

Lives In Crisis Homeless Young People In Dublin

A passionate and substantive study of the state of youth in modern society and the way that society must act to save the next generation.

This wide-ranging book analyzes the problem of youth homelessness in the western world. Taking into account psychological characteristics while highlighting the major risk factors in the family, at school and in society at large, the authors offer both practitioners and policymakers tools for dealing with all aspects of this issue. Within a clear conceptual and theoretical framework, Jan van der Ploeg and Evert Scholte define the phenomenon of homelessness, drawing on data from across Europe and North America to establish its scope and prevalence among young people today. Always alive to the practical implications of their analysis, they provide a thorough and comprehensive strategy for addressing the plight of the homeless in which prevention and intervention go hand-in-hand.

Homeless Young People in Dublin

Coming Out to the Streets

A Community Response to Runaway and Homeless Youth

Young, Homeless and Forgotten

Reports on the findings of a qualitative study of 40 homeless young people in Dublin city. This work documents their journeys into homelessness and traces the life experiences and events subsequent to them becoming homeless. It also deals with the experience of being homeless; the challenge of surviving on the street; and more.

There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care programs were ignoring the homeless or delivering care to them inefficiently. This book is the report prepared by a committee of experts who examined these problems through visits to city slums and impoverished rural areas, and through an analysis of papers written by leading scholars in the field.

The new homeless

This book offers a fresh way of considering compliance in the youth justice system, drawing on examples from youth justice systems around the world and considering the social context of community-based disposals for young offenders.

Foreword by Nan Roman, President and CEO of the National Alliance to End Homelessness This book explains how to end the U.S. homelessness crisis by bringing together the best scholarship on the subject and sharing solutions that both local communities and national policy-makers can apply now In the Midst of Plenty shifts our understanding of the phenomenon of homelessness away from issues of individual disability and embeds it in larger contexts of poverty, income inequality, housing affordability, and social exclusion. Homelessness experts Shinn and Khadduri provide guidance on how to end homelessness for people who experience it and how to prevent so many people from reaching the point where they have no alternative to sleeping on the street or in emergency shelters. The book is organized around four questions: Who becomes homeless? Why do people become homeless? How do we end homelessness? How do we prevent it? Based on a comprehensive look at relevant research, the authors show that we know how to end homelessness—if we devote the necessary resources to doing so. In the Midst of Plenty: Homelessness and

What to Do About It is an excellent resource for professionals and decision-makers in the homeless services system, as well as for anyone who is interested in helping to end homelessness. It also can be used as a text in undergraduate or masters courses in public policy, sociology, psychology, social work, urban studies, or housing policy. "The knowledgeable and thoughtful authors of this book—two brilliant women who know as much as anyone in the country about the nature of homelessness and its solutions—have done a great service by taking us on a journey through the history of homelessness, how our responses have changed, and how we can end it." Nan Roman, President and CEO National Alliance to End Homelessness. "Shinn and Khadduri's new book is a thorough yet concise examination of what we know about the nature and causes of homelessness, and the crucial lessons learned. This critically important work provides a roadmap to restoring basic housing and income security as viable policy options, in the face of our daunting inequality divide that otherwise threatens millions with destitution and homelessness." Dennis Culhane, Dana and Andrew Stone Professor of Social Policy, University of Pennsylvania "Marybeth Shinn and Jill Khadduri have combined their significant expertise to create an essential guide about the history of modern homelessness and to offer a clear path forward to end this American tragedy. Their policy recommendations on ending homelessness are culled from the best about what we

know works." Barbara Poppe, Executive Director US Interagency Council on Homeless, 2009-2014.

Children in Crisis

America's Youngest Outcasts

One in 30 young people aged 13 to 17 and one in ten 17- to 25-year-olds experience homelessness in any year. Whether they double-up with family or friends, couch surf, live on the streets, or live in motels or shelters, homeless youths are often hidden from public view and the impact of their housing instability may be felt for generations. Homeless: Youth Living on the Streets explores what it is like to be young and homeless, what causes youth homelessness, and what can be done about it.

Evaluation of the Status of Homeless Youth in the State of California

A deeply affecting exposé of America's hidden crisis of disconnected youth, in the tradition of Matthew Desmond and Adrian Nicole LeBlanc For the majority of young adults today, the transition to independence is a time of excitement and possibility. But 4.5 million young people—or a stunning 11.5 percent of youth aged sixteen to twenty-four—experience entry into adulthood as abrupt abandonment, a time of disconnection from school, work, and family. For this growing population of Americans, which includes kids aging out of foster care and those entangled with the justice system, life screeches to a halt when adulthood arrives.

Abandoned is the first-ever exploration of this tale of dead ends and broken dreams. Author Anne Kim skillfully weaves heart-rending stories of young people navigating early adulthood alone, in communities where poverty is endemic and opportunities almost nonexistent. She then describes a growing awareness—including new research from the field of adolescent brain science—that “emerging adulthood” is just as crucial a developmental period as early childhood, and she profiles an array of unheralded programs that provide young people with the supports they need to achieve self-sufficiency. A major work of deeply reported narrative nonfiction, Abandoned joins the small shelf of books that change the way we see our society and point to a different path forward.

Authored by experts in various facets of civil litigation and reviewed by general editor William C. Bochet, LexisNexis Practice Guide New Jersey Trial, Post-Trial, and Appellate Proceedings offers quick, direct, New Jersey-specific answers to questions that arise in day-to-day civil litigation practice. Topically organized, LexisNexis Practice Guide New Jersey Trial, Post-Trial, and Appellate Proceedings covers a range of civil practice issues and takes task-oriented approach to each subject in its action-oriented section headings (e.g. Moving for Relief in Limine, Preparing for Direct Examinations of Experts at Trial, and Making Objections or Requests for Curative Instructions) and multiple checklists in each chapter that guide the reader through each step of a task. This publication covers critical topics such as jury charges, bench trial, opening statements, burdens of proof, trial motions, party and non-party witnesses, expert witnesses, summations, and bringing appeals. It includes numerous practice tips (Strategic Point, Warning, Timing and Exception) to ensure best practices and help the attorney make choices, avoid practice pitfalls and recognize important time limitations and exceptions to general rules. The online product includes practice forms.

Oversight Hearing on Runaway and Homeless Youth

Lesbian, gay, bisexual, transgender, and queer (LGBTQ) youth are disproportionately represented in the U.S. youth homelessness population. In Coming Out to the Streets, Brandon Andrew Robinson examines their lives. Based on interviews and ethnographic fieldwork in central Texas, Coming Out to the Streets looks into the LGBTQ youth's lives before they experience homelessness—within their families, schools, and other institutions—and later when they navigate the streets, deal with police, and access shelters and other services. Through this documentation, Brandon Andrew Robinson shows how poverty and racial inequality shape the ways that the LGBTQ youth negotiate their gender and sexuality before and while they are experiencing homelessness. To address LGBTQ youth homelessness, Robinson contends that solutions must move beyond blaming families for rejecting their child. In highlighting the voices of the LGBTQ youth, Robinson calls for queer and trans liberation through systemic change.

Adolescent homelessness is a growing problem that results in a variety of health challenges. This text is a practical resource designed to promote effective interdisciplinary health and social care interventions targeting adolescents who are homeless or at risk for homelessness. It is based on extensive interdisciplinary experience, reviews of pertinent research and insights and contributions of leading professionals who are directly involved in the care of these young people. Divided into four main sections, Section 1: (Chapters 1-7) section one is a review of the structure and professional involvement of program models targeting youth experiencing or at risk for homelessness to encourage broader understanding and utilization of principles and practices underlying effective programs and identify replicable components. Section 2: (Chapters 8-16) Section two is clinically focused with recommendations for working with adolescents and youth experiencing homelessness and interventions for common and significant medical and mental health conditions, and substance use disorders. Section 3: (Chapter 17) Reviews international agreements regarding stabilization and care of refugee youth and families, description of experiences of refugee children and youth in developed countries, and an outline of conditions from which refugee youth and families have left. Section 4: (Chapters 18 and 19) Engagement of homeless youth in research and future research directions to address needs of youth experiencing homelessness. Written by experts from a variety of disciplines, Clinical Care for Homeless, Runaway and Refugee Youth is a first of its kind text for physicians, social workers, public health workers and any other individual that works directly with these vulnerable populations.

The Crisis in Homelessness

Tell Them Who I Am

In San Diego, not far from the gates of the fantasy world of Disneyland, tent cities lining the freeways remind us of an ugly reality. Homeless individuals are slowing rail traffic between Sacramento and the Bay Area and swarming subway trains in Los Angeles in search of a place to sleep when they ' re not languishing on Skid Row. Drug use among the homeless is plaguing communities, with discarded needles threatening children playing at public parks. And every day across California, thousands of homeless youth who lack safe and stable housing struggle to stay in school, to perform well academically, and to form meaningful connections with their teachers and peers. Since the 1980s, countless research studies have been published on the topic of homelessness in America. Too often, however, social science research on homelessness is narrow in scope, mired in politics, and reliant on questionable assumptions about the root causes of the problem. The severity of the homeless crises afflicting cities requires innovative solutions backed by credible data and objective research. This book examines the causes of homelessness with a focus on unaffordable housing, poverty, mental illness, substance addiction, and legal reform. It examines the state and local policy environment to determine ways in which housing policy, social service programs, and employment opportunities interact to exacerbate, perpetuate, or reduce homelessness. The book also evaluates different strategies being used at the state, county, and local levels to prevent or reduce homelessness. Finally, the authors provide a mix of long-term policy solutions based on their findings that have the greatest potential to reduce homelessness.

Despite Western society's preoccupation with safety and protection, its most vulnerable members still lack access to the level of security that many of us take for granted. In this trailblazing study, Laura Huey illustrates the issue of a ' security gap ' faced by increasing homeless populations: while they are among the most likely victims of crime, they are also among the least served by existing forms of state and private security. Invisible Victims presents the first comprehensive, integrated study of the risks faced by homeless people and their attempts to find safety and security in often dangerous environments. Huey draws not only on current debates on security within criminology, but also on a decade ' s worth of her own field research on the victimization and policing of the homeless. A theoretically and empirically informed examination of the myriad issues affecting the homeless, Invisible Victims makes a compelling case for society to provide necessary services and, above all, a basic level of security for this population.

"Getting healthy is a lot of work but well worth the work. Remember to build on success and don't be overcome by setbacks. ." We often find ourselves dealing with crisis and stress on a daily basis. And soon we decide our fate is our present circumstance. But in this guide you will discover that your crisis does not have to be your fate and in fact you can change your fate. This guide goes beyond self-help and takes you through understanding to overcoming your crisis. Mason Gizard show readers the reality of overcoming crisis and provides tools that can be applied today to become an Overcomer. In this guide Mason explores the following areas: Your Life - Identity Community - Health Faith/Morality Bringing together personal insight and a culmination of insight from his own mentors, Gizard is sharing the most important things you need to know to overcome crisis.

Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent

Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

This ethnographic exploration of contemporary spaces of homelessness takes an expanded view of homeless space, threading together experiences of organizational spaces, routes taken through the city and the occupation of public space. Through engaging with participants' accounts of movement and place, the book argues that young homeless people become fixed in mobility, a condition that impacts on both everyday life and possible futures. Based on an innovative multi-method study of a day centre in London for young homeless people, the book contextualizes spaces of homelessness within the social relations and flows of people that produce the world city. The book considers how the biographical and everyday trajectories of young homeless people intersect with place attachments and forms of governance to produce urban homeless spaces. It provides a new angle on the city made by movement, foregrounding the impact of mobilities shaped by loss, violence and the search for opportunity. The book draws on mental maps, photography, interviews and observation in order to produce an engaging and rich ethnographic account of young homeless people in the city.

The current homeless crisis in the UK has become a major concern across a broad spectrum of society. In particular, homelessness is a tragedy for vulnerable young people, many of whom do not want a hand-out but rather an opportunity to lead a normal life. The issues raised in the book are supported by many real life experiences from young people in crisis.

He observes them, creating portraits that are intimate and objective, while breaking down stereotypes and dehumanizing labels often used to describe the homeless. Liebow writes about their daily habits, constant struggles, their humor, compassion and strength.
