The notion of “creative cities” - where cultural activities and creative and cultural industries play a crucial role in supporting urban creativity and contributing to the new creative economy - has become central to most regional and urban development strategies in recent years. A creative city is supposed to develop imaginative and innovative solutions to a range of social, economic and environmental problems: economic stagnancy, urban shrinkage, social segregation, global competition or more. Cities and regions around the world are competing to attract creative industries and knowledge-intensive industries in order to become more competitive. These places are seeking new strategies to combine economic development with quality of place that will increase economic productivity and encourage growth. Against this increasing interest in creative cities, this volume offers a coherent set of articles on sustainable and creative cities, and addresses modern theories and concepts relating to research on sustainability and creativity. It analyzes principles and practices of the creative city for the academics with different approaches from different disciplines to provide a comprehensive and holistic overview of creativity and sustainability of the city, linking research and practice. In doing so, it puts forward ideas about stimulating the production of an innovative knowledge for a creative and sustainable city, and transforming a specific knowledge into a general common knowledge, which suggests best future policy actions, decision-making processes and choices for the change towards a human sustainable development. Inspector Chen Cao of the Shanghai Police Bureau is summoned by an official of the party to take the lead in a corruption investigation - one where the principle figure and his family have long since fled to the United States and beyond the reach of the Chinese government. But he left behind the organization and his partners-in-crime, and Inspector Chen is charged to uncover those responsible and act as necessary to end the corruption ring. In a twisting case that takes him from Shanghai, all the way to the U.S., he uncovers a compelling crime novel and a insightful, moving portrayal of everyday life. The Emperor's Sword is the next installment in the critically acclaimed, award-winning Inspector Chen series.

This book continues the editors' work (started in the volume "Masters of Political Science") of highlighting and re-evaluating the contributions of the most important political scientists who have gone before. Its basis is the belief that the future development and sophistication of the discipline will benefit from a critical understanding of the works of early political "giants" whose contributions are presented and analysed: Gabriel A. Almond, Raymond Aron, Philip Converse, Maurice Duverger, Stanley Hoffmann, Paul Lazarsfeld, Robert A. Dahl, and others. The book also includes a review and consider the contributions of these maestri to the study of contemporary democracy, political culture, electoral systems, political communication, the transformation of capitalism and state formation in Europe. Maestri of Political Science is aimed not only at a new generation of political scientists but is a valuable opportunity for established scholars to see new light through old windows. In Cents and Sensibility, an eminent literary critic and a leading economist make the case that the humanities—especially the study of literature—offer economists ways to make their models more realistic, their predictions more accurate, and their policies more effective and just. Arguing that Adam Smith's heirs include Austen, Chekhov, and Tolstoy as much as Keynes and Friedman, Gary Saul Morson and Morton Schapiro trace the connection between Adam Smith's great classic, The Wealth of Nations, and his less well-known work, Emma. Jane Austen invented her groundbreaking method of novelistic narration in order to give life to the empathy that Smith believed essential to humanity. More than anyone, the great writers can offer economists something they need—a richer appreciation of behavior, ethics, culture, and narrative. Original, provocative, and inspiring, Cents and Sensibility demonstrates the benefits of a dialogue between economics and the humanities and also shows how looking at real-world problems can revitalize the study of literature.

This collection of essays highlights how given Alpine territories in Austria, Italy, and Switzerland are currently facing challenges imposed by migration, the barriers and limitations they are encountering, and the extent to which migration triggers policy and territorial innovations that can generate beneficial impacts for both migrants and local inhabitants. Contributors here include practitioners and social workers who have experimented with innovative reception and integration pathways, as well as researchers with diverse disciplinary backgrounds, including geographers, sociologists, political scientists, social anthropologists, economists, and legal experts. The book draws on empirical and theoretical investigations, research actions implemented within the framework of large EU projects, and exploratory case studies and storylines of welcoming reception initiatives. It will appeal to practitioners, social scientists, and policy makers interested in both understanding the determinants that affect migrant exclusion and inclusion in Alpine territories and developing reception and integration initiatives of advantage to both migrants and hosting asylum seekers in mountain areas.

The book analyzes the intertwining of aesthetics and ethics in experiences characterized by a break of representational capabilities, such as encounters with nature and art. It also notes that the prerequisite for such an experience concerns expectations and authenticity, and the aftermath engenders wonderment and sublimity, as a common root to aesthetic and ethics. Various philosophical positions and interpretation and contextualization of material is achieved via sections with art examples.

When the murder of a woman is reported to the Shanghai police while Inspector Chen is on vacation, Sergeant Yu is forced to take charge of the investigation. The victim, Yin Lige, a novelist known for her banned book, has been found dead in her tiny, humble room off the stairwell of a converted multi-family house. It seems that only a neighbor could have committed the crime, for the building is kept locked at night. But there is no apparent motive. Sergeant Yu tries to unravel the reclusive woman's past and begins to realize it may have larger political implications. The Cultural Revolution might be more than 30 years in the past, but its effects can still be felt at every level of Chinese society. From the Trade Paperback edition.

3. Jasek, Charles. *Written in 1894, The Viceroy* is one of the most acclaimed masterworks of Italian realism. The novel follows three generations of the aristocratic Uzeda family as it struggles to hold on to power in the face of the cataclysmic changes rocking Sicily. As Garibaldi's triumphs move Italy toward unification, the Uzedas try every means to retain their position. De Roberto's satirical and mordant pen depicts a cast of upper-class schemers, headed by the old matriarch, Donna Teresa, and exemplified by her arrogant and totally unscrupulous son, Consalvo, who rises to political eminence through lip service, double-dealing, and hypocrisy. The Viceroy is a vast dramatic panorama: a new world fighting to shrug off the viciousness and iniquities of the old.

An integrated, global view of macroeconomics, showing the connections between goods markets, financial markets, and labour markets worldwide. This is a book rooted in the real-world: from the major economic crisis of the late 2000s to the profound economic effects caused by the COVID-19 pandemic, from monetary policy in the US, to Brexit, the problems of the Euro area and growth in China, it will help your students make sense not only of current macroeconomic events but also those that may unfold in the future.

Antonio Gramsci is widely celebrated as the most original political thinker in Western Marxism. Among the most central aspects of his enduring intellectual legacy is the concept of subalternity. Developed in the work of scholars such as Gayatri Spivak and Ranajit Guha, subalternity has been extraordinarily influential across fields of inquiry stretching from cultural studies, literary theory, and postcolonial criticism to anthropology, sociology, criminology, and disability studies. Almost every author whose work touches upon subalterns alludes to Gramsci’s formulation of the concept. Yet Gramsci’s original writings on the topic have not yet appeared in full in English. Among his prison notebooks, Gramsci devoted a single notebook to the theme of subaltern social groups. Notebook 25, which he entitled “On the Margins of History (History of Subaltern Social Groups),” contains a series of observations on subaltern groups from ancient Rome and medieval communes to the period after the Italian Risorgimento, in addition to discussions of the state, intellectuals, the methodological criteria of historical analysis, and reflections on utopias and philosophical novels. This volume presents the first complete translation of Gramsci’s notes on the topic. In addition to a comprehensive translation of Notebook 25 along with Gramsci’s first draft and related notes on subaltern groups, it includes a critical apparatus that clarifies Gramsci’s history, culture, and sources and contextualizes these ideas against his earlier writings and letters. Subaltern Social Groups is an indispensable account of the development of one of the crucial concepts in twentieth-century thought.

**Benjamin G. Kohl (1938-2010) taught at Vassar College from 1966 till his retirement as Andrew W. Mellon Professor of the Humanities in 2001. His doctoral research at The Johns Hopkins University was directed by Frederic C. Lane, and his principal historical interests focused on northern Italy during the Renaissance, especially on Padua and Venice. His scholarly production includes the volumes *Padua under the Carrara, 1318-1405 (1998)*, and *Culture and Politics in Early Renaissance Padua (2001)*, and the online database *The Rulers of Venice, 1332-1524 (2009)*. The database is eloquent testimony of his priority attention to historical sources and to their accessibility, and also of his enthusiasm for collaboration and sharing among scholars. Everybody wants to be creative. Creativity makes life more fun, more interesting and more full of achievement, but too many people believe that creativity is something you are born with and cannot be learned. In *How to Have Creative Ideas* Edward de Bono - the leading authority on creative thinking - outlines 62 different games and exercises, built around random words chosen from a list, to help encourage creativity and lateral thinking. For example, if the task were to provide an idea for a new restaurant and the random word chosen was 'cloak', ideas generated might be: a highwayman theme; a Venetian theme with gondolas; masked waiters and waitresses. Or, if asked to make a connection between the two random words 'desk' and 'shorts', readers may come up with: both are functional; desks have 'knee holes' and shorts expose the knees; traditionally they were both male-associated items. All the exercises are simple, practical and fun, and can be done by anyone.**

**An autobiographical statement of the author's belief in the global approach to development and world problems. How can the human species survive the crisis of its own extraordinary techno-scientific success? In this truly unique book Aurelio Peccei shows us that the solution cannot be found in external factors. It must lie in re-establishing a sound cultural balance within man himself so that he becomes capable of living in harmony with the new human condition and changed world environment. Only by a cultural revolution which changes the human quality can we control and orient the material revolutions. Aurelio Peccei's distinguished career in industry, conservation, international affairs and as a counsellor on major world problems needs little introduction. He was a founder-member of the Club of Rome in 1968 and has been a member of its Executive Committee ever since. Inevitably he draws upon his wisdom and experience to highlight the arguments in his book**

### Sustainable City and Creativity

Together these countries pioneered new technologies that have made them ever richer.

Taking heat from officials because of his probe into a sensitive corruption case, Chief Inspector Chen Cao of the Shanghai Police Department finds himself caught up in what could be the most dangerous case of his career when the bodies of two young women dressed in identical red mandarin dresses turn up, igniting fears of the city's first sexual serial killer. Reprint. 20,000 first printing.

This book offers an overview of how to manage private art collections, providing essential insights on art wealth management, art investment, art governance, and succession planning for art assets. It offers practical recommendations on sound art collection governance, but also examines the background of art markets and price building, including the influence of fashion and trends. Throughout history, art patronage has played an important role in the wealth of ultra-high-net-worth families and led to private museums funded by philanthropist collectors in order to celebrate their own tastes and leave a lasting legacy. Today, as a result of the growth of art investing by a new generation of wealthy collectors, not only artists, but also wealthy families, sophisticated investors and their close advisors now face a more complex set of financial and managerial needs. As such, the contributions in this book will be of interest to collecting families, family offices, and professional advisors seeking to integrate art into their overall wealth management strategy, and to scholars in the fields of cultural economics, art dealers, curators, and art lovers.

The Intertwining of Aesthetics and Ethics

**The book examines the contemporary art system with a broad and systematic approach, through the application of models of microeconomics and industrial organizations. By breaking down the traditional barriers between different academic disciplines such as art and economics, this book offers a unique opportunity to grasp the complexities of the contemporary art world and provides the tools to conduct a structural analysis of that market. The result is an in-depth analysis of the contemporary art market from an interdisciplinary perspective. While it is not a textbook in the strictest sense, the book offers a concise and effective overview of all actors in the art system, and provides supporting data and valuable information, both conceptual and practical. It is therefore a text that can be used by students wishing to better understand the complex dynamics that govern the contemporary art market, but also by cultural managers, collectors, potential art investors or simply art lovers who need a quick reference. ?**

**The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of “islands” both distinct and connected. Though drawing on philosophers of Europe’s past, Cacciari calls not to resist Europe’s sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today’s politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.**

**We have entered the Anthropocene - the era of massive human impacts on the planet - and the actions of over seven billion residents threaten to destabilize Earth's natural systems, with consequences for human societies. **Olivier Blanchard, former chief economist of the International Monetary Fund (IMF), is author of one of the most important standard macroeconomics textbooks which is used throughout the world. Endorsed by Blanchard himself, Anti-Blanchard Macroeconomics critically analyses prevailing economic theory and policy in comparison with alternative approaches. This textbook is designed to stand alongside Blanchard’s text, or indeed any other standard book on macroeconomics, but it can also be read independently. It provides undergraduate and advanced students with a critical view of the subject, and is also appropriate for scholars interested in a new way of analysing the debate between alternative schools of economic thought.**

As well as his career, is his life now also at risk?

Most books on AI focus on the future of work. But now that algorithms can learn and adapt, does the future of creativity also belong to well-programmed machines? To answer this question, Marcus du Sautoy takes us to the forefront of creative new technologies and offers a more positive and unexpected vision of our future cohabitation with machines.

Qiu Xiaolong's Anthony Award-winning debut introduces Inspector Chen of the Shanghai Police. A young "national model worker," renowned for her adherence to the principles of the Communist Party, turns up dead in a Shanghai canal. As Inspector Chen Cao of the Shanghai Special Cases Bureau struggles to trace the hidden threads of her past, he finds himself challenging the very political forces that have guided his life since birth. Chen must tiptoe around his superiors if he wants to get to the bottom of this crime.

Fifteen years ago, psychologist and educator Howard Gardner introduced the idea of multiple intelligences, challenging the presumption that intelligence consists of verbal or analytic abilities only -- those intelligences that schools tend to measure. He argued for a broader understanding of the intelligent mind, one that embraces creation in the arts and music, spatial reasoning, and the ability to understand ourselves and others. Today, Gardner's ideas have become widely accepted -- indeed, they have changed how we as one of the most important voices writing on these subjects. Now, in *Extraordinary Minds*, a book as riveting as it is new, Gardner poses an important question: Is there a set of traits shared by all truly great achievers -- those we deem extraordinary -- or do matter their field or the time period within which they did their important work? In an attempt to answer this question, Gardner first examines how most of us mature into more or less competent adults. He then examines closely four persons who lived unique and different kind of extraordinariness. Mozart as the master of a discipline, Freud as the innovative founder of a new discipline, Woolf as the great introspect or, and Gandhi as the influencer. What can we learn about ourselves from the experiences of the extraordinary? Interestingly, Gardner finds that an excess of raw power is not the most impressive characteristic shared by superachievers; rather, these extraordinary individuals all have had a special talent for identifying their own strengths and weaknesses, for acing those inevitable setbacks that mark every life. Gardner provides answers to a number of provocative questions, among them: How do we explain extraordinary times -- Athens in the fifth century B.C., the Tang Dynasty in the eighth century, Islamic Society in the late Middle Ages, and New York at the middle of the century? What is the relation among genius, creativity, fame, success, and moral extraordinariness? Does extraordinariness make for a happier, more fulfilling life, or does it simply create a special one?

Becoming Inspector Chen

Published originally in the pages of *Le Monde*, this collection of linked short stories by Qiu Xiaolong has already been a major bestseller in France (Cité de la Pousière Rouge) and Germany (Das Tor zur Roten Gasse), where it and the author was the subject of a major television documentary. The stories in *Years of Red Dust* trace the changes in modern China over fifty years—from the early days of the Communist revolution in 1949 to the modernization movement of the late nineties—all from the perspective of one small street in Shanghai, Red Dust Lane. From the early optimism at the end of the Chinese Civil War, through the brutality and upheaval of the Cultural Revolution, to the death of Mao, the pro-democracy movement and the Tiananmen Square—history, on both an epic and personal scale, unfolds through the bulletins posted and the lives lived in this one lane, this one corner of Shanghai.

Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices*. Other Rooms (in one volume), Portraits and Observations, and The Complete Stories Truman Capote's masterpiece. In *Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.

Chief Inspector Chen Cao of the Shanghai Police Department is the head of the Special Case group and is often put in charge of those cases that are considered politically "sensitive" since, as a rising party cadre, he's regarded by many as a policeman very seriously, despite the pressures put upon him from within and without, and is unwilling to compromise his principles as a policeman in favor of political expedience. However, after the new Minister of Public Security insists that Chen personally take on a 'special assignment', an investigation already begun by Internal Security, he may no longer be able to resist those pressures. The party, increasingly weary of international embarrassment, is unhappy about two recent books that place Mao in a bad light. Now, Jiao, the granddaughter of an actress who was likely one of Mao's mistresses - a woman suspected of being Mao's own granddaughter - has recently quit her job, moved into a luxury apartment, and, without any visible means of support, become a part of a new social set centered around the remnants of pre-Communist Shanghai society. What they fear is that, somehow, she has inherited some artifact or material related to Mao that will, when made public, prove embarrassing. Even though there is no evidence that such even exists, Chen has been charged to infiltrate her social circle, determine if the feared material exists and, if it does, retrieve it quietly, and, in only a few days - because if he can't resolve this 'Mao case' within the deadline, the party will resort to harsher, more deadly means.

3. Jasek, a novelist, writes in 1894, a letter. After five hundred years, the most notorious mystery of the Renaissance is finally solved. The Italian Renaissance is remembered as much for its intrigue as it is for art, with papal politics and infighting among Italy's many city-states providing the gris for Machiavelli's classic work on take-no-prisoners politics, The Prince. The attempted assassination of the Medici brothers in the Duomo in Florence in 1478 is one of the best-known examples of the machinations endemic to the age. While the assailants were the Medici's rival, the Pazzi family, questions have always lingered about who really orchestrated the attack, which has come to be known as the Pazzi Conspiracy. More than five hundred years later, Marcello Simonetta, working in a private archive in Italy, stumbled upon a coded letter written by Federico da Montefeltro, the Duke of Urbino, to Pope Sixtus IV. Using a codebook written by his own ancestor to crack its secrets, Simonetta unearthed proof of an all-out power grab by the Pope for control of Florence. Montefeltro, long believed to be a close friend of Lorenzo de Medici, was in fact conspiring with the Pope to unseat the Medici and put the more malleable Pazzi in their place. In the *Montefeltro Conspiracy*, Simonetta unravels his plot, showing not only how the plot came together but how its failure (only one of the Medici brothers, Giuliano, was killed; Lorenzo survived) changed the course of Italian and papal history for generations. In the course of his gripping narrative, we encounter the period's most colorful characters, relive its tumultuous politics, and discover that two famous paintings, including one in the Sistine Chapel, contain the Medici's astounding revenge.

**“Brimming with ideas. . . . The Origins of Creativity approach[es] creativity scientifically but sensitively, feeling its roots without pulling them out.”—Economist** In a stirring exploration of human nature recalling his foundational work *Consilience*, Edward O. Wilson offers a “luminous” (Kirkus Reviews) reflection on the humanities and their integral relationship to science. Both endeavors, Wilson argues, have their roots in human creativity—the defining trait of our species. By studying fields as diverse as paleontology, evolution, and neurobiology, Wilson demonstrates that creative expression began not 10,000 years ago, as we have long assumed, but more than 100,000 years ago in the Paleolithic Age. A provocative investigation into what it means to be human, *The Origins of Creativity* reveals how the humanities have played an unexamined role in defining our species. With the eloquence, optimism, and pioneering inquiry we have come to expect from our leading biologist, Wilson proposes a transformational “Third Enlightenment” in which the blending of science and humanities will enable a deeper understanding of our human condition, and how it ultimately originated.
