Leadership Development Research Paper

Over a decade ago, renowned innovation expert Rosabeth Moss Kanter co-founded and then directed Harvard's Advanced Leadership Initiative. Her breakthrough work with hundreds of successful professionals and executives, as well as aspiring young entrepreneurs, identifies the leadership paradigm of the future: the ability to "think outside the building" to overcome establishment paralysis and produce significant innovation for a better world. Kanter provides extraordinary accounts of the successes and near-stumbles of purpose-driven men and women from diverse backgrounds united in their conviction that positive change is possible. A former Trader Joe's executive, for example, navigated across business, government, and community sectors to deal with poor nutrition in inner cities while reducing food waste. A concerned European banker used the power of persuasion, not position, to find novel financing for improving the health of the oceans. A Washington couple enticed global partners to join an Uber-like platform to match skilled refugees with talent-hungry companies. A visionary journalist-turned-entrepreneur closed social divides by giving fifty million social media users access to free local education and culture. When traditional approaches are inadequate or resisted, advanced leadership skills are essential. In this book, Kanter shows how people everywhere can unleash their creativity and entrepreneurial adroitness to mobilize partners across challenging cultural, social, and political situations and innovate for a brighter future.

This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences (best practice) are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021), which was held online by Technische Universität Dresden, Germany, on 22-24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project-Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc.

Praise for The Center for Creative LeadershipHandbook of Leadership Development "The most authoritative, comprehensive, and practical source for developing leadership capability in any organization. The handbook integrates the very best of theory and practice, and serves as a valuable road map to creating a foundation of systemic leadership excellence, now and for the future." —Thomas J. Griffin, vice president, organizational learning and chief teaching officer, U.S. Cellular "Only from the Center for Creative Leadership could we expect to see such a rich, authoritative, and actionable set of the latest resources for developing leaders. All those who have responsibility for developing leaders (senior executives, leader development professionals, and leaders themselves), as well as those who study leadership, need to read this book." —Douglas T. "Tim" Hall, founding director, Executive Development Roundtable, Boston University "The changes in the third edition of The Handbook of Leadership Development make a good book even better. The authors provide a broad perspective on the most relevant topics for academics and practitioners. The emphasis on development of collective leadership capacity as well as development of individual leaders is consistent with the growing recognition that strategic leadership, shared leadership, and flexible change leadership are essential for sustained organizational effectiveness in a dynamic global economy. The book is a valuable source of knowledge and practical advice for anyone who is responsible for providing or managing leadership development." —Gary Yukl, professor of management, University at Albany-SUNY "We consider leadership to be the single most important factor influencing the performance of our organization. This book is brilliant in defining what we need to do and what capabilities we need to assist our leaders to grow and develop." —Morten Raabe, vice president of Organisation Development, WW ASA, Oslo, Norway Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

This book, written by a leading scholar in leadership, takes readers through a very realistic look at what it takes to develop leadership competencies. Focusing on four major goals, this text: *provides the reader with a broader and deeper understanding of what constitutes authentic leadership development; *challenges a very basic notion that leaders are born versus made; *talks about the elements that comprise leadership development so readers are informed to ask the many providers of leadership development the right questions; and *develops full leadership potential. There are numerous case examples used throughout the book: high-tech executives, community leaders, correctional service supervisors, bank managers in Canada, and platoon commanders in Israel. Each example is used as a general basis for discussing how people develop their leadership potential, and as models of training and evaluation. Leadership Development in Balance: MADE/Born is intended for graduate or undergraduate students of leadership, project managers, supervisors, senior executives, school principles, health care officers, or legislators.

A Global Perspective

Creating Learning Experiences Without Changing Jobs

As the world has adapted to the age of digital technology, present day business leaders are required to change with the times as well. Addressing and formatting their business practices to not only encompass digital technologies, but expand their capabilities, the leaders of today must be flexible and willing to familiarize themselves with all types of global business practices. Global Business Leadership Development for the Fourth Industrial Revolution is a collection of advanced research on the methods and tactics utilized to succeed as a leader in the digital age. While highlighting topics including data privacy, corporate governance, and risk management, this book is ideally designed for business professionals, administrators, managers, executives, researchers, academicians, and business students who want to improve their understanding of the strategic role of digital technologies in the global economy, in networks and organizations, in teams and work groups, in information systems, and at the level of individuals as actors in digitally networked environments

The scholarship of management teaching and learning has established itself as a field in its own right and this benchmark handbook is the first to provide an account of the discipline. Original chapters from leading international academics identify the key issues and map out where the discipline is going. Each chapter provides a comprehensive and critical overview of the given topic area, highlights current debates and reviews the emerging research agenda. Chapters embrace the study of organizations as a whole, the concepts of individual and collective learning, the delivery of formal management education and the facilitation of management development. Through consideration of these themes the Handbook analyzes, promotes and critiques the contribution of management learning, education and development to management understanding. It will be an invaluable point of reference for all students and researchers interested in broadening their understanding of this exciting and dynamic new field.

"A first-class template demonstrating how to use superior leadership to drive performance in large organizations." - Paul Myners (Lord Myners), former FTSE100 Chair and Treasury Minister Leadership effectiveness drives organizational performance, yet almost half of all organizations face some kind of leadership gap that they are not able to fill. In Leadership at Scale, McKinsey experts C laudio Feser, Michael Rennie and Nicolai Nielsen share their secrets on how to increase leadership effectiveness across an organization. Using extensive research, distilled insights from McKinsey's leadership development work in practice, and lessons from a highly successful leadership development program, this book will focus on the leadership behaviors that matter most.

Reshaping the Landscape of School Leadership Development: A Global Perspective traces developments in this arena as they evolved since 1980. The book is comprised of chapters authored by the leading scholars in the fields of educational leadership and school leadership development from the United States, Canada, Europe, Asia, and Australia. The volume is designed as one part primer on key policy issues (e.g., the role of standards), one part description of global leadership development practices (professional learning communities, problem-based leadership preparation, computer simulation, and apprenticeships) in school leadership development, and one part assessment of future trends.

Draws from surveys of 60,000 leaders and constituents at all organizational levels to identify and describe the recurring patterns and practices leaders use to turn challenges into successes.

Uncover the extraordinary leader in you with straightforward exercises and advice from two of the world's foremost leadership experts From the bestselling authors of The Leadership Challenge and over a dozen award-winning leadership books comes a new book that examines a question of fundamental importance: How do people learn to become leaders? Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader is a comprehensive guide to unleashing the inner leader in us all and to building a solid foundation for a lifetime of leadership growth and mastery. The book offers a concrete framework to help individuals of all levels, functions, and backgrounds take charge of their own leadership development and become the best leaders they can be. Arguing that all individuals are born with the capacity to lead, bestselling authors Kouzes and Posner provide readers with a practical series of actions and specific coaching tips for harnessing that capacity and creating a context in which they can excel. Supported by over 30 years of research, from over seventy countries, and with examples from real-world leaders, Learning Leadership is a clarion call to unleash the leadership potential that is already present in society today. Learning Leadership provides readers with evidence-based strategies to ignite the habit of continuous improvement and the mindset of becoming the best leaders they can be. Emerging leaders, as well as leadership developers, internal and external coaches and trainers, and other human resource professionals will learn from first-hand stories and practical examples so that they can deeply understand and apply the fundamentals for becoming the best leaders they can be. Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader is divided into digestible bite-sized chapters that encourage daily actions to becoming a better leader. Key takeaways from the book include: Believe in Yourself. Believing in oneself is the essential first step in developing leadership competencies. The best leaders are learners, and they can't achieve mastery until and unless they truly decide that inside them there is a person who can make and difference and learn to be a better leader than they are right now. Aspire to Excel. To become an exemplary leader, people must determine what they care most about and why they want to lead. Leaders with values-based motivations are the most likely to excel. They also must have a clear image of the kind of leader they want to be in the future—and the legacy they want to leave for others. Challenge Yourself. Challenging oneself is critical to learning leadership. Leaders must seek new experiences and test themselves. There will be inevitable setbacks and failures along the way that require curiosity, grit, courage, and resilience to persist in learning and becoming the best. Engage Support. One can't lead alone, and one can't learn alone. It is essential to get support and coaching on the path to achieving excellence. Whether it's family, managers at work, or professional coaches, leaders need the advice, feedback, care, and support of others. Practice Deliberately. No one gets better at anything without continuous practice. Exemplary leaders spend more time practicing than ordinary leaders. Simply being in the role of a leader is insufficient. To achieve mastery, leaders must set improvement goals, participate in designed learning experiences, ask for feedback, and get coaching. They also put in the time every day and make learning leadership a daily habit. Kouzes and Posner offer unrivaled insights into what it means to become an exemplary leader in today's world with their original research and over 30 years of experience studying the practices of extraordinary leadership. They show that anyone can become a better leader if they believe in themselves, aspire to excel, challenge themselves to grow, engage the support of others, and practice deliberately. Learning Leadership challenges readers to do the meaningful and disciplined work necessary to becoming the best they can, using a new mindset and toolkit that can make extraordinary things happen. It's not the once-in-a-while transformational acts that demonstrate leadership. It's the little things that one does day in and day out that pave the path to greatness.

This book provides the most thorough view available on this new and intriguing dimension of workplace psychology, which is the basis of fulfilling, productive work. The book begins by defining work engagement, which has been described as 'an opposite to burnout,' following its development into a more complex concept with far reaching implications for work-life. The chapters discuss the sources of work engagement, emphasizing the importance of leadership, organizational structures, and human resource management as factors that may operate to either enhance or inhibit employees's experience of work. The book considers the implications of work engagement for both the individual employee and the organization as a whole. To address readers' practical questions, the book provides in-depth coverage of interventions that can enhance employees' work engagement and improve management techniques. Based upon the most up-to-date research by the foremost experts in the world, this volume brings together the best knowledge available on work engagement, and will be of great use to academic researchers, upper level students of work and organizational psychology as well as management consultants.

Sponsored by the University Council of Educational Administration, this comprehensive handbook is the definitive work on leadership education in the United States. An in-depth portrait of what constitutes research on leadership development, this handbook provides a plan for strengthening the research-based education of school leaders in order to impact leadership's influence on student engagement and learning. Although research-oriented, the content is written in a style that makes it appropriate for any of the following audiences: university professors and researchers, professional development providers, practicing administrators, and policy makers who work in the accreditation and licensure arenas.

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the verybeginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

With the increase in the number of organizational leadership development programs, there is a pressing need for evaluation to answer important questions, improve practice, and inform decisions. The Handbook is a comprehensive resource filled with examples, tools, and the most innovative models and approaches designed to evaluate leadership development in a variety of settings. It will help you answer the most common questions about leadership development efforts, including: What difference does leadership development make? What development and support strategies work best to enhance leadership? Is the time and money spent on leadership development worthwhile? What outcomes can be expected from leadership development? How can leadership development efforts be sustained?

Is Silence Killing Your Strategy? In his thirty years of working in corporations, Harvard Business School professor Michael Beer has witnessed firsthand how organizational silence derails strategic objectives. When employees can't speak truth to power, senior leaders don't hear what they need to hear about their company's fitness to compete, and employees lose trust in those leaders and become less committed to change. In Fit to Compete, Beer presents an antidote to silence--principles and a time-tested innovative process for holding honest conversations with everyone in your organization. Used by over eight hundred organizations across the globe, the strategic fitness process has helped leaders in a diverse range of industries--including medical technology, information technology, banking, restaurant chains, and pharmaceuticals--hear the raw but necessary truth about the sources of misalignment between their strategies and their organizations. In addition to step-by-step instructions, Beer offers detailed and illustrative case studies of companies that have conducted honest conversations to great effect. He also shows how to apply the process more broadly to a variety of strategic challenges and at multiple levels throughout the organization. Practical, enlightening, and comprehensive, Fit to Compete is the book you should turn to if you to want create winning strategies that your entire company will rally behind.

The Extraordinary Leader: Turning Good Managers into Great Leaders

A Guide for Aspiring School Leaders

Linking a Professional Development & Recognition Programme with Leadership Development in a Magnet Environment

ICMLG 2014

Understanding both leadership and change have been recurrent and popular themes within the business, management and organization studies literature. However, our understanding of leadership and organizational change in combination is far more limited. The Leadership of Organizational Change offers a critical review of the evolution of leadership and organizational change for the past thirty-five years, taking stock of what we know, identifying what we do not know, and establishing how the study of the leadership of change should advance. In the late seventies and early eighties, as interest in managing and leading change was fuelled by the competitive threat of Asia in general and Japan in particular as perceived by western businesses and governments, Burns (1978) writing in his landmark book Leadership at this time, referred to an intellectual crisis: "The crisis of leadership today is the mediocrity or irresponsibility of so many of the men and women in power, but leadership rarely rises to the full need for it. The fundamental crisis underlying mediocrity is intellectual. If we know all too much about our leaders, we know far too little about leadership." While the study of managing change has benefitted from sustained critical scrutiny, particularly in the last decade, it is believed that this is to have been at the expense of critical scrutiny of leading change. The Leadership of Organizational Change critically reviews how the study of leading change has advanced since 1978 and the crisis of intellectual mediocrity.

Conquer the most essential adaptation to the knowledge economy The Fearless Organization: Creating Psychological Safety in the Workplace for Learning, Innovation, and Growth offers practical guidance for teams and organizations who are serious about success in the modern economy. With so much riding on innovation, creativity, and spark, it is essential to attract and retain quality talent—but what good does this talent do if no one is able to speak their mind? The traditional culture of "fitting in" and "going along" spells doom in the knowledge economy. Success requires a continuous influx of new ideas, new challenges, and critical thought, and the interpersonal climate must not suppress, silence, ridicule or intimidate. Not every idea is good, and yes there are stupid questions, and yes dissent can slow things down, but talking through these things is an essential part of the creative process. People must be allowed to voice half-finished thoughts, ask questions from left field, and brainstorm out loud; it creates a culture in which a minor flub or momentary lapse is no big deal, and where actual mistakes are owned and corrected, and where the next left-field idea could be the next big thing. This book explores this culture of psychological safety, and provides a blueprint for bringing it to life. The road is sometimes bumpy, but succinct and informative scenario-based explanations provide a clear path forward to constant learning and healthy innovation. Explore the link between psychological safety and high performance Create a culture where it's "safe" to express ideas, ask questions, and admit mistakes Nurture the level of engagement and candor required in today's knowledge economy Follow a step-by-step framework for establishing psychological safety in your team or organization Shed the "yes-men" approach and step into real performance. Fertilize creativity, clarify goals, achieve accountability, redefine leadership, and much more. The Fearless Organization helps you bring about this most critical transformation.

The Future of Leadership DevelopmentPsychology Press

Do people see you as the kind of leader you want to be? Are your strongest leadership qualities getting in the way of your greatness? After decades of advising and inspiring some of the most eminent chief executives in the world, Lolly Daskal has uncovered a startling pattern: within each leader are powerful abilities that are also hidden impediments to greatness. She's witnessed many highly driven, overachieving leaders rise to prominence fueled by well-honed skill sets, only to falter when the shadow sides of the same skills emerge. Now Daskal reveals her proven system, which leaders at any level can apply to dramatically improve their results. It begins with identifying your distinctive leadership archetype and recognizing its shadow: ■ The Rebel, driven by confidence, becomes the Imposter, plagued by self-doubt. ■ The Explorer, fueled by intuition, becomes the Exploiter, master of manipulation. ■ The Truth Teller, who embraces candor, becomes the Deceiver, who creates suspicion. ■ The Hero, embodying courage, becomes the Bystander, an outright coward. ■ The Inventor, brimming with integrity, becomes the Destroyer, who is morally corrupt. ■ The Navigator, trusts and is trusted, becomes the Fixer, endlessly arrogant. ■ The Knight, for whom loyalty is everything, becomes the Mercenary, who is perpetually self-serving. Using psychology, philosophy, and her own experience, Daskal offers a breakthrough perspective on leadership. She'll take you inside some of the most cloistered boardrooms, let you in on deeply personal conversations with industry leaders, and introduce you to luminaries who've changed the world. Her insights will help you rethink everything you know to become the leader you truly want to be.

Reshaping the Landscape of School Leadership Development

Paths To Self-insight and Professional Growth

The Oxford Handbook of Leadership and Organizations

People can learn how to lead. This was the position John H. Zenger and Joseph R. Folkman took when they wrote their now-classic leadership book The Extraordinary Leader and it's a fact they reinforce in this new, completely updated edition of their bestseller. When it was first published, The Extraordinary Leader immediately attracted a wide audience of aspiring leaders drawn to its unique feature: the extensive use of scientific studies and hard data, which served to demystify the concept of leadership and get readers thinking about the subject in a pragmatic way. Now, Zenger and Folkman revisit the subject to address leaders' most pressing concerns today. The result is an up-to-date, essential leadership guide for the twenty-first century that includes: Late-breaking research on the psychology of leadership New information on leading in a global environment A breakthrough case study on measuring improved leadership behavior Studies revealing the importance of follow-through The Extraordinary Leader is a remarkable combination of expert insight and extensive research. The authors analyzed more than 200,000 assessments describing 20,000 managers by far the most expansive research ever conducted for a leadership book. Zenger and Folkman have created the leadership book of the ages. The Extraordinary Leader explains how to build leadership skills that will take you and your organization to unimagined success.

This book is modeled after "Eighty-eight Assignments for Development in Place," one of CCL's most popular publications. In the years since that report was published, we have learned more about development in place--from research, from working with managers and organizations that are making use of developmental assignments, and from our colleagues in the field. We believe it is time once again to consolidate our knowledge into one tool to help leaders add developmental assignments to their own jobs and help others do the same. The tables inside this book are full of assignments. You'll also find cross-references to CCL's assessment tools: 360 by Design, Executive Dimensions, Benchmarks, Prospector, and Skillscope. If you want to target the development of specific competencies as a result of receiving feedback from any of these, the cross-references will direct you to appropriate assignments.

The Psychology of Politicians explores a topic which fuels public and media debate yet is under-researched and has potentially far-reaching consequences for the success of our political systems. Focusing on research with democratically elected representatives from the UK, Poland and Italy, and on the political behaviour of a former US President and voters' perceptions in the emerging democracy of Ukraine, this book is packed with psychological insights. Using quantitative and qualitative methodologies, the contributors chart the progress of the individual politician from selection as a candidate to becoming established in Parliament examining their qualities as communicators, thinkers and leaders. The impact of work and non-work pressures on their mental well-being and capacity to handle a crisis are probed and the roles of personality traits in politicians' values and in public perceptions of our elected representatives are highlighted.

"A review of leadership development best practices in for-profit organizations was conducted. Practices discussed in this report include formal development programs, 360-degree feedback, executive coaching, job assignments, mentoring, networks, reflection, action learning and outdoor challenges. Additionally, five organizations that are popularly recognized for their leadership development practices are highlighted in this report. Highlights include information regarding the organizational philosophy, values, and mission as well as information on how various leadership development practices are implemented and integrated. Best practice principles are drawn from this research and implications for their use within the U.S. Army are discussed."--DTIC.

How to Keep Getting Extraordinary Things Done in Organizations

Proceedings of the 24th International Conference on Interactive Collaborative Learning (ICL2021), Volume 2

The current financial crisis highlights the need to rethink business leadership and the role of business schools in helping firms develop the leaders of the future. This book brings together the perspectives of deans of top international business schools, and the views of CEOs and senior business leaders.

PRAISE FOR COACHING FOR LEADERSHIP "What a resource! In Coaching for Leadership, the world's best coaches come together to present an advanced tutorial on the art of coaching. Anyone interested in becoming an executive coach, either as an individual practice or within his or her organization, must immediately buy and read this essential hands-on guide" —Sally Helgesen, author The Female Vision and The Web of Inclusion "This exceptional book is a must read for individuals at all levels of organization. Coaches, HR managers, and executives hoping to become coaches will benefit greatly from the concepts, practices, and techniques brought to light in Coaching for Leadership." —Vijay Govindarajan, professor at Tuck School of Business at Dartmouth; best-selling author of The Other Side of Innovation: Solving the Execution Challenge "This book is very important and valuable for executives who are reaching retirement and moving into another important area of contribution: coaching others to become effective executives. It is no less significant for corporate HR executives who are increasingly called upon to manage coaching interventions on behalf of their companies' leaders." —D. Quinn Mills, professor, Harvard Business School "Coaching for Leadership explores powerful new ways to motivate your entire organization. Individuals at every level of the company will benefit from the concepts in this book." —Ken Blanchard, author, Leading at a Higher Level and The One-Minute Manager

First Published in 2010. Routledge is an imprint of Taylor & Francis, an informa company.

Curriculum Leadership Development is an up-to-date, user-friendly textbook offering unique approaches to help readers understand the complexity of curriculum leadership. It is grounded in current and relevant theory, research, legislation, and application in the closely related areas of curriculum leadership, development, and scholarship. The text solidifies the concepts of curriculum and leadership in experiential learning contexts, and promotes democratic action and critical thinking. Author Carol A. Mullen uses a descriptive, qualitative approach that integrates case study, data analysis, personal reflection, and lessons learned. Among the most important elements of the book are: *the inclusion of the voice and curricular experiences of the professional student who is a seasoned teacher or beginning adminstrator; *detailed illustrations of practitioners' experiences as curriculum makers and action researchers; *an articulation of the links among curriculum development, constructivist curricula, and mentoring scaffolds; and *practical exercises to accompany case studies. Graduate and advanced undergraduate students in education will find this textbook of value in their coursework, as will curriculum professionals who teach practicing teachers.

Developmental Assignments

Developing Leadership Talent

Global Business Leadership Development for the Fourth Industrial Revolution

The SAGE Handbook of Management Learning, Education and Development

The Leadership Gap

Enhancing Organizational Performance

A prevalent way of viewing leadership is as a process of social influence. In this report, the authors offer an alternative perspective: seeing leadership as a process of social meaning-making. The practical and research implications of such a view are considered.

As the leadership field continues to evolve, there are many reasons to be optimistic about the various theoretical and empirical contributions in better understanding leadership from a scholarly and scientific perspective. The Oxford Handbook of Leadership and Organizations brings together a collection of comprehensive, state-of-the-science reviews and perspectives on the most pressing historical and contemporary leadership issues - with a particular focus on theory and research - and looks to the future of the field. It provides a broad picture of the leadership field as well as detailed reviews and perspectives within the respective areas. Each chapter, authored by leading international authorities in the various leadership sub-disciplines, explores the history and background of leadership in organizations, examines important research issues in leadership from both quantitative and qualitative perspectives, and forges new directions in leadership research, practice, and education.

Based on the popular Developing Leadership Talent program offered by the acclaimed Center for Creative Leadership, this important resource offers a nuts-and-bolts framework for putting in place a leadership development system that will attract and retain the best and brightest talent. Step by step, the authors explain how alignment with strategic goals and organizational purpose and effective developmental experiences are the backbone of a successful leadership program. An authoritative and useful book, Developing Leadership Talent is an essential tool for any leadership program.

Leadership Development explores how leaders gain and use self-knowledge for continuous improvement and career development and describes how leaders help themselves and the people with whom they work, understand themselves, and become more self-determined, continuous learners, and make the most of resources, such as feedback and coaching. This book explains why leaders need support for self-insight and professional growth in today's business environment. It explores dimensions of effective leadership in light of business, technological, and economic trends. Focusing on the importance of leaders developing accurate self-understanding, the book defines self-insight, outlines the meaning of internal strength and resilience for self-regulation, and considers how leaders attain a meaningful and realistic sense of self-identity. This volume illustrates ways organizations support these psychological processes. Leadership development is viewed as a comprehensive, continuous process that includes evaluating organizational needs and individual competencies, setting goals for career development and performance improvement, offering needed training and growth experiences, providing feedback, and tracking change in behavior and performance over time. It describes how leaders react to feedback and how 360-degree feedback survey methods and executive coaching help leaders attain and apply self-insight to enhance their performance. In addition, this book considers challenges and opportunities for leadership development, including how leaders overcome career barriers and become continuous learners.

Writings on Leadership from the World's Greatest Coaches

Leadership Development

A Handbook of Essential Theory and Research

Proceedings of the 2nd International Conference on Management, Leadership and Governance

Leadership as Meaning-making in a Community of Practice

Evolving Leaders: A Model for Promoting Leadership Development in Programs

The modern notion of humanism centres on the core qualities in all humans: agency, dignity, and development; primarily concerned with addressing contemporary human needs, concerns and problems. This book has an interdisciplinary focus on the development of human capacity at all levels, with the view that higher education is well suited for.

Leadership pervades every aspect of organizational and social life, and its study has never been more diverse, nor more fertile. With contributions from those who have defined that territory, this volume is not only a key point of reference for researchers, students and practitioners, but also an agenda-setting prospective and retrospective look at the state of leadership in the twenty-first century. It evaluates the domain and stretches it further by considering leadership scholarship from every angle, concluding with an optimistic look at the future of leaders, followers and their place in organizations and society at large. Each section represents a distinctive slant on leadership: - Macro perspectives - including strategic leadership, organization theory, charismatic leadership, complexity leadership, and networks. - Political and philosophical perspectives - including distributed leadership, critical leadership, ethics, the military and cults. - Psychological perspectives - including personality, leadership style and contingency theories, transformational leadership, exchange relationships, shared leadership, cognition, leadership development, gender, trust, identity and the 'dark side' of leadership. - Cultural perspectives - including spirituality, aesthetics, and creativity. - Contemporary and emergent perspectives - followership, historical methods, virtual leadership, emotions, image, celebrity, and the quest for a general theory of leadership

The conference committee encourages contributions on this wide range of topics through the use of a variety of rigorous approaches, including theoretical and empirical papers employing qualitative, quantitative and critical methods. Action-based research, case studies and work-in-progress/posters are enthusiastically welcomed. PhD research, proposals for roundtable discussions, practitioner contributions and product demonstrations based on the conference themes are also invited.

This text offers comprehensive coverage of the design and use of qualitative methods in leadership research. The book equips leadership researchers at all levels with the knowledge to make informed choices of research strategies. The second edition features 50% new research and includes new developments in qualitative research methods.

The Leadership Challenge

Total quality management (TQM), reengineering, the workplace of the twenty-first century--the 1990s have brought a sense of urgency to organizations to change or face stagnation and decline, according to Enhancing Organizational Performance. Organizations are adopting popular management techniques, some scientific, some faddish, often without introducing them properly or adequately m

Performance reviews the most popular current approaches to organizational change--total quality management, reengineering, and downsizing--in terms of how they affect organizations and people, how performance improvements can be measured, and what questions remain to be answered by researchers. The committee explores how theory, doctrine, accepted wisdom, and personal experien

Alternative organization structures such as teams, specialist networks, associations, and virtual organizations are examined. Enhancing Organizational Performance looks at the influence of the organization's norms, values, and beliefs--its culture--on people and their performance, identifying cultural "levers" available to organization leaders. And what is leadership? The committee sorts through a v

skills related to leadership effectiveness. The volume examines techniques for developing these skills and suggests new competencies that will become required with globalization and other trends. Mergers, networks, alliances, coalitions--organizations are increasingly turning to new intra- and inter-organizational structures. Enhancing Organizational Performance discusses how organizations coo

explores the changing missions of the U.S. Army as a case study that has relevance to any organization. Noting that a musical greeting card contains more computing power than existed in the entire world before 1950, the committee addresses the impact of new technologies on performance. With examples, insights, and practical criteria, Enhancing Organizational Performance clarifies the natu

performance improvement. This book will be important to corporate leaders, executives, and managers: faculty and students in organizational performance and the social sciences: business journalists: researchers: and interested individuals.

Although leadership development is widely acknowledged as important, our understanding of it is largely implicit. This has made programs that seek to promote it difficult to design and implement, and challenging to evaluate effectively. The model presented in this report specifies how programs can affect a key aspect of leadership development--the psychological development of the individual.
