### The Romans

Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most advanced tools to make papyrological studies more and more effective, and even to create a new conception of "papyrology" and a new model of "edition" of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into very quick and general treatments within journal articles or papyrological handbooks.

Nearly three million years ago the Ice Age began. Oceans froze, ice sheets covered land and animals, along with humans, found ways to thrive. These prehistoric creatures were weird, wonderful and enormous. Explore the Earth continent by continent and come face to face with Ice-Age megafauna, such as North America's short-faced bear - which was 3.7 metres tall, and mastodons - which weighed twice as much as a T. rex! Accompanying the images, lively text allows you imagine exactly what these mega animals were like!

A mythical history of the beginnings of Rome, written for children by Laura Orvieto (1876-1953).

***The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of "islands" both distinct and connected. Though drawing on philosophers of Europe's past, Cacciari calls not to resist Europe's sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve. Contains transparent overlays, artists reconstruction of***

Marcia Williams brings the most famous moments in Roman history to life in this funny, engaging cartoon-strip book, from the birth of Romulus and Remus to the death of Julius Caesar - with a trip to Mount Olympus on the way.

With the help of Egyptologists Collier and Manley, museum-goers, tourists, and armchair travelers alike can gain a basic knowledge of the language and culture of ancient Egypt. Each chapter introduces a new aspect of hieroglyphic script and encourages acquisition of reading skills with practical exercises. 200 illustrations.

An immense reservoir of art history, Cairo's Museum of Egyptian Antiquities contains fabulous collections of relics from the Mediterranean's most mysterious and ancient civilization, the true cradle of western culture. From the creation of the first state on the banks of the Nile to its submission to the Roman empire, the millennial story of ancient Egypt is recounted here through the artistic masterpieces, the everyday objects, the spectacular jewels, and the magnificent remains from the tombs of the pharaohs, all remarkably assembled within the walls of a single institution. Structured as a guide, but fully illustrated with superb color photographs, this book suggests a simple but comprehensive itinerary through the museum, subdividing the tour into chapters devoted to the most important episodes in Egyptian history. Collected during the course of over a century of archaeological excavations, jewelry, tools, toys, models, religious objects, mummies, and monumental sculptures offer vivid glimpses of a formidable civilization. The rich funerary cache of Tutankhamun, the treasures of Tanis, and the jewels of Queen Ahhotep reflect the glory of the Egyptian monarchy, but there are insights too into the day-to-day lives of the more

humble sections of society. Previously unpublished photographs and plans alongside texts prepared by the museum curators themselves help readers to penetrate the corridors and halls of the great museum in search of a heritage unique in its richness and variety, following in the footsteps of the great figures in Egyptian history: from the pharaohs, suspended between heaven and earth, to the archaeologists who, with their patient excavations, have helped to shed new light on the land of the pyramids.
