and service of home electrical appliances.

Microwave oven which was invented in 1958 by accident has become an household name as many families have adopted this mode of warming food in seconds. An increase for the use of this technology has come with the need for

personnel to service and maintain these gadgets. Unlike other home electrical appliances, microwave repair is the most dangerous, both to the user and service personnel. In this regard I have dedicated a full chapter on the safety around working on the microwave and

also testing microwave leakage for the safety of the user before handing back the machine to the customer and also for the service technician-**SAFETY FIRST!**
