

Le Petit Fiscal 2018 15e D Les L Ments Indispensables

Le droit des successions et des libéralités, un droit en perpétuelle évolution
Le droit des successions et des libéralités est un droit en perpétuelle évolution. S'intéressant à la question de la transmission à titre gratuit du patrimoine, entre vifs ou à cause de mort, il est au carrefour de plusieurs disciplines juridiques (droit des personnes et de la famille, droit des obligations et des biens), en prise directe avec les évolutions sociétales et les grands débats de société. C'est ainsi un droit profondément renoué par les lois du 3 décembre 2001 et 23 juin 2006 qui es au lecteur, étudiant ou praticien, intégrant les débats et interrogations liés aux nouveautés issues de ces deux textes et resituant la matière dans son contexte international, historique et sociologique. Conformément à l'esprit de la collection des Hypercours, cet ouvrage s'accompagne d'outils pédagogiques nombreux et variés : schémas de dévolution successorale, tableaux de synthèse, méthodologie des liquidations successorales, etc. L'ouvrage consacre également d'importants développements à la fiscalité des libéralités et des successions, illustrés de nombreux exemples chiffrés, ces derniers permettant de comprendre les enjeux de l'anticipation successorale, et l'articulation indispensable entre la liquidation civile de la succession et celle des droits de succession.

This book is presented at the 2nd International Conference on Computational Intelligence in Pattern Recognition (CIPR 2020), held at the Institute of Engineering and Management, Kolkata, West Bengal, India, on 4–5 January 2020. It includes practical development experiences in various areas of data analysis and pattern recognition, focusing on soft computing technologies, clustering and classification algorithms, rough set and fuzzy set theory, evolutionary computations, neural science and neural network systems, image processing, combinatorial pattern matching, social network analysis, audio and video data analysis, data mining in dynamic environments, bioinformatics, hybrid computing, big data analytics and deep learning. It also provides innovative solutions to the challenges in these areas and discusses recent developments.

This specialised Directory provides information on over 1 700 non-governmental organisations (NGOs) active in the field of habitat and urban development.

Blockchain technologies, as an emerging distributed architecture and computing paradigm, have accelerated the development/application of the Cloud/GPU/Edge Computing, Artificial Intelligence, cyber physical systems, social networking, crowdsourcing and crowdsensing, 5G, trust management, and finance. The popularity and rapid development of Blockchain brings many technical and regulatory challenges for research and academic communities. This book will feature contributions from experts on topics related to performance, benchmarking, durability, robustness, as well data gathering and management, algorithms, analytics techniques for transactions processing, and implementation of applications.

While Ayn Rand is a household name in the United States, her name holds less currency in Europe. This book retraces Rand's European influences and her impact on European readers, revealing a complicated publication and reception history as well as a remarkable panorama of thinkers and artists among her admirers.

Digital Media and Wireless Communications in Developing Nations: Agriculture, Education, and the Economic Sector explores how digital media and wireless communication, especially mobile phones and social media platforms, offer concrete opportunities for developing countries to transform different sectors of their economies. The volume focuses on the agricultural, economic, and education sectors. The chapter authors, mostly from Africa and India, provide a wealth of information on recent innovations, the opportunities they provide, challenges faced, and the direction of future research in digital media and wireless communication to leverage transformation in developing countries. The volume provides important research on digital media and wireless communication within the context of developing countries that will be very useful for professionals from academia, government agencies, NGOs, technologists, entrepreneurs and investors, and others.

Informed by the analytical practices of the interdisciplinary 'material turn' and social historical studies of childhood, Childhood By Design: Toys and the Material Culture of Childhood offers new approaches to the material world of childhood and design culture for children. This volume situates toys and design culture for children within broader narratives on history, art, design and the decorative arts, where toy design has traditionally been viewed as an aberration from more serious pursuits. The essays included treat toys not merely as unproblematic reflections of socio-cultural constructions of childhood but consider how design culture actively shaped, commodified and materialized shifting discursive constellations surrounding childhood and children. Focusing on the new array of material objects designed in response to the modern 'invention' of childhood-what we might refer to as objects for a childhood by design-Childhood by Design explores dynamic tensions between theory and practice, discursive constructions and lived experience as embodied in the material culture of childhood. Contributions from and between a variety of disciplinary perspectives (including history, art history, material cultural studies, decorative arts, design history, and childhood studies) are represented – critically linking historical discourses of childhood with close study of material objects and design culture. Chronologically, the volume spans the 18th century, which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children's use; through the 19th-century expansion of factory-based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the household; towards the intersection of early 20th-century child-centered pedagogy and modernist approaches to nursery and furniture design; through the changing consumption and sales practices of the postwar period marketing directly to children through television, film and other digital media; and into the present, where the line between the material culture of childhood and adulthood is increasingly blurred.

Countries with smaller governments grow faster. Tobacco taxes are the best way to cut smoking. Government regulation discourages entrepreneurship. Award-winning investigative journalist Tom Bergin digs into eight mantras widely accepted by Western governments and, by talking to the people who promote those ideas and the workers, businesspeople and consumers who have felt their impacts, finds they often don't play out as expected. Smart, funny and incisive, Free Lunch Thinking is essential reading for anyone who really wants to know how economies tick - and why they often don't.

'I couldn't put it down. A thorough and nuanced examination of the evolution of supply side economics ... I loved it.' Arthur Laffer, creator of the Laffer Curve 'An entertaining and thought-provoking exploration of economic theories that have been both widely accepted and largely wrong ... I devoured it in a couple of sittings.' Reuters Breakingviews 'An insightful account of the recent history of economic thought. If you are looking for a book which challenges you without being annoying - make it this one.' Institute of

The Encyclopedia Britannica

This innovative volume brings together contributions from leading experts in the study of luxury to present the full range of perspectives on luxury business, from a variety of social science approaches. Topics include conceptual foundations and the evolution of the luxury industry; the production of luxury goods; luxury branding and marketing; distributing luxury; globalization and markets; and issues of morality, inequality, and environmental sustainability. The Oxford Handbook of Luxury Business is a necessary resource for all students and researchers of the field as well as for forward-thinking industry professionals.

A brand new look at the extremely beautiful, if underappreciated, later works of one of the most inventive artists of the 20th century Between 1935 and his death at midcentury, Henri Matisse (1869-1954) undertook many decorative projects and commissions. These include mural paintings, stained glass, ceramic tiles, lead crystal pieces, carpets, tapestries, fashion fabrics, and accessories—work that has received no significant treatment until now. By presenting a wealth of new insights and unpublished material, including from the artist's own correspondence, John Klein, an internationally acclaimed specialist in the art of Matisse, offers a richer and more balanced view of Matisse's ambitions and achievements in the often-neglected later phases of his career. Matisse designed many of these decorations in the innovative—and widely admired—medium of the paper cut-out, whose function and significance Klein reevaluates. Matisse and Decoration also opens a window onto the revival and promotion, following World War II, of traditional French decorative arts as part of France's renewed sense of cultural preminence. For the first time, the idea of the decorative in Matisse's work and the actual decorations he designed for specific settings are integrated in one account, amounting to an understanding of this modern master's work that is simultaneously more nuanced and more comprehensive.

This book analyzes the way in which restaurants are geographical objects that reveal locational logics and strategies, and how restaurants weave close relationships with the space in which they are located. Originating from cities, restaurants feed off the urban environment as much as they feed it ? participating in the qualification, differentiation and hierarchy of cities. Indeed, restaurants in both the city and the countryside maintain a dialogical relationship with tourism. They can be vital players in the establishment of emerging types of gourmet tourism, sometimes even constituting as gourmet tourist destinations in their own right. They participate in the establishment of necessary conditions for local development. Some restaurants are even praised as historic sites, recognized as part of the local heritage, which reinforces their localization and their identity as a gourmet tourist destination.

Headline: The Globe and Mail: Legal challenge halts Canadian, U.S. and U.K. release of book critical of Chinese Communist Party by Robert Fife That said it all. The hands of the Chinese Communist Party were going on the offence. The 48 Group Club a China friendly group of former UK ambassadors and Prime Ministers were embarrassed by their connections to a Club founded by key members of the Chinese Communist Party of Britain who's chair Stephen Perry suggested that China's approach to world order and rule was superior to democracy and the UK should embrace them. Asked if he believed the lawsuit was an effort by the Chinese government to stop the publication of his book, Mr. Hamilton said: "I have no evidence of that, although it should be noted that the Chinese government has used lawfare in the past." Lawfare is the use of legal action as part of a campaign against a target. Governments around the world are in the early stages of a repositioning of power, as China rises and the United States is drawn into direct competition. However, some are being so worried when, for all of the economic benefits, engaging with China carries unseen dangers. The Chinese Communist Party is now determined to reshape the world in its image. The party is not interested in democracy. It divides the world into those who can be won over and enemies. They have already lured many leaders to their corner; others are weighing up a devil's bargain. Through its exercise of 'sharp power,' the party is weakening global institutions, aggressively targeting individual corporations, and

threatening freedom of expression from the arts to academia. At the same time, security services are increasingly worried about incursions into our communications infrastructure. Indeed, the vaunted Great Firewall is a temporary measure, only necessary until the party has transformed the global conversation. In December 2019, the CCP's obsession with social control led it to suppress expert warnings about the coronavirus outbreak in Wuhan. Most alarming for the West was the active collaboration of the WHO in spreading the CCP's version of events. It was a shocking example of the widespread co-optation of global institutions by the CCP, as described in Hidden Hand. As soon as Beijing thought it had the virus under control, it began a global propaganda blitz, presenting China's authoritarian system as a model for the rest of the world. Western media and pundits soon began echoing the Party line. Hidden Hand is a detailed and devastating expose of Chinese Communist Party influence in the West, including Canada. It could not arrive at a better time in Canada, with relations between Ottawa and Beijing reaching breaking point after two years of mounting tension. China's bullying behaviour, and the mobilising of people loyal to the Chinese Communist Party on the streets of Canada's cities, has caused deep disquiet among Canadians. But the government seems paralyzed. Hidden Hand shows how Canada's political, business, academic and cultural elites have over many years been co-opted by the Chinese Communist Party and its agencies. They are confused about what is in Canada's national interests and frequently do Beijing's bidding. Hidden Hand shows how the Chinese Communist Party represents a profound threat to Western democracy. It's vital reading for Canadians who want to understand what is really happening, and points to a way of carving out a new diplomatic course with China. But the question remains: Does the government have the will to stand up to Beijing and its proxies in Canada or is it too late?

Wander the lavender fields of Provence, climb the Eiffel Tower, and bite into a perfect croissant: with Rick Steves on your side, France can be yours! Inside Rick Steves France 2018 you'll find: Comprehensive coverage for planning a multi-week trip to France Rick's strategic advice on how to get the most out of your time and money, with rankings of his must-see favorites Top sights and hidden gems, from Louvre and the Palace of Versailles to neighborhood restaurants and delicate macarons How to connect with local culture: Stroll through open-air markets in Paris, or bike between rustic villages and local vineyards Beat the crowds, skip the lines, and avoid tourist traps with Rick's candid, humorous insight The best places to eat, sleep, and relax over a vin rouge Self-guided walking tours of lively neighborhoods and museums Vital trip-planning tools, like how to link destinations, build your itinerary, and get from place to place Detailed maps, including a fold-out map for exploring on the go Useful resources including a packing list, French phrase book, a historical overview, and recommended reading Over 1,000 bible-thin pages include everything worth seeing with nothing to skip down Anually updated information on Paris, Chartres, Normandy, Mont St-Michel, Brittany, the Loire, Dordogne, Languedoc-Roussillon, Provence, The French Riviera, Nice, Monaco, The French Alps, Burgundy, Lyon, Alsace, Reims, and much more Make the most of every day and every dollar with Rick Steves France 2018. Planning a one- to two-week trip? Check out Rick Steves Best of France.

The 150th Anniversary special edition of the best-selling reference book of all time! The ebook format allows curious readers to keep millions of searchable facts at their fingertips. The World Almanac® and Book of Facts is America's top-selling reference book of all time, with more than 82 million copies sold. Since 1868, this compendium of information has been the authoritative source for all your entertainment, reference, and learning needs. The 150th anniversary edition celebrates its illustrious history while keeping an eye on the future. Praised as a "treasure trove of political, economic, scientific and educational statistics and information" by The Wall Street Journal, The World Almanac and Book of Facts will answer all of your trivia needs—from history and sports to geography, pop culture, and much more. Features include: 150 Years of the World Almanac: A special feature celebrating The World Almanac's historic run includes highlights from its distinguished past and some old-fashioned "facts," illustrating how its defining mission has changed with the times. Historical Anniversaries: The World Almanac's recurring feature expands to incorporate milestone events and cultural touchstones dating to the book's founding year, from the impeachment of President Andrew Johnson to the publication of Little Women. World Almanac Editors' Picks: Greatest Single-Season Performances: In light of Russell Westbrook's unprecedented 42 regular-season triple-doubles, The World Almanac takes a look back at athletes' best single-season runs. Statistical Spotlight: A popular new feature highlights statistics relevant to the biggest stories of the year. These data visualizations provide important context and new perspectives to give readers a fresh angle on important issues. The Obama Presidency: A year after Barack Obama's second term came to a close, The World Almanac reviews the accomplishments, missteps, and legacy of the 44th president. The World at a Glance: This annual feature of The World Almanac provides a quick look at the surprising stats and curious facts that define the changing world. Other New Highlights: A biography of the 45th president and profile of the Trump administration; 2016 election results; and statistics on crime, health care, overdose deaths, shootings, terrorism, and much more. The Year in Review: The World Almanac takes a look back at 2017 while providing all the information you'll need in 2018. 2017–Top 10 News Topics: The editors of The World Almanac list the top stories that held the world's attention in 2017. 2017–Year in Sports: Hundreds of pages of trivia and statistics that are essential for any sports fan, featuring a preview of the 2018 Winter Olympic Games, complete coverage of the 2017 World Series, new tables of NBA, NHL, and NCAA statistics, and much more. 2017–Year in Pictures: Striking full-color images from around the world in 2017. 2017–Offbeat News Stories: The World Almanac editors found some of the quirkiest news stories of the year, from the king who secretly worked as an airline pilot for decades to the state that's auctioning off its governor's mansion. World Almanac Editors' Picks: Time Capsule: The World Almanac lists the items that most came to symbolize the year 2017, from news and sports to pop culture.

Whether the corporate form is used to avoid liabilities or cover illegal acts, or whether abuse is practised to obtain certain advantages, the subject of this first-ever in-depth survey and analysis garners more attention every day – both in legal literature and in popular media. Taken together, the authoritative contributions in this book clearly and comprehensively reveal typical situations where abuse may take place and how company law and other areas of law have tackled these incidents and practices in a variety of key jurisdictions. Focusing on Europe but with global implications, the topics raised include the following: how group structures may be used by multinational enterprises to escape regulation and avoid taxation; whether the decision to incorporate a company in a particular jurisdiction may be abusive; companies set up for the purpose of money laundering; letterbox companies formed as a front to allow a company to benefit from one legal regime and avoid others; ex post transfers of seats such as cross-border mergers and conversions; when the use of phoenix companies may constitute an abuse of the corporate form; how corporate mobility is used to circumvent worker participation; and how online company formation and technological innovation may foster abuse. This book helps to explain how the line is drawn between abuse and (creative) use of the corporate form. Remedies covered include restricting the use of bearer shares, setting minimum capital requirements, piercing the corporate veil, ensuring transparency of beneficial ownership, using insolvency law to lodge claims against directors and shareholders and recover assets, and applying the general principle prohibiting abuse. There is no other book on the market focusing on abuse of companies and giving such a comprehensive analysis of the topic. Practitioners will get guidelines on how to avoid becoming involved in activities that may constitute abuse and how to address instances where abuse has occurred, and interested academics, legislators, and enforcement authorities in Europe and beyond will find this book's perspectives invaluable.

Antoine de Saint-Exupéry's The Little Prince remains one of the most treasured books of all time. This commemorative kit includes: 3" light-up collectible of the Prince's cherished rose, set under a clear dome and on a base bearing the story's most famous quote: "It is only with the heart that one can see rightly; what is essential is invisible to the eye." 32-page book of quotes and

This book provides an insight into ways of inculcating the need for applying mobile edge data analytics in bioinformatics and medicine. The book is a comprehensive reference that provides an overview of the current state of medical treatments and systems and offers emerging solutions for a more personalized approach to the healthcare field. Topics include deep learning methods for applications in object detection and identification, object tracking, human action recognition, and cross-modal and multimodal data analysis.

High performance computing systems for applications in healthcare are also discussed. The contributors also include information on microarray data analysis, sequence analysis, genomics based analytics, disease network analysis, and techniques for big data Analytics and health information technology.

This book presents a remarkable collection of chapters covering a wide range of topics in the areas of Computer Vision, both from theoretical and application perspectives. It gathers the proceedings of the Computer Vision Conference (CVC 2019), held in Las Vegas, USA from May 2 to 3, 2019. The conference attracted a total of 371 submissions from pioneering researchers, scientists, industrial engineers, and students all around the world. These submissions underwent a double-blind peer review process, after which 118 (including 7 poster papers) were selected for inclusion in these proceedings. The book's goal is to reflect the intellectual breadth and depth of current research on computer vision, from classical to intelligent scope. Accordingly, its respective chapters address state-of-the-art intelligent methods and techniques for solving real-world problems, while also outlining future research directions. Topic areas covered include Machine Vision and Learning, Data Science, Image Processing, Deep Learning, and Computer Vision Applications.

This unique book brings together leading experts from diverse areas of public international law to offer a comprehensive overview of the approaches to evolutionary interpretation in different international legal regimes. It begins by asking what interpretation is, offering the views of expert authors on the question, its components and definitions. It then comments on situations that have called for evolutionary interpretation in different international legal regimes, including general international law, environmental law, human rights law, EU law, investment law, international trade law, and how domestic courts have, on occasions, interpreted treaties and other international legal instruments in an evolutionary manner. This timely, authoritative compendium offers an in-depth understanding of the processes at work in evolutionary interpretation as well as a prime selection of the current trends and future challenges.

The EU has experienced serious economic and political crises such as the sovereign debt crisis and Brexit in the past few years. However, despite these issues, the EU has implemented considerable institutional, fiscal, and collective improvements during the unification process to continue as a significant actor in the global economy. The Handbook of Research on Social and Economic Development in the European Union provides a multidisciplinary evaluation of the institutional, economic, and social development of the European Union and makes informed suggestions for the future dynamics and collaborations of the EU, the global economy, and other countries. Featuring coverage on a broad range of topics such as energy security, gender discrimination, and global economics, this book is ideally designed for government officials, policymakers, world leaders, politicians, diplomats, international relations officers, economists, business professionals, historians, market analysts, academicians, researchers, and students concerned about the multifaceted integration processes surrounding the EU.

This book addresses current practices in customary law. It includes contributions by scholars from various legal systems (the USA, France, Israel, Canada etc.), who examine the current impacts of customary law on various aspects of private law, constitutional law, business law, international law and criminal law. In addition, the book expands the traditional concept of the rule of law, and argues that lawyers should not narrowly focus on statutory law, but should instead pay more attention to the impact of practices on "real legal life." It states that the observation of practices calls for a stronger focus on usage, customs and traditions in our legal systems - the idea being not to replace statutory law, but to complement it with customary observations.

This book constitutes the refereed proceedings of the 11th International Development Informatics Association Conference, IDIA 2020, held in Macau, China, in March 2020.* The 14 revised full papers presented were carefully reviewed and selected from 43 submissions. The papers are organized in topical sections on ICT4D: taking stock; harnessing frontier technologies for sustainable development; ICT4D discourse, methodologies, and theoretical reflections; the evolving Global Souths. *The conference was held virtually due to the COVID-19 pandemic.

This book gathers selected papers that were submitted to the 2021 International Conference on Digital Science (DSIC 2021) that aims to make available the discussion and the publication of papers on all aspects of single and multidisciplinary research on conference topics. DSIC 2021 was held on October 15-17, 2021. An important characteristic feature of conference is the short publication time and worldwide distribution. Written by respected researchers, the book covers a range of innovative topics related to: digital economics; digital education; digital engineering; digital environmental sciences; digital finance, business and banking; digital health care, hospitals and rehabilitation; digital media; digital medicine, pharma and public health; digital public administration; digital technology and applied sciences. This book may be used for private and professional non-commercial research and classroom use (e.g., sharing the contribution by mail or in hard copy form with research colleagues for their professional non-commercial research and classroom use); for use in presentations or handouts for any level students, researchers, etc.; for the further development of authors' scientific career (e.g., by citing, and attaching contributions to job or grant application).

This WHO technical manual on tobacco tax policy and administration builds upon the 2010 WHO technical manual on tobacco tax administration by further detailing the strategies for effective tobacco tax policy development, design, implementation and administration. This 2021 edition also serves as an update to the 2010 manual, incorporating the latest developments in science, technology and policy, as well as providing illustrative recent examples from a variety of countries. The best practices laid out in this manual are designed to inform governments on the development of their tobacco taxation policy, facilitating the achievement of their health and revenue objectives while also supporting their overall development strategy.

Computational Diffusion MRI

The Restaurant, A Geographical Approach

Rick Steves France 2018

This book introduces the first champions of the cause of charity toward the sick and wounded: the Genevan philanthropists and physicians. It focuses on the international Red Cross movement from the first Geneva conference in 1863 until the Tenth Conference in 1921.

A major international textbook on EU constitutional law, it covers the structure, values, procedures, and policies of the EU. It deals with institutional issues, but also with substantive issues of major importance, including citizenship, free movement, fundamental rights, and the EU as an external actor.

In recent years, the surge of blockchain technology has been rising due to its proven reliability in ensuring secure and effective transactions, even between untrusted parties. Its application is broad and covers public and private domains varying from traditional communication networks to more modern networks like the internet of things and the internet of energy crossing fog and edge computing, among others. As technology matures and its standard use cases are established, there is a need to gather recent research that can shed light on several aspects and facts on the use of blockchain technology in different fields of interest. Enabling Blockchain Technology for Secure Networking and Communications consolidates the recent research initiatives directed towards exploiting the advantages of blockchain technology for benefiting several areas of applications that vary from security and robustness to scalability and privacy-preserving and more. The chapters explore the current applications of blockchain for networking and communications, the future potentials of blockchain technology, and some not-yet-prospected areas of research and its application. This book is ideal for practitioners, stakeholders, researchers, academicians, and students interested in the concepts of blockchain technology and the potential and pitfalls of its application in different utilization domains.

Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries. Its success is incontrovertible, with the exponential increase in techniques and innovations. Rapid advances in new technologies such as artificial intelligence, as well as current societal needs - sustainable development, climate change, renewable energy, the environment - are developments that must be taken into account in industrial renewal. Process Engineering Renewal 3 presents a prospective analysis that demonstrates the significant disruptions linked to sustainable development, global warming, etc. These constraints may trigger changes in the social regulation system, which in turn applies pressure on actors of process engineering to evolve and adapt to these developments.

First World War commemoration in Europe has been framed as a moment of national trial and as a collective European tragedy, but the 'Great War for Civilisation' was more than just a European conflict. It was in fact a global war, a clash of empires that began a process of nationalist agitation against imperial polities and the racisms that underpinned them in Asia, Africa and beyond. Despite the global context of Centenary commemorative activity these events remain framed by national and state imaginaries and ones in which the ideas about nation, race and imperialism that animated and dominated men and women during the Great War sit uncomfortably with modern sensibilities. By drawing on original archival research, translations from French and Mandarin into English and by employing multidisciplinary conceptual frames of analysis this exciting and innovative volume explores how race and empire, and racism and imperialism, were commemorated or forgotten during the First World War Centenary.

This volume gathers papers presented at the Workshop on Computational Diffusion MRI (CDMRI 2019), held under the auspices of the International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI), which took place in Shenzhen, China on October 17, 2019. This book presents the latest advances in the rapidly expanding field of diffusion MRI. It shares new perspectives on the latest research challenges for those currently working in the field, but also offers a valuable starting point for anyone interested in learning about computational techniques in diffusion MRI. The book includes rigorous mathematical derivations, a wealth of rich, full-colour visualisations and extensive clinically relevant results. As such, it will be of interest to researchers and practitioners in the fields of computer science, MRI physics and applied mathematics. Readers will find contributions covering a broad range of topics, from the mathematical foundations of the diffusion process and signal generation, to new computational methods and estimation techniques for the in vivo recovery of microstructure and connectivity features, as well as diffusion-relaxometry and frontline applications in research and clinical practice. This edition includes invited works from high-profile researchers with a specific focus on three new and important topics that are gaining momentum within the diffusion MRI community, including diffusion MRI signal acquisition and processing strategies, machine learning for diffusion MRI, and diffusion MRI outside the brain and clinical applications.
