What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of

translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO's aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

Life in Switzerland. The not-made-for-TV version. In 2006, American Chantal Panozzo moved to a spa town near Zurich ready for a glamorous life as an expatriate. She would eat chocolate. She would climb mountains. And she would order cheese in four languages. Instead, she lived a life more in tune with reality than fantasy. Contrary to popular American belief, Switzerland isn't just a setting in a storybook called Heidi. It's a real place where someone with a master's degree in communications can't make a phone call, where you can be hired in one language and fired in another, and where small talk doesn't exist-but phrases

like Aufenthaltskategorien von Drittstaatsangehörigen do. Swiss Life: 30 Things I Wish I'd Known is a collection of both published (The Christian Science Monitor, National Geographic Glimpse, Chicken Soup for the Soul Books, and Brain, Child) and new essays in which Chantal discovers that no matter how hard she wills her geraniums to cascade properly, she will never be a glamorous American expatriate-or Swiss."

All OECD economies are undergoing rapid population ageing, leading to more age diversity in workplaces than ever before as people are not only living longer but working longer. This report presents a business case for embracing greater age diversity at the workplace and debunks several myths about generational differences in work performance, attitudes and motivations towards work. There is far more to Switzerland than beautiful scenery, chocolate, watches, faceless bankers, and spotless cities. The real Switzerland is full of surprises and anything but bland. This small, rugged, landlocked country at the heart of Europe has been a confederation since the first three cantons came together in a defensive alliance in 1291. Four national languages are spoken within its borders. Its present twenty-six cantons are largely autonomous and retain their individual characters. In this grassroots democracy real power lies with the people, who exercise it directly through frequent referendums. & "Swissness&" is, above all, a spirit of independence and of communal involvement. Although it is a model of

peace and multicultural cooperation, with one of the highest standards of living in Europe, Switzerland's prosperity has been hard-won. Historically neutral, it maintains a semi-detached relationship within the European Union. In 2014, a national referendum supported quotas on EU migrants. Despite the several hundred thousand EU nationals living and working within its borders, and almost half a million Swiss working in the EU, this small, resource-poor country appears determined to retain its independence. Culture Smart! Switzerland provides an historical perspective, explores Swiss values and attitudes, and looks at the cultural continuity of festivals and traditions. It helps you navigate the workplace, the neighborhood, and the social scene. It offers crucial insights into Swiss business culture, and more generally on differences in communication style. Swiss people are not always easy to get to know. Proud, industrious, fair-minded, and creative, they respect the individual, which means that while they appreciate clear thinking and direct talking, they avoid confrontation. They will never intrude, yet will willingly help out if asked. Make the effort, and people will respond. Warmth, decency, intelligence, and wit are among the many hidden riches of this fascinating society.

Laba, or Laboratory Basel, was founded in 2005 as a satellite studio affiliated with the École Polytechnique Fédérale de Lausanne. Swiss architect Harry Gugger established the studio with the aim of offering a well-rounded education that will enable architects to understand the design and building process in its entirety, and thus be proactive participants throughout the building process.

Swiss Lessons is a speculative project of the students and teachers of Laba, who here imagine what Switzerland will look like in 2048, from an architectural and urbanist point of view. Extrapolating from current demographic trends, they analyze the potential effects of population growth on land use and infrastructure, and show how the pressures of growth will make boundaries between city and suburb, farmland and wilderness, more porous and complicated. Highly illustrated

with photographs, maps, and plans, the book presents not only a carefully imagined future, but also the part architecture and design can play in making it better.

NEW YORK TIMES BESTSELLER • A powerful memoir of a love that leads two people to find a courageous way to part—and a woman's struggle to go forward in the face of loss—that “enriches the reader's life with urgency and gratitude” (The Washington Post) “A pleasure to read . . . Rarely has a memoir about death been so full of life. . . . Bloom has a talent for mixing the prosaic and profound, the slapstick and the serious.”—USA Today ONE OF THE MOST ANTICIPATED BOOKS OF 2022—Oprah Daily, BookPage Amy Bloom began to notice changes in her husband, Brian: He retired early from a new job he loved; he withdrew from close friendships; he talked mostly about the past. Suddenly, it seemed there was a glass wall between them, and their long walks and talks stopped. Their world was altered forever when an MRI confirmed what they could no longer ignore: Brian had Alzheimer's disease. Forced to confront the truth of the

diagnosis and its impact on the future he had envisioned, Brian was determined to die on his feet, not live on his knees. Supporting each other in their last journey together, Brian and Amy made the unimaginably difficult and painful decision to go to Dignitas, an organization based in Switzerland that empowers a person to end their own life with dignity and peace. In this heartbreaking and surprising memoir, Bloom sheds light on a part of life we so often shy away from discussing—its ending. Written in Bloom's captivating, insightful voice and with her trademark wit and candor, *In Love* is an unforgettable portrait of a beautiful marriage, and a boundary-defying love.

NEW YORK TIMES BESTSELLER □ NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SAN FRANCISCO CHRONICLE, THE HUFFINGTON POST, AND SHELF AWARENESS □

"In Hausfrau, Anna Karenina goes Fifty Shades with a side of Madame Bovary."—Time "A debut novel about Anna, a bored housewife who, like her Tolstoyan namesake, throws herself into a psychosexual journey of self-discovery and tragedy."—O: The Oprah Magazine "Sexy and insightful, this gorgeously

written novel opens a window into one woman's desperate soul."—People Anna was a good wife, mostly. For readers of *The Girl on the Train* and *The Woman Upstairs* comes a striking debut novel of marriage, fidelity, sex, and morality, featuring a fascinating heroine who struggles to live a life with meaning. Anna Benz, an American in her late thirties, lives with her Swiss husband, Bruno—a banker—and their three young children in a postcard-perfect suburb of Zürich. Though she leads a comfortable, well-appointed life, Anna is falling apart inside. Adrift and increasingly unable to connect with the emotionally unavailable Bruno or even with her own thoughts and feelings, Anna tries to rouse herself with new experiences: German language classes, Jungian analysis, and a series of sexual affairs she enters with an ease that surprises even her. But Anna can't easily extract herself from these affairs. When she wants to end them, she finds it's difficult. Tensions escalate, and her lies start to spin out of control. Having crossed a moral threshold, Anna will discover where a woman goes when there is no going back. Intimate, intense, and written with the precision of a Swiss Army knife, Jill Alexander Essbaum's debut novel is an unforgettable story of marriage, fidelity, sex, morality, and most especially self. Navigating the lines between lust and love, guilt and shame, excuses and reasons, Anna Benz is an electrifying heroine whose passions and choices readers will debate with recognition and fury. Her story reveals, with honesty and great beauty, how we create ourselves and how we lose ourselves and the sometimes disastrous choices we make to find ourselves. Praise for *Hausfrau* "Elegant . . . There is much to admire in Essbaum's intricately

constructed, meticulously composed novel, including its virtuosic intercutting of past and present.”—Chicago Tribune “For a first novelist, Essbaum is extraordinary because she is a poet. Her language is meticulous and resonant and daring.”—NPR’s Weekend Edition “We’re in literary territory as familiar as Anna’s name, but Essbaum makes it fresh with sharp prose and psychological insight.”—San Francisco Chronicle “This marvelously quiet book is psychologically complex and deeply intimate. . . . One of the smartest novels in recent memory.”—The Dallas Morning News “Essbaum’s poignant, shocking debut novel rivets.”—Us Weekly “A powerful, lyrical novel . . . Hausfrau boasts taut pacing and melodrama, but also a fully realized heroine as love-hateable as Emma Bovary.”—The Huffington Post “Imagine Tom Perrotta’s American nowheresvilles swapped out for a tidy Zürich suburb, sprinkled liberally with sharp riffs on Swiss-German grammar and European hypocrisy.”—New York

This is an account of the eight years that I spent living and working in Switzerland, with a satiric slant plus comments on investment activities that are illegal in the United States.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold

disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

This book highlights the design of an educational module for an innovative intensive program. The theme is very relevant in the contemporary approach to teaching activities. In fact, thanks to the didactic design, it is possible to obtain a strong relationship between teachers and learners, as required by the Bologna Process. It also allows a stronger definition of learning outcomes. After a general excursus on the subject, the manuscript refers to a recent experience carried out in the Aeolian Island for the Erasmus + Programme, called VVITA. In it, an international group of students and teachers spent a period in the Aeolian Islands, to focus on the features of local vernacular architecture. The attention has

been addressed to the Aeolian House, which is a wonderful example of ante litteram sustainable architecture. On the island of Filicudi, one of the most beautiful of the archipelago, it has preserved its characteristics intact. The book is completed by teachers' lectures and students' final reports. In the spring of 2010, Harvard Business School's graduating class asked HBS professor Clay Christensen to address them—but not on how to apply his principles and thinking to their post-HBS careers. The students wanted to know how to apply his wisdom to their personal lives. He shared with them a set of guidelines that have helped him find meaning in his own life, which led to this now-classic article. Although Christensen's thinking is rooted in his deep religious faith, these are strategies anyone can use. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

New evidence this year corroborates the rise in world hunger observed in this report last year, sending a warning that more action is needed if we aspire to end world hunger and malnutrition in all its forms by 2030. Updated estimates show the number of people who suffer from hunger has been growing over the past three years, returning to prevailing levels from almost a decade ago. Although progress continues to be made in reducing child stunting, over 22 percent of children under five years of age are still affected. Other forms of malnutrition are also growing: adult obesity continues to increase in countries irrespective of their income levels, and many countries are coping with multiple forms of malnutrition at the same time — overweight and obesity, as well as anaemia in women, and child stunting and wasting. Building Primary Care in a Changing Europe

2nd revised edition

For many citizens primary health care is the first point of contact with their health care system, where most of their health needs are satisfied but also acting as the gate to the rest of the system. In that respect primary care plays a crucial role in how patients value health systems as responsive to their needs and expectations. This volume analyses the way how primary care is organized and delivered across European countries, looking at governance, financing and workforce aspects and the breadth of the service profiles. It describes wide national variations in terms of accessibility, continuity and coordination. Relating these differences to health system outcomes the authors suggest some priority areas for reducing the gap between the ideal and current realities.

World Migration Report 2020

This open access book provides insight on current patterns of migration in Switzerland, which fall along a continuum from long-term and permanent to more temporary and fluid. These patterns are shaped by the interplay of legal norms, economic drivers and societal factors. The various dimensions of this Migration-Mobility Nexus are investigated by means of newly collected survey data: the Migration-Mobility Survey. The book covers different aspects of life in the host country, including the family dimension, the labour market and political participation as well as social integration. The book also takes into account the chronological dimension of migration by considering the migrants' arrival, their stay, and their expectations regarding return. Through applying conclusions drawn from the Swiss context to the migration literature on other European and high-income countries, this book contributes to new knowledge on current migration processes in high-income countries. As such it will be a valuable reference work to scholars and students in migration, social scientists and policy makers.

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health

status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

This third and last open access volume in the series takes the perspective of non-EU countries on immigrant social protection. By focusing on 12 of the largest sending countries to the EU, the book tackles the issue of the multiple areas of sending state intervention towards migrant populations. Two "mirroring" chapters are dedicated to each of the 12 non-EU states analysed (Argentina, China, Ecuador, India, Lebanon, Morocco, Russia, Senegal, Serbia, Switzerland, Tunisia, Turkey). One chapter focuses on access to social benefits across five core policy areas (health care, unemployment, old-age pensions, family benefits, guaranteed minimum resources) by discussing the social

protection policies that non-EU countries offer to national residents, non-national residents, and non-resident nationals. The second chapter examines the role of key actors (consulates, diaspora institutions and home country ministries and agencies) through which non-EU sending countries respond to the needs of nationals abroad. The volume additionally includes two chapters focusing on the peculiar case of the United Kingdom after the Brexit referendum. Overall, this volume contributes to ongoing debates on migration and the welfare state in Europe by showing how non-EU sending states continue to play a role in third country nationals' ability to deal with social risks. As such this book is a valuable read to researchers, policy makers, government employees and NGO's.

Mountain mentality Swiss farmers are tough, independent, hard-working, resilient, well-prepared for every kind of natural disaster, and above all staunchly conservative. These characteristics have been passed on to Swiss town-dwellers, who go about their day as if they too were farming a lonely mountain cliff. We can do better The Swiss stubbornly refuse to believe they are doing well and will even dispute the figures that prove

it. So, like the poor donkey chasing the carrot, they pull their collective cart along ever faster, chasing the goal they passed years ago. Peak performers The perceptions of the Swiss being dull, staid, and boring while at the same time displaying a talent for ruthless efficiency and a limitless capacity for hard work are uncomfortably close to the truth. Likewise the clichéd impressions of high mountains, watches, cheese, chocolate bars, and gold bars are genuine. Degrees of unease The diversity of the Swiss is apparent in the degree to which they worry. The German-speakers do little else. The French-speaking Swiss are great visionaries and philosophers with noble thoughts and global dreams. They worry that their Swiss-German compatriots do not share these dreams. The Italian-speaking Swiss are less interested in the solid values of work and have a terrible tendency not to worry nearly enough.
