Transitions and Tools that Support

The raging COVID-19 pandemic
has shaken our trust in science.
This volume reviews the evolution
of misconduct and fraud in science,

Download Ebook List Of Predatory Publishers Stop Predatory Journals

the many steps taken to alleviate the problem, and the likelihood that it will continue, given our profit-driven healthcare system. Contents are set in a clinical context, wherein misconduct and fraud affect rational prescribing, a

Download Ebook List Of Predatory Publishers Stop Predatory Journals

process that depends on balancing the risk–benefit ratio of treatments, whether pharmacologic or psychotherapeutic. The clinical consequences can be significant, in that the efficacy of treatments can be vastly overplayed, adverse effects

minimized, and costs to the healthcare system increased if corrective measures are not taken.

Key Features • Discusses the various aspects of cheating in publications: spin, protocol changes; failure to publish negative

studies, including current data on the publishing industry and its issues, like the menace of predatory journals, poor peer review, coupled with lack of early education in ethics, and its significant impact on rational prescribing. • Assesses the

impact of misconduct and fraud on clinicians and healthcare professionals as they attempt to balance the risk-benefit ratio which is supported by multiple contemporary studies. • Presents shocking data on bribes to

physicians, journal editors and other key opinion leaders, exposing the ultimate root of the problem which lies in the economics of the healthcare system, badly in need of repair.

This book argues that journalism

Download Ebook List Of Predatory Publishers Stop Predatory Journals

should treat itself as an academic discipline on a par with history, geography and sociology, and as an art form in its own right. Time, space, social relations and imagination are intrinsic to journalism. Chris Nash takes the

Download Ebook List Of Predatory Publishers Stop Predatory Journals

major flaws attributed to journalism by its critics—a crude empiricism driven by an un-reflexive 'news sense'; a narrow focus on a de-contextualised, transient present; and a too intimate familiarity with powerful

Download Ebook List Of Predatory Publishers Stop Predatory Journals

sources—and treats them as methodological challenges. Drawing on the conceptual frameworks of Pierre Bourdieu, David Harvey, Henri Lefebvre, Michel-Rolph Trouillot and Gaye Tuchman, he explores the ways in

Download Ebook List Of Predatory Publishers Stop Predatory Journals

which rigorous journalism practice can be theorised to meet these challenges. The argument proceeds through detailed case studies of work by two leading iconoclasts—the artist Hans Haacke and the 20th century journalist I.F.

Download Ebook List Of Predatory Publishers Stop Predatory Journals

work "open access": digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other

creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without

losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to

the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers,

The formal scientific communication system is currently undergoing significant change. This is due to four developments: the digitisation of formal

science communication; the economisation of academic publishing as profit drives many academic publishers and other providers of information; an increase in the self-observation of

Previously, these
