you want to create something using the Cricut machine, you have to avoid projects without obvious or seemingly simple directions. Cricut's best projects have very clear and detailed instructions. Cricut's most straightforward projects use no more than three different types of materials: surface materials, such as a cup or shirt, and everything else that goes together, such as vinyl. And the easiest is no longer a material, such as paper for overlapping cards. These projects need just a technique, like applying a sturdy vinyl layer to a shirt. They are quickly completed and take less than two hours in total. You may also find some that are faster. If you have to spend a lot of time on a project, you may lose focus or give up before doing so, which is not good enough.
