of climate change.

Building on a sound

understanding of the  
links between climate  
change and tourism, this  
book shows how the  
tourism sector might  
best respond. It not only  
focuses on the roles of  
supportive policies and  
institutions in ensuring a  
strong "enabling

practical responses, but also on the practical responses themselves.

This practical approach is presented through a large number of case studies and examples which illustrate how policy and industry initiatives have been implemented in tourism, and if or why they were successful. The majority of examples come from

places such as the Caribbean, Spain, the Maldives, Nepal, and the UK, as well as Australia, New Zealand and other parts of the Pacific. The examples are presented within an overall framework that facilitates the translation of adaptation and mitigation policies into practice. This book offers the tourism
