MBA Entrance Exam

'Situational Judgement Test for the Foundation Years Programme' has been specially designed to help you achieve the highest possible mark in the UKFPO SJT exam. This 2nd edition, in line with the latest GMC Good Medical Practice 2013 Guidelines, contains a wide range of SJT scenarios to ensure that all the core Foundation Programme competencies are comprehensively covered. The SJTs contained in this book have been through a rigorous appraisal process that brought together the experiences of over 50 doctors from varying levels and specialities, including multiple Foundation Training Programme Directors. This ensured that the scenarios, and their respective responses, were valid and relevant to both the SJT exam, and the Foundation Programme curriculum. The book also involved professionals with backgrounds inclusive of medical law, medical ethics, psychology and medical education, all of whom helped in sewing together realistic and challenging scenarios with valuable learning points. The questions in this book were piloted amongst junior doctors to further help validate the consistency of the responses. The explanations provided in this book are supported by numerous references to the GMC guidelines, in order to maximise their reliability, and provide a clear rationale for the correct answers. A number of the doctors who participated in the design of this book had firsthand experience of the National SJT Pilot Exam, and thus provided a unique insight into question format, style and design. This book not only offers valuable exam practice, but

also equips the reader with the skills, aptitude and knowledge base to effectively cope with complex scenarios as they move on to their working life.

RRB Assistant Loco Pilot 2018 Stage I Exam 20 Solved Papers Hindi Edition

Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

One of the most important subjects for any student of engineering to master is the behaviour of materials and structures under load. The way in which they react to applied forces, the deflections resulting and the stresses and strains set up in the bodies concerned are all vital considerations when designing a mechanical component such that it will not fail under predicted load during its service lifetime. All the essential elements of a treatment of these topics are contained within this course of study, starting with an introduction to the concepts of stress and strain, shear force and bending moments and moving on to the examination of bending, shear and torsion in elements such as beams, cylinders, shells and springs. A simple treatment of complex stress and complex strain leads to a study of the theories of elastic failure and an introduction to the experimental methods of stress and strain analysis. More advanced topics are dealt with in a companion volume - Mechanics of

Materials 2. Each chapter contains a summary of the essential formulae which are developed in the chapter, and a large number of worked examples which progress in level of difficulty as the principles are enlarged upon. In addition, each chapter concludes with an extensive selection of problems for solution by the student, mostly examination questions from professional and academic bodies, which are graded according to difficulty and furnished with answers at the end. * Emphasis on practical learning and applications, rather than theory * Provides the essential formulae for each individual chapter * Contains numerous worked examples and problems
