During the last 30 years, finance has increased not only its share of economic activity but also of people's aspirations. This has transformed society by increasingly organizing it around the search for financial efficiency. Is a society based on fundamental values of free judgment, responsibility and solidarity still possible?

This book brings together a series of papers presented at a University of Montreal interdisciplinary conference held in March 2014 and devoted to various little-known facets of the First World War's cultural and social history. The commemorative activities of the war's centennial triggered the conference, as this anniversary had precipitated a lively renewal of historical reflections on the causes and

consequences of this global conflict. If the commemoration was an occasion to foster a more civic-minded pedagogical approach regarding the meaning of this major historical event, the conference itself strove to engage the rich and substantial body of research about the war that had evolved over the past few decades. While taking national and regional approaches into account, this book also aligns itself with the recent interest in a global history of the Great War that, by not excluding various national traditions, strives to re-examine the causes and consequences of the conflict from a perspective whose scope extends beyond Europe. By engaging in a broader temporal and spatial consideration of the war, this standpoint not only calls into question the relevance of using the nation-state as a singular political and cultural framework with

which to understand the conflict, but also, and especially, strives to more clearly apprehend peripheral geopolitical spaces, particularly Africa and the Americas, in the conflict and to integrate them more effectively.

Quelle fut l'évolution de cette idéologie messianique et millénariste tout au long de sa vie? Enfin quel rôle joua cette idéologie dans ses actions politiques entre 1869 et 1885? Utilisant abondamment des sources manuscrites souvent inédites, la présente analyse de sociologie historique entend situer la personne de Riel dans l'histoire collective du peuple métis. *Nous assistons aujourd'hui à un formidable mouvement de reféodalisation du monde, à la mise en coupe réglée des peuples de l'hémisphère Sud par les grandes sociétés transcontinentales. Deux armes de destruction massive sont à l'oeuvre : la dette et la faim. Par l'endettement, les Etats abdiquent leur souveraineté ; par la faim qui en découle, les peuples agonisent et renoncent à la liberté. Oui, c'est bien l'empire de la honte qui s'est mis subrepticement en place sur la planète. Jean Ziegler, qui témoigne ici d'une connaissance exceptionnelle du terrain, démonte cette formidable machine à broyer et à soumettre.*

**In her new book, Corine Pelluchon argues that the dichotomy between nature and culture privileges the latter. She laments that the political system protects the sovereignty of the human and leaves them immune to impending environmental disaster. Using the phenomenological writings of French philosophers like Emmanuel Levinas, Jacques Derrida, and Paul Ricœur, Pelluchon contends that**

human beings have to recognise humanity's dependence upon the natural world for survival and adopt a new philosophy of existence that advocates for animal welfare and ecological preservation. In an extension of Heidegger's ontology of concern, Pelluchon declares that this dependence is not negative or a sign of weakness. She argues instead, that we are nourished by the natural world and that the very idea of nourishment contains an element of pleasure. This sustenance comforts humans and gives their lives taste. Pelluchon's new philosophy claims then, that eating has an affective, social and cultural dimension, but that most importantly it is a political act. It solidifies the eternal link between human beings and animals, and

*Acadians remain one of the few North American historical minorities which has been able to survive as a distinct ethno-cultural and linguistic group. This fact is all the more striking since this people suffered a deportation and dispersion, and it does not possess its own territory, nor does it have a government of its own. Acadians therefore have continually had to face the issue of autonomy in all its varied forms. The central issue addressed by this book is an inquiry into the nature of the process which has maintained the unique Acadian minority in existence right up to the present day. This study differs from other multidisciplinary analyses of this community principally because it studies the historical continuity of the dynamic of autonomy*

*that has evolved since the beginning of Acadia. The research for this complete chronological framework encompasses a number of intersecting disciplinary approaches at the historical, political, socio-cultural and existential levels. These differing perspectives are harmonized by their common objective of defining the process of autonomization, and the counter-process of heteronomization, which lie at the heart of each of the periods studied. These approaches allow critical openings between the framework of social history, power relationships and the fundamental aspirations of the minority. Over the last decade, political economy has grown rapidly as a specialist area of research and teaching within communications and media studies and is now established*
