Analysis

The involvement of minorities in politics has been the subject of a considerable number of studies. However, these studies are rarely concerned with the political role in Western Europe of both Islam as a mobilising factor, and the Muslims as a

religious group comparable with other confessional groups creating political parties. The importance of political participation of Muslims for the improvement of their social, economic, and cultural position as well as for the establishing of religious infrastructure, has been widely recognized by

politicians and scientists alike. As relative newcomers in Western Europe, most Muslims still occupy a marginal position, which makes their active political participation all the more urgent. Over the last decades, initiatives have been taken in several countries to create Islamic political

parties. At the same, in most countries of Western Europe, the established political parties are nominating members with an Islamic background among their candidates. Furthermore, many discussions have taken place about the feasibility of the integration of Islam within the European social

and political systems. Cabinet ministers and established political parties have developed views about the nature of Islam, which are being crystalized in the policies of the national governments. Central issues in these discussions are, for instance, the compatibility of Islam and

understand the causes of addiction, end enabling behaviors, support your loved one's recovery, and learn how to cope with relapses. If you're the family member of an addict, you may feel confused, guilty, and scared of doing the

wrong thing. And when you don't know how to help, you may find yourself in a codependent role, trying so hard to keep your addicted loved one alive, out of jail, or emotionally appeased that you may actually prevent them from realizing

they need help. Drawing on her own personal experience with her brother's addiction, *Addict in the House* offers a pragmatic, step-by-step guide to dealing with a loved one's addiction, from accepting the reality of the disease to surviving

what may be repeated cycles of recovery and relapse. You'll learn how to encourage your addicted loved one to get help without forcing it, and finally find the strength to let go of codependence. With this revealing and

straightforward book, you'll have the support you need to take an honest look at how addiction has affected the family, cope with the emotional hurdles of having an addicted family member, create and maintain firm boundaries, and make

informed decisions about how to best help your loved one.

Non-communicable diseases (NCDs) are the leading cause of death worldwide, contributing to over 73% of all deaths annually. Each day NCDs cause more than 100,000 deaths, 80% of which occur in low- and middle-income

countries. NCDs, however, are largely preventable, and a great deal of technical knowledge exists about how to prevent and manage them. Why, then, have we, as a global community, not been more successful at reducing this NCD

burden? Does a universal problem not have a universal solution?

Created by an international consortium of experts, this informative and accessible book provides practical guidelines, key learning points, and dynamic, real-

world case studies to aid NCD program managers, policy officers and decision-makers in low- and middle-income countries, so that they can assess interventions for the prevention and control of NCDs. The book was commissioned by the

Prince Mahidol Award Conference (PMAC), an annual international conference centred on policy of global significance related to public health. Non-Communicable Disease Prevention: Best Buys, Wasted Buys and Contestable

Buy's emphasises the importance of context in NCD control and prevention, arguing that the success of an intervention lies in an ability to respond to local needs and environments. The book comprises ten chapters, which

collectively explore the reasons behind, and strategies for, preventing and managing the NCD burden. It spans key themes such as political economy, the transferability of economic evidence, the role of cross-sectoral

policies, the importance of deliberative processes, and health technology assessment. This book is written for the benefit of the global health community, and is primarily targeted at those individuals who are involved in

NCD programs. This book will also be of interest to NCD champions, policy advocates, and educators spearheading the movement for increased visibility of NCDs.

Revised 04/2011 DIABETES
EPIDEMIC and YOU is not a
cliché! It is a mandate for the
awakening of the "silent" millions
worldwide with "normal" fasting
blood sugars and undiagnosed
diabetes. If you have a "normal"

fasting blood sugar, YOU may be one of the undiagnosed millions. YES, I do mean YOU. Since Hippocrates' time, earliest diagnosis provided the greatest opportunity for treatment and cure. This book highlights the

earliest identification of type 2 diabetes by utilizing the insulin assay with the oral glucose tolerance. My cumulative experience of 14,384 oral glucose tolerances with insulin assays established the earliest diagnosis

of prediabetes and diabetes when the blood sugars were normal. Prediabetes is type 2 diabetes. The tolerances were separated according to age groups, from 3D13 years to 81D90+ years. Each group was further divided into

normal glucose tolerances, impaired glucose tolerances, and diabetes mellitus glucose tolerances. YOU, upon testing by oral glucose tolerance, will be in one of these categories. This resource of oral glucose tolerance

with insulin assay is unequaled in world medical literature. The importance of early diagnosis is that the clinical pathology of diabetes – mainly heart disease, high blood pressure, stroke, cataracts, erectile dysfunction,

and other metabolic disorders – occurs not only in those with advanced diabetes, but also in those with "normal" blood sugars. YES, this could happen to YOU! When early diagnosis is coupled with specific therapy, the

DIABETES EPIDEMIC will be arrested and then reversed. Early diagnosis is the goal of this book – beginning with YOU.
