*This book shows its reader how to get the right currency--and not how to get the currency right, thus avoiding substantial currency risk in the first place.*

*When Peter asked Ellen to marry him some fifty years ago she asked what he thought their life would be like. He answered, I will show you the world. Their own Grand Tour has taken them to seven continents and over a hundred thirty countries, and to favorite sites many dozens of times. Their love of history, geography and wildlife has led them to explore the Polar Regions, the African savanna, and the ruins of great civilizations. In this volume, they recount not only the best venues but share their practical insights into how to plan a perfect trip.*

Reinventing economic development as if small business mattered In cities and towns across the nation, economic development is at a crossroads. A growing body of evidence has proven that its current cornerstone—incentives to attract and retain large, globally mobile businesses—is a dead end. Even those programs that focus on local business, through buy-local initiatives, for example, depend on ongoing support from government or philanthropy. The entire practice of economic development has become ineffective and unaffordable and is in need of a makeover. The Local Economy Solution suggests an alternative approach in which states and cities nurture a new generation of special kinds of businesses that help local businesses grow. These cutting-edge companies, which Shuman calls “pollinator businesses,” are creating jobs and the conditions for future economic growth, and doing so in self-financing ways. Pollinator businesses are especially important to communities that are struggling to lift themselves up in a period of economic austerity, when municipal budgets are being slashed. They also promote locally owned businesses that increase local self-reliance and evince high labor and environmental standards. The book includes nearly two dozen case studies of successful pollinator businesses that are creatively facilitating business and neighborhood improvements, entrepreneurship, local purchasing, local investing, and profitable business partnerships. Examples include Main Street Genome (which provides invaluable data to improve local business performance), Supportland (which is developing a powerful loyalty card for local businesses), and Fledge (a

business accelerator that finances itself through royalty payments). It also shows how the right kinds of public policy can encourage the spread of pollinator businesses at virtually no cost.

Describes the potential for local investment, how it impacts small businesses across America, and the federal regulations limiting such investment.

Why is paying for things painful? Why are we comfortable overpaying for something in the present just because we've overpaid for it in the past? Why is it easy to pay \$4 for a soda on vacation, when we wouldn't spend more than \$1 on that same soda at our local grocery store? We think of money as numbers, values, and amounts, but when it comes down to it, when we actually use our money, we engage our hearts more than our heads. Emotions play a powerful role in shaping our financial behavior, often making us our own worst enemies as we try to save, access value, and spend responsibly. In Dollars and Sense, bestselling author and behavioral economist Dan Ariely teams up with financial comedian and

writer Jeff Kreisler to challenge many of our most basic assumptions about the precarious relationship between our brains and our money. In doing so, they undermine many of personal finance's most sacred beliefs and explain how we can override some of our own instincts to make better financial choices. Exploring a wide range of everyday topics—from the lure of pain-free spending with credit cards to the pitfalls of household budgeting to the seductive power of holiday sales—Ariely and Kreisler demonstrate how our misplaced confidence in our spending habits frequently leads us astray, costing us more than we realize, whether it's the real value of the time we spend driving forty-five minutes to save \$10 or our inability to properly assess what the things we buy are actually worth. Together Ariely and Kreisler reveal the emotional forces working against us and how we can counteract them. Mixing case studies and anecdotes with concrete advice and lessons, they cut through the unconscious fears and desires driving our worst financial instincts and teach us how to improve our money habits. The result not only reveals the rationale behind our most head-scratching financial choices but also offers clear guidance for navigating the treacherous financial landscape of the brain. Fascinating, engaging, funny, and essential, *Dollars and Sense* provides the practical tools we need to understand and improve our financial choices, save and spend smarter, and ultimately live better.

After centuries of economic activity based on extraction, exploitation, and depletion, we now face undeniable environmental threats. New business models that save or restore natural resources are critical. But how can we translate that insight into more sustainable practices? *Building the Green Economy* shows how community groups, families, and individual citizens have taken action to protect their food and water, clean up their neighborhoods, and strengthen their local economies. Their unlikely victories—over polluters, unresponsive bureaucracies, and unexamined routines—dramatize the opportunities and challenges facing the local green economy movement. Drawing on their extensive experience at Global

Equal Time, Equal Value is the first systematic investigation of Time Banking in the United States. Drawing upon detailed case studies and making use of a mix of qualitative and quantitative data this book explores the most popular type of what has been called 'community currencies', in which localized systems based on time or dollar equivalents act as the medium of exchange. As such, it offers rich insights into the challenge presented by Time Banking to both the traditional social service and economic models, through the creation of an environment of reciprocity in which everyone's work has equal

value. Locating Time Banking within the context of community currencies more generally and investigating the particular characteristics that are central to the production of positive outcomes, *Equal Time, Equal Value* examines the organizational characteristics of Time Banks, as well as the motivations of members, types and patterns of exchanges, and the effects on members of Time Bank participation in the USA. A timely and detailed exploration of exchange systems at a time of rising unemployment and declining confidence in global economic structures, this book will appeal to sociologists, cultural geographers and anthropologists with interests in social movements, the sociology of work, health promotion and policy, inequality and questions of the creation of community and sustainability.

Has the greenback really lost its preeminent place in the world? Not according to currency expert Marc Chandler, who explains why so many are—wrongly—pessimistic about both the dollar and the U.S. economy. *Making Sense of the Dollar* explores the many factors—trade deficits, the dollar's role in the world, globalization, capitalism, and more—that affect the dollar and the U.S. economy and lead to the inescapable conclusion that both are much stronger than many people

ProsperityChelsea Green Publishing

You are a good person. You are one of the 84 million Americans who volunteer with a charity, part of a national donor pool that contributes nearly \$200 billion to good causes every year. You wonder: Why don't your efforts seem to make a difference? Fifteen years ago, Robert Egger asked himself this same question as he reluctantly climbed aboard a food service truck for a night of volunteering to help serve meals to the homeless. He wondered why there were still people waiting in line for soup in this day and age. Where were the drug counselors, the job trainers, and the social work team to help these men and women get off the streets? Why were volunteers buying supplies from grocery stores when restaurants were throwing away unused fresh food every night? Why had politicians, citizens, and local businesses allowed charity to become an end in itself? Why wasn't there an efficient way to solve the problem? Robert knew there had to be a better way. In 1989, he founded the D.C. Central Kitchen by collecting unused food from local restaurants, caterers, and hotels and bringing it back to a central location where hot, nutritious meals were prepared and distributed to agencies around the city. Since then, the D.C. Central Kitchen has been named one of President Bill Clinton Sr.'s Thousand Points of Light and has become one of the most respected and emulated nonprofit agencies in the world, producing and distributing more than 4,000 meals a day. Its highly successful 12-week job-training program equips former homeless transients and drug addicts with culinary skills to gain employment in the restaurant business. In *Begging for Change*, Robert Egger looks back on his experience and exposes the startling lack of logic, waste, and ineffectiveness he has encountered during his years in the nonprofit sector, and calls for reform of this \$800 billion industry from the inside out. In his entertaining and inimitable way, he weaves stories from his days in music, when he

## Read Book Local Dollars Sense How To Shift Your Money From Wall Street Main And Achieve Real Prosperity Community Resilience Guides Michael Shuman

encountered legends such as Sarah Vaughan, Mel Torme, and Iggy Pop, together with stories and experiences in the hunger movement -- and recently as volunteer interim director to help clear the beleaguered United Way National Capital Area. He asks for nonprofits to be more innovative and results-driven, for corporate and nonprofit leaders to be more focused and responsible, and for those who contribute their time and money to be smarter and more demanding of nonprofits and what they provide in return. Robert's appeal to common sense will resonate with readers who are tired of the same nonprofit fund-raising appeals and pity-based messages. Instead of asking the "who" or "what" of giving, he leads the way in asking the "how" and "why" in order to move beyond our 20th-century concept of charity, and usher in a 21st-century model of change and reform for nonprofits. Enlightening and provocative, engaging and moving, this book is essential reading for nonprofit managers, corporate leaders, and, most of all, any citizen who has ever cared enough to give of themselves to a worthy cause.
