Violence in Latin America and the Caribbean is no longer perpetrated primarily by states against their citizens, but by a variety of state and non-state actors struggling to control resources, territories, and populations. This book examines violence at the subnational level to illuminate how practices of violence are embedded within subnational configurations of space and clientelistic networks. In societies shaped by centuries of violence and exclusion, inequality and marginalization prevail at the same time that democratization and neoliberalism have decentralized power to regional and local levels, where democratic and authoritarian practices coexist. Within subnational arenas, unique configurations - of historical legacies, economic structures, identities, institutions, actors, and clientelistic networks - result in particular patterns of violence and vulnerability that are often strikingly different from what is portrayed by aggregate national-level statistics. The chapters of this book examine critical cases from across the region, drawing on new primary data collected in the field to analyze how a range of political actors and institutions shape people's lives and to connect structural and physical forms of violence.

Hofman, a researcher with the Chile-based Economic Commission for Latin America and the Caribbean, uses growth accounting methods and previously unavailable long-term series data to assess the economic performance of the region during the century from a comparative and historical perspective. In particular he compares Latin American economies to those of advanced capitalist economies, to newly industrialized economies, and to Spain and Portugal because of the historical ties. He looks at the reasons for the poor or negative growth during the 1980s and the apparent recovery in the 1990s and at such problems as debt, income inequality, high inflation, cyclical instability, and political and policy instability. This textbook integrates domestic and international factors for understanding Latin American politics. The thematic structure of the book is to utilize three different levels of analysis to explain Latin American politics: international, national, and local. This approach has the benefit of incorporating the dynamics of globalization while also including political factors more at ground level, including the influence of subaltern groups. Although there may be important international influences on domestic politics, they interact with and are mediated by national political figures and grassroots activists. The book has four sections: Theoretical and Historical Background; Mexico, Central America, and the Caribbean; The Andean Region and Venezuela; and Brazil and the Southern Cone. Each chapter contains key terms, discussion questions, and further sources and a range of pedagogical materials for use in the classroom. This textbook is available in an open access digital edition. Edy Kaufman, Department of International Relations, Hebrew University of Jerusalem; Yoram Shapiro, Latin American Studies Department, Hebrew University of Jerusalem; Joej Barromi, Director, UN Department of the Ministry for Foreign Affairs, Israel Interaction with Latin America has held varying degrees of importance in Israel's foreign relations. This study aims to present a comprehensive analysis of the patterns of continuity and change in Israel's relations with Latin America over a twenty-five year period, from the creation of the state to the 1973 October War, The authors provide a factual survey of major developments in Israeli-Latin American relations since 1948 -- and evaluate the attitudes of Latin American decision makers toward Israel. This latter evaluation is accomplished by studying patterns of behavior, grouping nations according to levels of support for Israel, and analyzing the influence of different variables on the policymaking process both for each of the states involved and their interaction. The work is divided into two basic units: background inputs and analysis of international and state relations. This division is utilized as the basis for the outputs of data and analysis on a multilateral as well as bilateral level, culminating in a detailed analysis of Latin American voting in the United Nations General Assembly. Quite distinctive in subject and perspective. It is timely in its relevance to the Middle East conflict and the recent bid by Latin American Jead-ers for greater influence in Third World politics. I consider it a valuable addition to the literature. John J. Bailey, Associate Professor of Government, Georgetown University This book fills a majorgap in the study of Israel's foreign relations. It has thefurther merit of exploring a very large topic, both in time and space, within a structured systematic framework of analysis. The book is highly informative and stimulating. Political scientists and sociologists, the contributors employ ethnography, targeted interviews, case studies, within-case and regional comparison, thick descriptions, and process tracing.

The growth of institutional capacity in the developing world has become a central theme in twenty-first-century social science. Many studies have shown that public institutions are an important determinant of long-run rates of economic growth. This book argues that to understand the difficulties and pitfalls of state building in the contemporary world, it is necessary to analyze previous efforts to create institutional capacity in conflictive contexts. It provides a comprehensive analysis of the process of state and nation building in Latin America and Spain from independence to the 1930s. The book examines how Latin American countries and Spain tried to build modern and efficient state institutions for more than a century - without much success. The Spanish and Latin American experience of the nineteenth century was arguably the first regional stage on which the organizational and political dilemmas that still haunt states were faced. This book provides an unprecedented perspective on the development and contemporary outcome of those state and nation-building projects.
