"...profoundly moving..." -Publishers Weekly
Nelson Mandela’s two great-grandchildren ask their grandmother, Mandela’s youngest daughter, 15 questions about their grandad – the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child’s perspective, and authored jointly by Nelson Mandela’s great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson’s Mandela 100th birthday.
The sixties were possibly the greatest decade of last century – an exciting time for music and youth. No other youth culture has personified this more than the Mods, who emerged in the early years of the decade as followers of fashion and soul music and who became the style leaders for this new youth culture. This lavish pictorial history of the original Mods, celebrating their thrilling and unique way of life.

Research has shown that the vast majority of children throughout Europe have experienced some form of corporal punishment. This publication considers how to raise public awareness against the use of corporal punishment, drawing on case studies of three successful public education campaigns in the UK, Poland and the United States.

to plan a campaign, target groups, and conducting media campaigns and local activities. It also includes three model questionnaires aimed at support services for children and families, for children and for professionals.

***What would you do if you discovered your whole life to be a lie? Daniel Henstock thinks he’s an ordinary schoolboy but on his sixteenth birthday his world is turned upside down. He is the world’s first one-hundred percent genetically-engineered human - assigned the codename Tiberius - and Gregory Dryden, the man responsible, wants him back so that he can continue his deadly experiments. Running for his life, Daniel flees to New York and is forced to go ‘off-grid’. In this near-future America, where the security-obsessed authorities require citizens to carry DNA cards, Daniel meets the feisty and beautiful Eleanor. But by falling for her, Daniel also puts her in terrible danger. Daniel pursues the facts about his origins but is hunted by an agent sent by Dryden to bring him to heel. Can Daniel find out the truth whilst trying to evade those who think they own him? As his enemies close in Daniel must draw on resources he never knew he had to win his freedom - but in doing so he may be walking into a deadly trap ... TIBERIUS FOUND is the first instalment in a thrilling series - The Emperor Initiative - that introduces an engaging new hero that will appeal to fans of Alex Rider and Jason Bourne.***

***A year after a devastating epidemic swept the world, Emily and her six-year-old son, Song, are struggling south in search of more hospitable climates. A snowstorm traps them in an abandoned gas station, where starving and desperate, they encounter Aaron, an Army medic on a mission of his own, who offers them a ride to ease the journey.***

***"We have been marked as traitors." A mere shadow in the family tree, little could Eliza have realized the way in which her fifth great-grandmother, Maria Catrina, would step from the shadows of her husband's life to reveal the true price paid for loyalty. The unrivaled beauty and abundance of the Mohawk Valley, engulfed in the fight for liberty, forced the Eamers to choose between the freedom sought by many and their loyalty to the king. The impossible choice, once made, compelled them to abandon the land they loved and the hope that they would find peace amongst their once-loved neighbours, friends...and family. Fleeing his impending arrest, Peter leaves Maria Catrina with their young children, telling her she must make her way north to the safety of the king's lands in Quebec. Their exodus through the wild, untamed Adirondack Mountains reveals the darkness of men's hearts and the lengths to which a mother will go to safeguard her precious ones. Inspired by true events.***

***Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.***

***This must-read for lovers of Stephen King's The Shining will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...***

Enter the “fascinating” and frightening world of modern forensic psychology as experienced by one of the most respected practitioners in the field today (Robert K. Tanenbaum, New York Times–bestselling author). At the heart of countless crimes lie the mysteries of the human mind. In this eye-opening book, Dr. Cheryl Paradis draws back the curtain on the fascinating world of forensic psychology, and revisits the most notorious and puzzling cases she has handled in her multifaceted career. Her riveting, sometimes shocking stories reveal the crucial and often surprising role forensic psychology plays in the pursuit of justice—in which the accused may truly believe their own bizarre lies, creating a world that pushes them into committing horrific, violent crimes. Join Dr. Paradis in a stark concrete cell with the indicted as she takes on the daunting task of mapping the suspect’s madness or exposing it as fakery. Take a front-row seat in a tense, packed courtroom, where her testimony can determine an individual’s fate—or if justice will be truly served. The criminal thought process has never been so intimately revealed—or so darkly compelling—as in this “excellent and entertaining” journey into the darkest corners of the human mind (Booklist).

A new novel from the Booker Prize winning Pat Barker, author of the Regeneration Trilogy, that unforgettably portrays London during the Blitz (her first portrayal of World War II) and reconfirms her place in the very top rank of British novelists. London, the Blitz, Autumn 1940. As the bombs fall on the blacked-out city, ambulance driver Elinor Brooke races from bomb sites to hospitals trying to save the lives of injured survivors, working alongside former friend Kit Neville, while her husband Paul Tarrant works as an air-raide warden. Once fellow students at the Slade School of Fine Art before the First World War destroyed the hopes of their generation, they now find themselves caught in another war, this time at home. As the bombing intensifies, the constant risk of death makes all three reach out for quick consolation. And into their midst comes the spirit medium Bertha Mason, grotesque and unforgettable, whose ability to make contact with the deceased finds vastly increased demands as death rains down from the skies. Old loves and obsessions resurface until Elinor is brought face to face with an almost impossible choice. Completing the story of Elinor Brooke, Paul Tarrant and Kit Neville begun with Life Class and continued with Toby’s Room, Noonday is both a stand-alone novel and the climax of a trilogy. Writing about the Second World War for the first time, Pat Barker brings the besieged and haunted city of London into electrifying life in her most powerful novel since the Regeneration trilogy.

Geoff Hill is a critically acclaimed author and award-winning journalist whose 19 books include novels Angel Street, Smith and The Butler’s Son, epic motorbike adventures Way to Go, The Road to Gobblers Knob, Oz and In Clancy’s Boots. His collected travel stories are in the books Anyway, Where was I?, the sequel Where was I again? and I could have been a stoker for a vertical wimple crimper, and his award-winning newspaper columns are in The Brownie Dawn Patrol Volumes I-IV. His book on learning to fly is This Way Up. And now for something completely different: a self-help book for baffled gentlefolk, and indeed anyone else who’s struggled with finding happiness in life. Based on Geoff’s own years of thought on just the subject after a spell of severe doom and gloom, it’s light-hearted, uplifting and filled with simple practical guidelines which will hopefully help bring peace, happiness and contentment to your own life.

A stunning chronicle of a youth movement as seen through the lens of Mike Blabac, a man as dedicated to his craft as he is to the skateboarding lifestyle that has inspired it. Skateboarding is more than a hobby, it is a way of life that shapes everything from music to fashion, video to art. 300 awe-inspring images communicate the stories of some of skateboarding’s finest athletes including Eric Koston and Stevie Williams. In the 1950s, New York City’s Birdland was the center of the world of modern jazz--and a revelation to Bill Crow, a wet-behind-the-ears twenty-two-year-old from Washington State. Located on Broadway between 52nd and 53rd streets, the club named for the incomparable Charlie Bird Parker boasted lifesize photo murals of modern jazzmen like Dizzy Gillespie, Lennie Tristano, and, of course, Bird himself, looming large against jet black walls. Exotic live birds perched in cages behind the bar. The midget master of ceremonies, 3’9 Pee Wee Marquette, dressed in a zoot suit and loud tie, smoked huge cigars and screeched mispronounced introductions into the microphone. And the jazz-struck young Crow would park in the bleachers till 4 am, blissfully enveloped by the heady music of Bird, Bud Powell, Max Roach, and a host of other jazz giants. From Birdland to Broadway is an enthralling insider’s account of four decades of a life in jazz. Bill Crow, journeyman bass player, superb storyteller, and author of the successful Jazz Anecdotes, here narrates many moving and delightful tales of the pioneers of modern jazz he played with and was befriended by. We find Dizzy Gillespie, with whom Crow, because of prior commitments, regretfully declined steady work, dancing at the Royal Roost, Stan Getz sadly teetering on the brink of losing himself to drugs, and Harry Belafonte (known then as the Cinderella Gentleman) running a lunch counter in New York’s Sheridan Square between music dates. And we also witness many of the highlights of Crow’s career, such as in 1955 when the Marian McPartland Trio (with Crow on bass) was named Small Group of the Year by Metronome; Crow playing with the Gerry Mulligan Quartet at venues like Storyville in Boston and Harlem’s Apollo Theater (where they appeared with Dinah Washington); and the tour of the Soviet Union with Benny Goodman, a journey that might have been a high point of Crow’s travels abroad but was marred by Goodman’s legendary mistreatment of his band. Moving beyond jazz clubs to the Broadway concert pit and a variety of studio gigs in the ‘60s, Crow encounters actors such as Yul Brynner and pop-rock acts like Simon and Garfunkel. From the great to the near-great, from Billie Holiday to Judy Holliday, Bill Crow’s wealth of personal anecdotes takes the reader from Birdland, to the Half Note, to the Playboy Club, to the footlights of Broadway. This revealing book is a marvelous portrait of the jazz world, told by someone who’s been there.

Completely updated for Django 4.0 & Django REST Framework 3.13! Django for APIs is a project-based guide to building modern web APIs with Django & Django REST Framework. It is suitable for beginners who have never built an API before as well as professional programmers looking for a fast-paced introduction to Django fundamentals and best practices. Over the course of 200+ pages you'll learn how to set up a new project properly, how web APIs work under the hood, and advanced testing and deployment techniques. Three separate projects are built from scratch with progressively more advanced features including a Library API, Todo API, and Blog API. User authentication, permissions, documentation, viewsets, and routers are all covered thoroughly. Django for APIs is a best-practices guide to building powerful Python-based web APIs with a minimal amount of code.

Provides clear definitions specifically designed and cross-referenced to orient users to relevant meanings of related words, offering a wide range of synonyms from mainstream vocabulary to colorful alternatives while including example sentences and hundreds of Core Synonym Paragraphs that explain different nuances of meaning.

Finding Om is a spiritual, and chaotic, journey through the highs and lows of India. Vivid and suspenseful, these are the tales of palm reader prophecies, the romances with a soul mate, the troubles of tour guide scams, the teachings from yoga gurus and the illuminating conversations had over a cup of chai. This is an intimate and true story of an intrepid young female on a quest to find compassion, adventure and a home in the world. Scooterboys are the lost tribe of British youth culture. Unrecognised, uncelebrated and unwanted; misunderstood by a general public who mistook us for Mods. We weren't Mods though. By the 1980s myself and tens of thousands of scooter riders collectively rejected that label. Instead, we took the roadmap of British youth disaffection and carved a new bypass. This route took us beyond the UK's faded seaside resorts, allowing us to spread our creed across the continents. Tuned and customised Vespa and Lambretta scooters gave us freedom to roam; transport to live for the weekend. Shared experiences of riots, local hostility and police harassment built strong fraternal bonds that endure to this day. Despite decades of two-wheeled rebellion our threat level was never high enough to put us on the national security radar. This low profile has its benefits. We aren't doomed to follow the same cycle as Mods. First feared, then pilloried, accepted and finally adopted as part of UK's rich culture. As British as a vindaloo. The cult of Scooterboy has escaped death-by-public-acceptance, simply by remaining too underground. Too difficult to distinguish from what came before. And that's just perfect. You'll never see Scooterboys parodied in TV insurance adverts or low budget fly-on-the-walls. The poorly-rendered caricature is always some cliché Mod on a 'Christmas Tree' scooter. If you rode to rallies in the 80s and 90s then this book will mirror your experiences. If you've never had a scooter then it offers a rare glimpse of life inside the lost tribe of two-stroke terrorists.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom"bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive"even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting"with lessons that go down easy. You'll be laughing and learning at the same time.

Vogue has always been on the cutting edge of popular culture, and Vogue x Music shows us why. Whether they're contemporary stars or classic idols, whether they made digital albums or vinyl records, the world's most popular musicians have always graced the pages of Vogue. In this book you'll find unforgettable portraits of Madonna beside David Bowie, Kendrick Lamar, and Patti Smith; St. Vincent alongside Debbie Harry, and much more. Spanning the magazine's 126 years, this breathtaking book is filled with the work of acclaimed photographers like Richard Avedon and Annie Leibovitz as well as daring, music-inspired fashion portfolios from Irving Penn and Steven Klein. Excerpts from essential interviews with rock stars, blues singers, rappers, and others are included on nearly every page, capturing exactly what makes each musician so indelible. Vogue x Music is a testament to star power, and proves that some looks are as timeless as your favorite albums.

Scholarly readings of John Chrysostom's Christology seldom examine the intimate relationship that exists between his doctrinal, sacramental, and praxeological views. The vital correlation between exegesis and praxis in patristic thought must be taken into consideration in any evaluation of christological positions. Chrysostom's doctrine of Christ is intricately bound to life in the church. Within this conceptual framework, Chrysostom's commentaries on John's Gospel and Hebrews are examined. The christological portrait that emerges from this oeuvre is a depiction of the personal continuity of the divine Son in Christ: his sacramental presence in the church, the body of Christ; and his transforming work in the Christian, to the likeness of Christ. This persuasive study demonstrates that Chrysostom's view of the Christian life is the outworking of his exegetically

informed and pastorally rich christological doctrine.
