Presently, I am teaching a group of students in Hong Kong to play by ear. Many of them  
have difficulty reading the standard music notation. They want to play the piano but  
reading music slows them down. In the process of teaching, I started coming up with  
this method that works effectively for them. Thats how I started teaching them how to  
play by ear a year ago. In the process, I started coming up with a method that works  
effectively for them. Most people in Hong Kong are aware of another kind of music  
notation that is used widely among the older generation. The system is simple, known  
by the Chinese as Jianpu which means simplified music notation. We sometimes see  
this Asian Music Notation in the older books but we seldom pay much attention to it  
because weve been trained to study the Western standard music notation when

learning music. In the process of teaching my students to play by ear, I discover that they pick up this Asian Numeric Music Notation easily, and their play by ear skill thrives as a result. One of my students started playing by ear publicly as a church pianist half a year into the course. He is even able to compose his music at the piano and performs for us. You should see the glowing joy on his face. In the Play By Ear series, I provide you with many tips and analysis to show you how to take full advantage of this system. As I said earlier, it only takes a few hours to learn the system, maybe only one hour. That's how simple the system is. You don't believe me? Tell me about it after you learn the system from the PBE course. To guide you to use the system comfortably, I provide 40 songs in Play By Ear Volume 1 for you to work on, so that you get lots of practice to become proficient with the Asian Music Notation. By the end of the course, you will be able to notate your own songs in this numeric notation. It totally simplifies the thought process when you play songs. To me this is most valuable because it frees the student from reading the more complicated music staff notation, and helps the student to acquire a QUIET mind to listen to the sounds deeply, to play with ease and with creative freedom. Level: Beginners to Advanced In this course, you will learn 10 steps to start playing songs by EAR. The principles of playing by ear are laid out in detail. I also demonstrate in audios and in 40 videos with animated dotted keyboards to teach you how to play in different keys with the Asian Numeric Music Notation. Each video shows a song demonstrated in at least 3 keys. This is a further look at the approach I take in this Series. Think in SCALE TONE NUMBERS to play BY EAR. To play a song by ear, first limit yourself to the 7 scale tones of a key. I use software-animated videos that show you

clearly how to apply the simple Asian Music Notation to playing songs by ear. I first demonstrate how this is easily done in the key of C. Play song easily in ALL 12 KEYS What you can do to the key of C can easily be done to any key, even in the more difficult keys such as Db key, B key or F# key. The thinking and application is CONSISTENT in all 12 keys. In my videos, using 40 songs, I show you how to apply the Asian Numeric Music Notation to playing songs in all 12 different keys. I purposely also choose some of the harder keys to play in (B, Db, F#) so that you can see how easy the system is once your thinking is clear. Playing in all keys: Simplified FINGERING and HANDSHAPES Learn to LISTEN DEEPLY A lot of ear training programs want to help us to LISTEN DEEPLY to the sounds. My approach uses songs to help you listen DEEPLY to the tones you play rather than naming the intervals such as M6, m6, m2, M2, m7 or M7 etc. If playing songs by ear is what you want, this is perfect for you. If you want to learn sound intervals and distinguish them, you would have to go for ear training software for those drilling exercises. Have fun, Rosa

A Must-Have Handbook for Pianists and Organists! The musically talented and creative Jerome Taylor is a native of Chicago Illinois born with an unparalleled musical talent and has spent a lifetime perfecting his God-given gift. He has served as a church musician, minister of music, music professor and has now added author to his list of accomplishments. Recognizing that many musicians need to and wish to be able to play traditional hymns and gospel songs but are not able to do so because of their inability to read music, Mr. Taylor has written a manual to enable these musicians in their work. The manual, "Modern Chord Changes to Favorite Hymns" provides a vehicle for musicians to learn the chords and progressions that will revolutionize their ability to enhance their natural talent in music. The manual has been showcased at the prestigious Hampton University Ministers' Conference and Choir Guild and the Gospel Music Workshop of America and was well received. The first printing of this valuable book was sold out in a matter of days upon its release! Hailed as a "must have" handbook for today's musician in the capacity of intermediate to advanced levels, "Modern Chord Changes to Favorite Hymns" has proven to be an asset for the keyboardist who finds it difficult to "figure out" the complex chord voicings and progressions in today's Gospel and R&B music. Some of the hymns included

are: Holy, Holy, Holy....Battle Hymn of the Republic.....Near The Cross .....My Faith Looks Up To Thee.....Pass Me Not.....What A Friend We Have In Jesus.....Amazing Grace...Have Thine Own Way and many, many others. All chords are spelled out for the Right Hand, Left Hand and Bass Pedal.

(Piano). This cutting-edge keyboard method is a total step-by-step approach to creating keyboard parts spontaneously. Rhythmic and harmonic concepts are applied in all keys, and are then used as a basis for developing specific solutions in rock, pop, ballad, funk, new age, country and gospel styles. Endorsed by Grammy winners, top educators, and Keyboard magazine.
