

Lectures On Criminal Procedure 3rd Edition Reprint

1857/58 includes Triennial register of Alumni.

This book investigates the use of duress as a defence in international criminal law, specifically in cases of child soldiers. The prosecution of children for international crimes often only focuses on whether children can and should be prosecuted under international law. However, it is rarely considered what would happen to these children at the trial stage. This work offers a nuanced approach towards international prosecution and considers how children could be implicated and defended in international courts. This study will be of interest to academics and practitioners working in international criminal law, transitional justice and children's rights.

Smith and Hogan's Criminal Law Catalogue

A series of lectures prepared for CAPE(R) Law Students in Anguilla. The text forms part of a series of books prepared from a compilation of lectures written by Justice Don Mitchell (Retd) and Stanley E Reid. It is primarily for use by students in Anguilla who are undertaking advanced law studies in preparation for the CAPE(R) examinations. All lectures are prepared in accordance with the current CAPE(R) syllabus for law. In this Series: Law of Tort Law of Contract Law of Real Property. Criminal Law Principles of Public Law Caribbean Legal Systems In common law jurisdictions, litigants are free to choose whether to procure legal representation or litigate in person. There is no formal requirement that civil litigants obtain legal representation, and the court has no power to impose it on them, regardless of whether the litigant has the financial means to hire a lawyer or is capable of conducting litigation effectively. Self-representation is considered indispensable even in circumstances of extreme abuse of process, such as in 'vexatious litigation'. Intriguingly, although self-

representation is regarded as sacrosanct in common law jurisdictions, most civil law systems take a diametrically opposite view and impose obligations of legal representation as a condition for conducting civil litigation, except in low-value claims courts or specific tribunals. This disparity presents a conundrum in comparative law: an unfettered freedom to proceed in person is afforded in those legal systems that are more reliant on the litigants' professional skills and whose rules of procedure and evidence are more formal, complex, and adversarial, whereas legal representation tends to be made obligatory in systems that are judge-based and offer more flexible and informal procedures, which would seem, intuitively, to be more conducive to self-representation. In *Injustice in Person: The Right to Self Representation*, Rabeea Assy assesses the theoretical value of self-representation, and challenges the conventional wisdom that this should be a fundamental right. With a fresh perspective, Assy develops a novel justification for mandatory legal representation, exploring a number of issues such as the requirements placed by the liberal commitment to personal autonomy on the civil justice system; the utility of

plain English projects and the extent to which they render the law accessible to lay people; and the idea that a high degree of litigant control over the proceedings enhances litigants' subjective perceptions of procedural fairness. On a practical level, the book discusses the question of mandatory representation against the case law of English and American courts and also that of the European Court of Human Rights, the International Criminal Tribunal for the former Yugoslavia, and the Human Rights Committee.

The post-Mao commitment to modernization, coupled with a general revulsion against the lawlessness of the Cultural Revolution, has led to a significant law reform movement in the People's Republic of China. China's current leadership seeks to restore order and morale, to attract domestic support and external assistance for its modernization program, and to provide a secure, orderly environment for economic development. It has taken a number of steps to strengthen its laws and judicial system, among which are the PRC's first substantive and procedural criminal codes. This is the first book-length study of the most important area of Chinese law—the development, organization, and functioning of the criminal justice system in China today. It examines both the formal aspects of the

criminal justice system—such as the court, the procuracy, lawyers, and criminal procedure—and the extrajudicial organs and sanctions that play important roles in the Chinese system. Based on published Chinese materials and personal interviews, the book is essential reading for persons interested in human rights and laws in China, as well as for those concerned with China's political system and economic development. The inclusion of selected documents and an extensive bibliography further enhance the value of the book.

Enrico Ferri was a prominent figure in the early development of the field of criminology. The school of

thought that he developed, which came to be known as positivism, sought to identify and address the social, economic and environmental factors that contributed to the emergence of criminal and antisocial behavior in some people. The three lectures in this volume bring together many of Ferri's most influential ideas and theories.
