Obstetrics and Gynaecology

Obstetrics and gynecology

Now in its 3rd edition, Lecture Notes: Obstetrics and Gynaecology has been extensively revised and updated to provide a concise and practical introduction to obstetrics and gynaecology for medical

Read Online Lecture Notes Obstetrics And Gynaecology Uregit

students and junior doctors. Starting with a section on basic science, the text is divided into six sections that explain female health needs and their management from the early years to old age. The self-assessment section is now a separate chapter, and includes Extended Matching Questions (EMQs), scenarios for practical history taking for the Objective Structured Clinical Examination (OSCE) and Multiple Choice Questions (MCQs). Part 1 looks at female reproductive anatomy and physiology. Part 2 covers the puberty and menstrual problems of young women, sub-fertility, pregnancy prevention, and sexual problems. Part 3 examines the reproductive years including pregnancy and childbirth. Part 4 covers the mature woman including menstrual problems of the older woman and pelvic pain. Part 5 discusses the older woman including the menopause, incontinence and malignancy including breast cancer. Part 6 demonstrates the importance of public health statistics on the provision of services in obstetrics and gynaecology. Now in two-colour throughout, with a new colour plate section, *Lecture Notes: Obstetrics and Gynaecology* covers the core material needed for O&G courses, written specifically for medical students, nursing students, junior doctors on the Foundation Programme and the first two years of specialist training, midwives, and GPs.

The Lecture Notes Series provides the core information required by medical students --

USMLE Step 2 CK Lecture Notes 2016

***For the seventh edition of Lecture Notes on
Gynaecology, Professor Chamberlain has
been joined by Mr John Malvern. This book,
widely recognised as one of the standard
undergraduate texts on gynaecological
practice, has been revised and updated with
new chapters on urodynamics and
endoscopic hysteroscopic procedures. In all,
this text provides a clear, modern and
authoritative guide to the subject for all
students approaching obstetrics for the first
time. Lecture Notes on Gynaecology
continues to concentrate on the core topics
now expected of medical students, junior
doctors and allied health professionals. This
seventh edition is widely recognised as one***

of the standard undergraduate texts on gynaecological practice and has now been fully updated.

The official Kaplan Lecture Notes for USMLE Step 2 CK cover the comprehensive information you need to ace the USMLE Step 2 and match into the residency of your choice. Up-to-date. The Anatomy and Physiology of Normal Pregnancy, Labour and the Puerperium

Lecture Notes: Obstetrics and Gynaecology provides a concise introduction to obstetrics and gynaecology for medical students and junior doctors. Six sections examine the female development from the early years to old age. The text starts with a section on Basic Science. Self-assessment questions are found throughout the text to enhance knowledge and understanding. Part 1 looks at the female reproductive anatomy and physiology in detail. Part 2 covers the

puberty and menstrual problems of young women, sub fertility, pregnancy prevention and introduces benign diseases, genital tract infections and sexual problems. Part 3 examines the reproductive years. Detailed coverage of the mother and foetus in pregnancy includes problems and diseases in pregnancy, labour and the newborn child development. Part 4 covers the mature woman, and includes abnormal vaginal blood loss, pelvic pain, breast disease and screening for gynaecological cancer. Part 5 discusses the older woman and malignant gynaecological conditions, the menopause and pelvic floor disorders. Part 6 provides an audit of Obstetrics and Gynaecology, looking at statistics in reproductive medicine and gives the answers to self-assessment questions found throughout the text. Lecture Notes: Obstetrics and Gynaecology is written specifically for medical students, junior doctors, midwives and General Practitioners. Review quotes on Previous Editions "Well edited, concise, and a useful source of information." 2nd Opinion - Edinburgh Student Gazette "Thankfully these are nothing like my lecture notes. This book is packed with useful info." Surgo, Glasgow University Medical Journal "A really easy book to read, useful in enabling students to grasp the basics." Northwing - Sheffield Medical Magazine

A 24-year-old woman is referred from the emergency department with sudden onset of left iliac fossa pain and you are the medic on duty... 100 Cases in Obstetrics and Gynaecology presents 100 commonly seen obstetric and gynaecological scenarios. The

patient's history, examination and initial investigations are presented along with questions on the diagnosis and management of each case. The answer includes a detailed discussion on each topic, providing an essential revision aid as well as a practical guide for junior clinicians. Making clinical decisions is one of the most challenging and difficult parts of training to become a doctor. These cases will teach medics and medical students to recognize important obstetric and gynaecological conditions and help them develop their diagnostic and management skills.

Elderly Care Medicine Lecture Notes provides all the necessary information, within one short volume, for a sound introduction to the particular characteristics and needs of elderly patients. Presented in a user-friendly format, combining readability with high-quality illustrations, this eighth edition has been thoroughly revised to reflect advances in knowledge on how disease presents in elderly people, and changes in management practice, particularly regarding stroke, dementia, delirium, and cancer. New for this edition, Elderly Care

revision is necessary. The new edition has been developed as a result of intensive consultation with trainees in OB/GYN as to what they want, what they need and how they learn. The book is organised into two halves covering obstetrics and gynaecology. Within each, the chapters are structured into sections containing pedagogic features such as boxes, highlights and key points for the first time. It contains everything the clinician needs to practice the art of obstetrics and gynaecology and sufficient information to help sub-specialists develop their specific interests. This text is recommended reading for the Royal College of Obstetrics and Gynaecology membership examination. This seventh edition contains 21 new chapters: Anatomy of the Pelvis and Reproductive Tract Placenta and Fetal Membranes Antenatal Care Anaesthesia and Analgesia Recurrent Miscarriage Ectopic Pregnancy Trophoblastic Disease Genetics and Prenatal Diagnosis Drugs and Pregnancy Obstetric Emergencies Prolonged Pregnancy Renal Disease Termination of Pregnancy Imaging in Gynaecology PMS Assisted Reproduction Hysteroscopy and Laparoscopy Sexual Dysfunction Psychological Aspects of Pregnancy Domestic Violence and Sexual Assault - now on MRCOG curriculum Ethical Dilemmas This seventh edition has been significantly updated with a wide range of internationally renowned contributors who are all experts in their field, bringing this book to the cutting edge of knowledge in obstetrics and gynaecology. "It was my favourite textbook when I was working for my examinations and I am still using it. I can recommend this edition to current trainees
