Expansionist, a Broker, or a Convener? The answer matters more than you think. . . . Yale professor Marissa King shows how anyone can build more meaningful and productive relationships based on insights from neuroscience, psychology, and network analytics. Conventional wisdom says it's the size of your network that matters, but social science research has proven there is more to it. King explains that the quality and structure of our relationships has the greatest impact on our personal and professional lives. As she illustrates, there are three basic types of networks, so readers can see

Kids around the world love Disney animated films, and many of their parents trust the Disney corporation to provide wholesome, moral entertainment for their children. Yet frequent protests and even boycotts of Disney products and practices reveal a widespread unease with the sometimes mixed and inconsistent moral values espoused in Disney films as the company attempts to appeal to the largest possible audience. In this book, Annalee R. Ward uses a variety of analytical

tools based in rhetorical criticism to examine the moral messages taught in five recent Disney animated films—The Lion King, Pocahontas, The Hunchback of Notre Dame, Hercules, and Mulan. Taking the films on their own terms, she uncovers the many mixed messages they purvey: for example, females can be leaders—but male leadership ought to be the norm; stereotyping is wrong—but black means evil; historical truth is valued—but only tell what one can sell, etc. Adding these messages together, Ward raises important questions about the moral ambiguity of Disney's overall worldview and

While the connections between science fiction and race have largely been neglected by scholars, racial identity is a key element of the subjectivity constructed in American SF. In his Mars series, Edgar Rice Burroughs primarily supported essentialist constructions of racial identity, but also included a few elements of racial egalitarianism. Writing in the 1930s, George S. Schuyler revised Burroughs' normative SF triangle of white author, white audience, and white protagonist and promoted an individualistic, highly variable concept of race instead. While both Burroughs and

Schuyler wrote SF focusing on racial identity, the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored. Beginning in the 1960s, Samuel R. Delany more fully joined SF and African American literature. Delany expands on Schuyler's racial constructionist approach to identity, including gender and sexuality in addition to race. Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature. Connecting the popular fiction of Burroughs, the controversial career of Schuyler, and the postmodern texts of Delany illuminates a gradual change from a stable, essentialist construction of racial

Driven by a vision of science as a key component of an integrated U.S. nation-state, he guided the nascent American Association for the Advancement of Science and also led what was at that point the nation's largest scientific enterprise, the U.S. Coast Survey. In this analytical biography, Axel Jansen explains and explores Bache's efforts to build and shape public institutions as aids to his goal of creating a national foundation for a shared culture—efforts that culminated in his work during the Civil War as one of the founders of the National Academy of Sciences, which he saw as a key symbol of the continued viability of a unified American nation.
