From Wall Street to Harlem, the borough of Manhattan is the setting for all-new stories of mystery, murder, and suspense, presented by best-selling author Mary Higgins Clark and featuring an exclusive Jack Reacher story by Lee Child, as well as other takes from top Mystery Writers of America authors. In Lee Child's "The Picture of the Lonely Diner," legendary drifter Jack Reacher interrupts a curious stand-off in the shadow of the Flatiron Building. In Jeffery Deaver's "The Baker of Bleeker Street," an Italian immigrant becomes ensnared in WWII espionage. And in "The Five-Dollar Dress," Mary Higgins Clark unearths the contents of a mysterious hope chest found in an apartment on Union Square. With additional stories from T. Jefferson Parker, S. J. Rozan, Nancy Pickard, Ben H. Winters, Brendan DuBois, Persia Walker, Jon L. Breen, N. J. Ayres, Angela Zeman, Thomas H. Cook, Judith Kelman, Margaret Maron, Justin

Scott, and Julie Hyzy, Manhattan Mayhem is teeming with red herrings, likely suspects, and thoroughly satisfying mysteries.

An illustrated step-by-step guide to preparing simple Japanese dishes using ingredients found in every Western kitchen teaches budding chefs how to make everything they see in their favorite manga--from rice balls to Japanese-style pizza.

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

***This thought-provoking collection of magical texts from ancient Egypt shows the exotic rituals, esoteric***

**healing practices, and incantatory and supernatural dimensions that flowered in early Christianity. These remarkable Christian magical texts include curses, spells of protection from "headless powers" and evil spirits, spells invoking thunderous powers, descriptions of fire baptism, and even recipes from a magical "cookbook." Virtually all the texts are by Coptic Christians, and they date from about the 1st-12th centuries of the common era, with the majority from late antiquity. By placing these rarely seen texts in historical context and discussing their significance, the authors explore the place of healing, prayer, miracles, and magic in the early Christian experience, and expand our understanding of Christianity and Gnosticism as a vital folk religion. This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical**

**problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.**

**Hockey: Then to WOW! shows readers how the cool sport has evolved from the early days of its 19th century origins to the game as it is today. Using NHL action photographs, illustrations, stories, and trivia, the book is a journey through time both for hockey fans and those new to the game. Kids will learn how basic equipment has changed from a ball to a puck and how the evolution of game strategy has transformed the sport, players, and equipment. Players throughout history are stacked up against each other in every position so fans can dream up the perfect fantasy team with Wayne Gretzky playing alongside Patrick Roy and Stan Mikita. A fun-filled section of the book explores everything fan culture- from the best ice rinks, to the iconic hockey sweater and the hockey haircut along with key aspects of the toughest sport around.**

***Croghan's search for fame and fortune on the seventeenth-century frontier through Dave Thomas's more recent creation of a fast-food empire. Each chapter also addresses important events and transformations in the state's history such as: European settlement; Native American resistance; the creation of territorial and state governments; the development of the state's educational and economic institutions; the disruption created by the Civil War; the struggle of African Americans and women to participate in Ohio's public life; efforts to ameliorate the pernicious effects of industrialization; the negotiation of the state's role in a nation increasingly dominated by the federal government; or the ramifications of de-industrialization and rise of a service economy.***

*This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a*

number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

What would you do if you owed \$20,000? Would you: a) Not tell your parents? b) Stop colouring your hair, having pedicures and buying Gucci? c) Start your own website that asks for money without apology? If you were Karyn Bosnak, you'd do all three... In New York for the first time, with the dream job and the smart flat, Karyn starts spending...and spending. But when it all goes horribly wrong, and her credit card balance mounts in a terrifying manner, Karyn knows that she has to take control. She starts her website [www.savekaryn.com](http://www.savekaryn.com) on which she fearlessly asks for donations to help pay off her debts. The website receives over 2 million hits and has replies from all over the world - some supportive, many abusive. But after four months, Karyn has become a new woman-debt-free, grateful and happy. This is the hilarious and touching true story of how she does it.

Lucas Storey's life is all about college, studying, and finishing his medical degree. That's until he moves in with his older brother and meets his motorcycle club friends. Only, new people make Lucas nervous, almost to the extent of peeing himself, but he soon realizes they're great people and will accept him as he is. Now, if only he can stop thinking of a certain grumpy biker, things will be good. Never before has Wade "Wreck" Williams noticed the same sex, or at least not until Lucas crashes into their lives. And notice Lucas he does. But that's not all. He wants to get to know the man, and he kind of likes looking at Lucas too. None of it makes sense, and Wreck will fight it for that reason alone. When Lucas thinks he can go out with a someone who's not Wreck-and jealously rears its ugly head to a point

Wreck just has to step in-it's clear that he may just be wrecked forever. In *Mordin On Time*, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). *Mordin On Time* enables the reader to construct their own speed ratings wherever they live.

The image of Old West saloons as sites of violence and raucous entertainment has been perpetuated by film and legend, but the true story of such establishments is far more complex. In *Boomtown Saloons*, archaeologist Kelly

J. Dixon recounts the excavation of four historic saloon sites in Nevada's Virginia City, one of the West's most important boomtowns, and shows how the physical traces of this handful of disparate drinking places offer a new perspective on authentic life in the mining West. During the second half of the nineteenth century, the Comstock Lode's mineral wealth attracted people from all over the world. At its peak, Virginia City had a cosmopolitan population of over 20,000 people. Like people everywhere, they sought to pass their leisure time in congenial company, often in one or another of the four saloons studied here. Dixon's account of the role these four establishments played in the social and economic life of Virginia City offers keen insight into the businesses and people who made up the backdrop of a mining boomtown. The saloons in this study were quieter than legend would have us believe; they served relatively distinct groups and offered their customers a place of refuge, solidarity, and social contact with peers in a city where few people had longtime ties or initially any close contacts. Boomtown Saloons also offers an equally vivid portrait of the modern historical archaeologist who combines time-honored digging, reconstruction, and analysis methods with such cutting-edge technology as DNA analysis of saliva traces on a 150-year-old pipestem and chemical analysis of the residue in discarded condiment bottles. The book is illustrated with historical photographs and maps, as well as photographs of artifacts uncovered during the excavations of the four sites. Dixon's sparkling text and thoughtful

interpretation of evidence reveal an unknown aspect of daily life in one of the West's most storied boomtowns and demonstrate that, contrary to legend, the traditional western saloon served an vital and complex social role in its community. Available in hardcover and paperback.

**Is your company ready to take advantage of the**

**new growth cycle that is beginning in Brazil and should last the next ten years? Few Brazilian experts are as qualified to answer this question as the author of this book, Stephen Charles Kanitz. The original version of this book, written in Portuguese, became a best seller in Brazil only a month after publication. A Harvard MBA, Professor Kanitz is the editor of the Brazilian equivalent of Fortune 500, the 'Best and Biggest' yearbook published by Exame, Brazil's leading business magazine. As long ago as 1984, Professor Kanitz predicted the recession then awaiting the Brazilian economy. He is no intrinsic optimist. In this book, buttressed with masses of data, figures and examples, Professor Kanitz shows that the years of stagnation have been left behind. To take maximum advantage of this new economic boom, before competitors do, you must become aware that Brazil is ready for a new surge of growth, which will be similar in many respects to the 'economic miracle' of the seventies. Paintings, magisterial and universal, that capture the essence of a vibrant African American community In his art Jonathan Green paints the world of his childhood and an ode to a people imbued with a profound respect for the dignity and value of others—the Gullah people of the South Carolina barrier islands. His canvases, beloved for their sense of jubilation and rediscovery, evoke the meaning of community in Gullah society and display a reverence for the rich visual, oral, and spiritual traditions of its culture. His art also reveals a**

keen awareness of the interpersonal, social, and natural environments in which we live. The 180 images assembled in this collection showcase the meaning, purpose, and beauty that Green finds in the small but critical tasks of life. His work elevates the everyday—preparing morning meals, doing the wash, accomplishing farming chores, finishing a day's work, relaxing in the evening—and celebrates the social and religious—community dances, baptisms, weddings, funerals. Green allows his audience the space and silence to observe people unobtrusively as they pursue life's mission of labor, love, and belonging and as they work in harmony with nature's mysterious, ever changing fabric. While Green's paintings speak specifically to his own upbringing, they transcend racial, cultural, and ethnic boundaries, thus allowing individuals of all backgrounds to recall fond memories and to reflect on the place that purpose and dignity hold in their lives. In addition to a foreword by Pat Conroy, essays by Bettye J. (Mbitha) Parker Smith, Lynn Robertson, and Ronne Hartfield complement Green's images. They tell of the vitality of the Gullah community, the progression of Green's career, and the authenticity of his work.

Neo-Hasidism applies the Hasidic masters' spiritual insights—of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy, uplifting all of life to become a vehicle of God's service—to contemporary Judaism, as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first-ever anthology of Neo-Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers—Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter-Shalomi—plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo-Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo-Hasidic thought and influence on the movement. Zeitlin and Buber initiated a renewal of Hasidism for the modern

world; Heschel's work is quietly infused with Neo-Hasidic thought; Carlebach and Schachter-Shalomi recreated Neo-Hasidism for American Jews in the 1960s; and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter-Shalomi include an interview with Schachter-Shalomi about his decision to leave Chabad-Lubavitch and embark on his own Neo-Hasidic path.
