as American Express, Anheuser Busch, Coca-Cola, Disney, Federal Express, IBM, Johnson & Johnson, and Pfizer are all looking for specific competencies. This book will give you the guidance you need to: -- Perform competency-based reviews on your employees. -- Help your team get the recognition they deserve in division meetings by providing the evidence to

justify higher performance rankings. -- Develop your own competencies--and those of your employees. -- Coach employees to recognize competency-based accomplishments and advocate for themselves throughout the year. -- Write smarter, targeted competency-based accomplishment statements to use on performance review forms. By putting these competency-based performance reviews into practice, managers can strengthen their organizations, their careers, as well as the careers of their employees. Competency-Based Performance Reviews includes sample phrases to use on reviews, as well as sample accomplishment statements to guide employees to improving and writing their own.

serupa untuk kalangan fiskus:

bagaimana membuat administrator pajak lebih cerdas. Buku ini berusaha

memberikan jawabannya meskipun kemudian didapati bahwa membuat administrasi pajak lebih efektif tidak sederhana mencerdaskan pebayar pajak. Pihak yang disebut terakhir memiliki tujuan yang spesifik: menuntaskan hak dan kewajiban pajak, atau kalau bisa meminimalkan beban pajak sepanjang dimungkinkan undang-undang. Pembentukan administrasi pajak, di sisi lain, tidak bisa hanya dilakukan pada sasaran individual dari perspektif

mikro, melainkan harus mencakup keseluruhan sistem secara komprehensif. Tentu tidak ada niat memandang sebelah mata upaya-upaya pemberdayaan personel aparat pajak di level individual, namun pendekatan makro adalah suatu keniscayaan, bahwa administrasi pajak mesti dilihat secara utuh sebagai institusi, yang di dalamnya manusia adalah salah satu elemen penting. Individu yang baik dan kompeten tidak akan banyak berarti jika

sistem dan institusi tidak kondusif. Lebih dari itu, buku ini menyadari bahwa tema utama reformasi administrasi pajak terlalu kompleks untuk dijawab dengan pendekatan "how to," sehingga pendekatan holistik dan komprehensif mutlak diperlukan. Jadilah buku seperti yang sekarang di tangan Anda dengan cakupan pembahasan sangat luas dalam skala perspektif ruang dan waktu. Sixteenth in a series of annual reports comparing business regulation in 190

economies, Doing Business 2019 measures aspects of regulation affecting areas of everyday business activity. Why do people evade paying taxes? This is the central question addressed in this volume by Robert McGee and a multidisciplinary group of contributors from around the world. Applying insights from economics, public finance, political science, law, philosophy, theology and sociology, the authors consider the complex motivations for not paying

taxes and the conditions under which this behavior might be rationalized. Applying theoretical approaches as well as empirical research, The Ethics of Tax Evasion considers three general arguments for tax evasion: (1) in cases where the government is corrupt or engaged in human rights abuses; (2) where citizens claim inability to pay, unfairness in the tax system, paying for things that do not benefit the taxpayer, excessively high tax rates, or where

taxes are used to support an unpopular war; and (3) through philosophical, moral, or religious opposition. The authors further explore these issues by asking whether attitudes toward tax evasion differ by country or other demographic variables such as gender, age, ethnicity, income level, marital status, education or religion. The result is a multi-faceted analysis of tax evasion in cultural and institutional context, and, more generally, a study in ethical

In the post-Enron climate corporate executives are increasingly pressured to increase productivity and create an ethical, trustworthy organizational climate. 'Total Performance Scorecard' introduces a concept of organizational improvement and change management that combines the Balanced Scorecard model with the learning organization theory. The TPS contains a personal balanced scorecard, which is tied to an organizational balanced scorecard. These scorecards reflect not only performance goals but personal learning and growth goals as well, and the organizational scorecards also address

organizational climate issues. Continuous improvement, change management, 360 degree feedback, and the learning organization are theories that the TPS makes use of in a very straightforward way. If implemented, the TPS enables a company to tie personal goals to organizational goals and tie personal performance to organizational performance, all within a culture that supports integrity, personal growth, learning, and open communication. Tax evasion is a complex phenomenon which is influenced not just by economic motives but by psychological factors as well. Economic-psychological research focuses on individual and social representations of taxation as well as decision-making. In this 2007 book, Erich Kirchler assembles research on tax compliance, with a focus on tax evasion, and integrates the findings into a model based on the interaction climate between tax authorities and taxpayers. The interaction climate is defined by citizens' trust in authorities and the power of authorities to control

taxpayers effectively; depending on trust and power, either voluntary compliance, enforced compliance or no compliance are likely outcomes. Featuring chapters on the social representations of taxation, decision-making and self-employed income tax behaviour, this book will appeal to researchers in economic psychology, behavioural economics and public administration.

The main features of the just society, as they would be chosen by the unanimous, impartial, and fully informed judgment of its members, present a remarkable and simple meaningful structure. In this society, individuals' freedom is fully respected, and overall redistribution amounts to an equal sharing of individuals' different earnings obtained by the same limited 'equalization labour'. The concept of equalization labour is a measure of the degree of community,

solidarity, reciprocity, redistribution, and equalization of the society under consideration. It is determined by a number of methods presented in this study, which also emphasizes the rationality, meanings, properties, and ways of practical implementation of this optimum distribution. This result is compared with the various distributive principles found in practice and in political, philosophical, and economic thinking, with the conclusion that most have their proper specific scope of application. The analytical presentation of the social ethics of economics is particularly

enlightening.

American Development Bank to incorporate capacity-building considerations into water-related projects. The framework and guidelines were tested in four countries with different physical, social and economic environments in Latin America and the Caribbean. Using this framework, it is possible to identify shortcomings in existing water management arrangements and to formulate interventions at and between the constitutional, organizational, and operational levels. To guide the formulation of interventions, an ideal IWRM situation is formulated. Due to the temporal and spatial specificity, a desired IWRM situation is formulated in a process which consists of ten operational steps. This process is based on an extensive consultation and participation of all relevant stakeholders. The fields of interventions concern
